In June a box, one cubic foot in size containing four cells, inclosing thin sheets of lead surrounded with felt saturated with dilute acid, &c., was conveyed from Paris to London. Sir Wm. Thomson found it to possess the electric energy of one million foot pounds, and said in a letter to *The Times* of 6 June, 1887: "This solves the problem of storing electricity in a manner and in a state useful for many important applications." 6 June, 1887.

ELECTRO-MAGNETISM began with Ørsted's discovery of the action of the electric current on the magnetic needle 1819 proved by Ampere who exhibited the action of the voltaic pile upon the magnetic needle and of terrestrial magnetism upon the voltaic current. He also arranged the conducting wire in the form of a helix or spiral, inverted a galvanometer and imitated the magnet by a spiral galvanic wire. 1820.

MAGNETO-ELECTRICITY (the converse of Ørsted's discovery of electro-magnetism) discovered by Faraday who produced an electric spark by suddenly separating a coated keeper from a permanent magnet, and found that an electric current existed in a coil of wire situated between the poles of a magnet. 1831.

The *Magneto-Electric machine* arose out of Faraday's discovery and was first made at Paris by Pixii 1822 and in London by Davy. 1833.

 The conducting wires (27 miles long) were placed on the government pier in Dover Harbour and in the *Griffith* steamer were coiled about 30 miles, in length of telegraph wire in used in a covering of gutta serena, half an inch in diameter. The *Griffith* started from Dover unrolling the telegraph wire as it proceeded and allowing it to drop to the level of the sea. In the evening the steamer arrived on the French coast and the wire was run up the cliff at Cap Grisnez to its termination and messages were sent to and fro between England and the French coast. But the war, in which the *Griffith* crossed a rocky ridge and stopped in two, and thus the enterprise for that time failed.
 New arrangements were soon made and on a scale of greater magnitude and the telegraph was opened the opening and closing prices of the funds in Paris were known on the London stock exchange within business hours and guns were fired at Dover by communication from Calais 13 Nov 1851

 ATLANTIC TELEGRAPH A plan to unite Europe and America by telegraph was entered at the government registration office in June 1845, by Mr J Watson Brett and Mr Jacob Brett who made proposals to the government which were not accepted. This plan was attempted to be carried out by a company in 1857 and 1858 with the concurrence of the British and American governments 2500 miles of wire were manufactured and tested in March, 1857
 The laying it down commenced at Valentia in Ireland on 3 Aug "
 The vessels employed were the *Nagara* and *Albatross* (American vessels) and the *Leopard* and *Argentine* (British vessels). After sailing a few miles the cable snapped. This was soon repaired but on 12 Aug after 200 miles of wire had been paid out it snapped again (and the vessels returned to Plymouth) 11 Aug "
 A second attempt to lay the cable failed through a violent storm, 20-21 June, 1858
 The third voyage was successful. The junction between the two continents was completed by the laying down of 20-2 miles of wire from Valentia, in Ireland to Newfoundland. The first two messages on 5 Aug were from the queen of England to the president of the United States, and his reply 5 Aug "
 This event caused great rejoicing in both countries, but unfortunately, the insulation of the wire gradually became more faulty, and the power of transmitting intelligence utterly ceased on 4 Sept. "

A new company was formed 1850
The Great Eastern steamer, engaged to lay down
 250 miles of wire, with 25,000 tons burden, sailed
 for Valentia, Ireland, from the Thames, com-
 manded by capt. Anderson, accompanied by pro-
 fessor Wm. Thomson and Mr. Crosswell (F.
 Vachy), to superintend the paying out the cable, 15 July, 1855

After connecting the wire with the land, the *Great
 Eastern* sailed from Valentia 25 July.
 Telegraphic communication with the vessel (inter-
 rupted by two faults, due to defective insulation,
 caused by pieces of metal pressed into the gutta-
 percha casing, which were immediately repaired)
 finally ceased on 2 Aug. The apparatus for
 raising the wire proving insufficient, the vessel
 returned, and arrived at the Medway 19 Aug.
Atlantic telegraph company reconstituted as the
 Anglo-American telegraph company limited, 1866

The Great Eastern, with a new cable, sailed from
 the Medway, 30 June; the shore-end at Valentia
 was spliced with the main cable, and the *Great
 Eastern* sailed, 15 July; 1000 miles of cable had
 been laid, 25 July; the cable was completely laid
 at Heart's Content, Newfoundland, and a message
 sent to Lord Stanley, 27 July; message from the
 queen to president of the United States sent, 28
 July, "From the queen, Osborne, to the presi-
 dent of the United States, Washington. The
 queen congratulates the president on the success-
 ful completion of an undertaking which she hopes
 may serve as an additional bond of union between
 the United States and England." To which he
 replied, 30 July, "

The last cable of 1865 recovered, 2 Sept.; and its
 laying completed at Newfoundland, 4 Sept.
The Great Eastern arrived at Liverpool, 15 Sept.
 Messrs. Samuel Canning, Daniel Gooch, and capt.
 Anderson knighted, Oct.

 the cable passed signals through 3700 miles of
 wire by means of a battery formed in a lady's
 thumb.]

But the same amount of energy transformed into electric light produces 1,600-candle power. . . . Scientific witnesses considered that in the future the electric current might be extensively used to transmit power as well as light to considerable distances, so that the power applied to mechanical purposes during the day might be made available for light during the night. . . . There seems to be no reason to doubt that the electric light has established itself for lighthouse illumination, and is fitted to illumine large symmetrical places, such as squares, public halls, railway stations, and workshops. . . . Compared with gas, the economy for equal illumination does not yet appear to be conclusively established. . . . Gas companies, in the opinion of your committee, have no special claims to be considered as the future distributors of electric light. . . . Your committee, however, do not consider that the time has yet arrived to give general powers to private electric companies to break up the streets, unless by consent of the local authorities."—12 votes. 19 June, 1880

ELEGY Elegiac verse (consisting of a hexameter and pentameter alternately) was the first variation from the hexameter or epic measure, used by Tyrtæus and other early poets. The elegies of Ovid and Catullus are celebrated. Gray's "Elegy, written in a country churchyard," was published in 1749.

ELEMENTS were formerly reckoned as four earth, air, fire and water. Lavoisier enunciated the principle that all bodies which cannot be proved to be compounded are elements, and to be treated as such. Mr W Crookes FRS, in a lecture at the Royal Institution, London by delicate experiments demonstrated that vitrium is a compound body, and expounded a theory that all the elements have been evolved from what is termed *Protyle*, 18 Feb 1887. About twelve new elements said to have been discovered in rare earths by MM. Kruss and Nilon by the spectroscopic in 1887. Mr Crookes declared Didymium to be a compound body *See Table*, and separate article. The chemical elements were added to be about 77 in 1881.

ELEPHANT, in the earliest times trained to war. The history of the Macabees informs us, that "to every elephant they appointed 1000 men armed with coats of mail, and 500 horse and upon the elephants were strong towers of wood, &c." The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size presented by the king of France to our Henry III in 1238. *Baker's Chron* Polyneus states that Caesar brought one to Britain 54 a c, which terrified the inhabitants greatly. See *Knighthood* 13 elephants in lord May's procession, 9 Nov 1876

Chunee, an elephant 13 feet high in Cross & Managierie, Exeter Change, London becoming dangerous, was shot, retreating 180 musket balls before he fell, 1 March, 1800.

A young elephant brought into Court of Exchequer to show his peaceful character, in a suit for damages for frightening a pony at the Alexandra Palace, 18 July, 1880.

Barzums, the American showman, bought, for \$5000, the large male African elephant Jumbo, 6 tons weight, of the Zoological Society, Regents Park, London. Jumbo refused to go 18 Feb. After much trouble he was removed in the night, 22 March, and placed in the *Asiatic* *Monarch*, 23 March, arrived at New York, 9 April, 1882, killed on the railway, 25 Sept. 1882.

A so-called white elephant (little differing from others), named *King of Spain*, bought by Mr. Barnum from the King of Spain, arrived at Liverpool, 24 Jan., at the Zoological gardens, London, 27 Jan.; left 12 March, 1834; burnt with Abner, "Yumbo's" wife and others at the destruction of Mr. Barnum's show and menagerie at Bridport, U.S. by fire, 30 Nov. 1837. Joseph Merrick, deformed, termed the "elephant man," supported at the London hospital, 1836 of seq.

ELEUSINIAN MYSTERIES. The institution of these annual secret religious ceremonies in honour of Demeter (Ceres) at Athens, is traditionally attributed to Cadmus, 1550; to Erechthus, 1399; or to Kumolpus, 1356 A.C. If any one approached them, he was to be put to death. They were introduced from Eleusis into Rome, listed about 1800 years, and were abolished by Theodosius A.D. 389. The laws were—1. To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilization of mankind one of the beneficial effects of the Eleusinian mysteries.

ELGIN MARBLES, derived chiefly from the Parthenon, a temple of Minerva, on the Acropolis at Athens, of which they formed part of the frieze and pediment, the work of Phidias, under the government of Pericles, about 450 A.C. Thomas earl of Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; and from him they were purchased by the British government for 75,000*l.* and placed in the British Museum, in 1816. The ship conveying them was wrecked near Cerigo, and Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and recovered them from the sea.

ELGUETA, N. Spain; near here the Carlists defeated the republicans under gen. Serna, and took two prisoners, 5-6 Aug. 1873.

ELINGA, W. Spain. Heri P. Scipio Africanus totally defeated the Carthaginians under Hasdrubal Bisco, which led to their expulsion from the country, 206 A.C.

ELIS, a Greek state termed the "Holy Land," in the Peloponnese, founded by the Heraclidae, 1103 A.C. Here Iphitus revived the Olympic games, 688, which were regularly celebrated after Cerebus gained the prize in 776. Elis surrendered many towns to the Spartans in war, 400. After various changes, Elis joined the Achaean league, 274; and with the rest of Greece was subjugated by the Romans in 146.

ELL (so named from *alma*, the arm) was fixed at 45 inches, by king Henry I. in 1101. The old French ell, or *cune*, was 46.790 inches.

ELLISON GALLERY. In April, 1860, Mrs. Elizabeth Ellison (in conformity with the wish of her deceased husband, Richard), presented to the South Kensington Museum a series of 50 original water-colour drawings, by the first masters.

ELLORA or **ELORA**, Central India; remarkable for its very ancient rock-cut temple: excavated according to Hindoo legends nearly 7000 years ago; but more probably about 800 A.D. The town was ceded to the British by Holkar in 1818, and transferred by them to the Nizam of the Deccan in 1832.

ELMINA, and Dutch Guinea, W. Africa, were ceded by the Dutch government by treaty, signed Feb. 1872, and consolidated with the West African settlements; first governor, Mr. Pope Hennessy, April, 1872. See *Aden*.

EL-OBEDI, Battle of, 3-4 Nov. 1884. See *Soudan*.

ELOPEMENT. A wife who departs from her husband, loses her dowry by the statute of Westminster, 1285—unless her husband, without coercion of the church, be reconciled to her. Earlier laws punished elopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, in the 5th century, and placed over it St. Aisius, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardara, Drumelville, and others of less note, were also annexed to Elphin, which became one of the richest sees in Ireland. It is valued in the king's books, by an extent returned 28 Eliz., at 103*l.* 18*s.* sterling. The see was united to Kilmore in 1841, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELSINORE, Zealand, Denmark, formerly the station for receiving the Sound dues (*which see*). Population, 1890, 11,082.

EL-TEB, Battle of, 29 Feb. 1884. See *Soudan*.

ELY, an island in Cambridgeshire, on which a church was built about 673, by Etheldreda, queen of Kyrid, king of Northumbria; she also founded a religious house, filled it with virgins, and became herself first abbess. The 1200th anniversary was celebrated 17-21 Oct. 1873; about 60,000*l.* had then been spent on the restoration of the cathedral. The Danes ruined the convent about 870; but a monastery was built in 879, on which king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby it became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108, and his successor Hermann was the first prelate, 1109. It is valued in the king's books at 213*l.* 18*s.* 5*d.*; present stated income, 5500*l.* Population in 1881, 4,171; 1891, 8,017.

ELY CHAPEL, Holborn, London, erected in the 14th century, sold for 5250*l.*, 29 Jan. 1874; acquired by the R. C. fathers of the order of Charity, 1874; and finely restored at the expense of the duke of Norfolk and others, opened as St. Etheldreda's chapel, 23 June, 1876.

ELZEYR, or **ELSEVIER**, a family of printers, in Holland, whose reputation is based on fine pocket editions of the classics.

Louis, the founder, was born in 1540; began business at Leyden in 1580; he printed about 150 works, and died 4 Feb. 1617. His sons (some fully Bonaventures) and grandsons, were celebrated for their work.

EMANCIPATION, see *Roman Catholics* and *Norway*. The Emancipation Society for slaves lasted 1852-5.

EMANUEL HOSPITAL, Westminster, founded in 1554 by lady Anne Blore for aged people and children. Its original annual income had increased from 360*l.* to about 4000*l.* in 1870, when changes in the disposition of the funds were proposed by the Charity Commissioners, and some effected. Through reduction of income to about 300*l.* the buildings decay, and the number of inmates decrease, reported Jan. 1890. The proposed change of site much opposed, 1892.

EMBALMING. The ancient Egyptians believing that their souls, after many thousand years, would re inhabit their bodies, if preserved entire, embalmed the dead. Some of the bodies, called *mummies*, buried 3000 years ago, are still perfect. "The physicians embalmed Israel," 1689 B.C. Gen. 1. 2; see *Mummies*. Carbolle acid was successfully employed by professor Seely in America, in 1868.

The most perfect specimens of modern embalming are preserved in the museum of the royal college of surgeons, one being the body of the wife of Van Butchell, preserved by John Hunter by injecting camphorated spirits of wine, &c. into the arteries and veins; and the other the body of a young woman, who died about 1780 of consumption, in the Lock hospital. The method of embalming royal personages in modern times is fully described in Hunter's "Posthumous Works." He died in 1793.—During the American War (1861-5), many soldiers' bodies were embalmed and sent home.

Improvements in embalming made by Prof. Laskowski of Geneva, 1885.

EMBANKMENTS of earth were erected by the ancients for preservation from their enemies and the inundations of the tide. Those of the Egyptians and Babylonians are described by Herodotus and Strabo. To the Romans are attributed the first dykes of Holland, and the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale's "History of Embanking" first appeared in 1662; see *Drainage, Levels, and Thames*. Since 1830, millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish *embargar*, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, 14 Jan. 1801; see *Armed Neutrality*.

EMBER WEEKS, instituted, it is said, by pope Callixtus I (210-223), to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. In the English church the *Ember days* are the Wednesday, Friday, and Saturday, after the following days—the first Sunday in Lent, Whit-sunday, 14 Sept. (Holy Cross), and 13 Dec. (St. Lucia).

EMBROIDERY is usually ascribed to the Phrygians; but the Sidonians excelled in it, and it is mentioned in 1491 B.C. *Erodus* xxxv. 35 and xxxviii. 23. See *Bayeux Tapestry*. Embroidery is now done by machinery. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804. Heilmann's embroidery machine was patented by Köchlin. *Berlin Wool-work* has been much improved of late years by the production of more elegant patterns, first published by Mr. Wittlich in Berlin, about 1810.

EMERALD, a precious stone, of a green colour, found in the East and in Peru. It has been erroneously alleged that there were no true emeralds in Europe before the conquest of Peru; but there is one in the Paris Museum, taken from the mitre of pope Julius II. who died in 1512, and Peru was not conquered till 1545. It is stated that there were

mines at Gebel Zabara worked by Egyptians, 1800 B.C.

EMERGENCY MEN, a name given to the more energetic members of the Irish Defence Association; and especially to the men engaged in carrying out evictions in Ireland. See *Mansion House Funds*, 1881.

EMESA, now Hama, Syria, renowned for a temple of the sun, the priest of which, Basianus, was proclaimed emperor with the name Heliogabalus or Elagabalus, 218. His atrocities led to his assassination, 11 March, 222.

EMIGRANTS. The French aristocracy and clergy (*émigrés*) began to leave their country in July, 1789, at the breaking out of the revolution: their estates were confiscated in Dec. A large number returned in 1802, by an amnesty granted after the peace of Amiens. Many were indemnified after the restoration in 1815.

EMIGRATION. Phœnician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea; see *Magna Grævia, Marselles, &c.* The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819. Regulations for emigration were made in 1831, and in Jan. 1840, the Colonial Land and Emigration Board was established. Emigration much promoted through want of employment in London, 1869-70; from Ireland, by act passed, 1883. Much emigration from Great Britain and Germany to America, 1881-5. Fare of steerage passengers from Britain to America by steamers reduced to about 4*l.* Jan. 1883.

The "Order of the Sons of St. George," at Philadelphia, which was established to succour emigrants, still exists. (See under *George, St.*) It published a letter dissuading unadvised emigration : the Mansion House to promote State-directed emigration of the unemployed : 5 April, 1882. A tax of 2*s.* per head levied in United States on immigrants; act passed by congress in opposition to the government and steam ship companies Ang. "

Association formed to promote State-directed emigration and civilisation : 10 Aug. 1883.

Emigrants' Information Office, London, opened 7 Oct. 1886: reported to be highly successful May, 1888

The Well-Being Emigration Society, supported by the earls of Aberdeen and Rodan, lords Montagu and Dorchester and other gentlemen, established in 1884. Up to 1891, 3,666 emigrants had been assisted by the society.

or commemoration of founders and benefactors. *Oldisworth*. The public commemoration at Oxford suspended in 1875; restored, 21 June, 1876. They were the origin of church-wakes in England, about 600. They were also feasts celebrated by the Jews on the 25th of the ninth month, in commemoration of the Maccabees cleansing the temple, which had been polluted by Antiochus Epiphanes, 131 B.C.

ENCAUSTIC PAINTING, enamelling by fire. Painting with burnt wax is said to have been known to Praxiteles about 360 B.C. This art was revived by M. Bachelier, 1749, by count Caylus, 1765, and by Miss Greenland, 1785 and 1792.

ENCUMBERED ESTATES ACT, passed July 1853, to enable owners of land or leases in Ireland, subject to encumbrance, to apply to commissioners appointed under it to direct a sale of such property. These commissioners held their first court in Dublin, 24 Oct. 1849, and their last 28 July, 1858, a new court being established under the Landed Estates act. The number of estates sold, up to 1858, was 2380, producing twenty-two millions of pounds. In 1854 a similar act was passed for the West Indies.

ENDERBY LAND, see *Southern Continent*.

ENDOSMOSIS. M. Dintochet, about 1826, found that if two fluids, gases or vapours, of unequal density, are separated by an animal or vegetable membrane, the denser will attract the less dense

through the medium. This property he called *endosmosis*, when the attraction is from the outside to the inside, and *exosmosis* when it operates from the inside to the outside. Many natural phenomena are thus more clearly understood. *Brande*.

ENDOWED SCHOOLS ACT, containing the "Conscience Clause," passed 1860; another similar act passed 2 Aug. 1869. A committee reported on the working of the act, June, 1887.

ENDOWED SCHOOL COMMISSION (consisting of lord Lyttelton, canon Robinson, and others), was appointed under the act 32-33 Vict. c. 56 (2 Aug. 1869). It threw open many endowments to the nation, and carried out reforms, being frequently much opposed. By an act passed 7 Aug. 1874, its duties were transferred to the charity commissioners, two new commissioners (Mr. Longley, lord Clinton), and canon Robinson being appointed. The commissioners had dealt with 74 schools; prepared schemes for 66; leaving about 600 to be dealt with; Aug. 1874.

ENERGY. In an address to the British Association at York, 1 Sept. 1881, sir William Thomson described the sources of all the energy in nature available to man for the production of mechanical effect, as tides, food, fuel, wind and rain, all except the tides derived from the sun.

ENFIDA CASE, see *Tunis*.

ENFIELD, N. Middlesex; a manor belonging to the duchy of Lancaster, is mentioned in Domesday, and was given to De Mandeville by William I. after 1066. After various changes it became the property of the crown by the marriage of Mary, heiress of the Bohuns, to Henry duke of Lancaster, afterwards king Henry IV. 1399. Edward VI. gave it to his sister Elizabeth, who resided here in 1552, in a palace, part of which still remains. The grammar school was founded about 1586. The ancient chase was dischased and enclosed, after 1 Jan. 1779. Population, 1881, 18,944; 1891, 31,532.

ENFIELD MUSKET, see *Fire-arms*.

ENGEN, Baden. Here Moreau defeated the Austrians, 3 May, 1800.

ENGHIEN or STERNKIRK (S. W. Belgium). Here the British under William III. were defeated by the French under marshal Luxembourg, 24 July, 1692.—The duc d'Enghien, a descendant of the great Condé, was seized in Baden by order of Bonaparte, conveyed to Vincennes, and, after a hasty trial, shot by torch-light, immediately after condemnation, 21 March, 1804. The body was exhumed, 20 March, 1816.

ENGINEERS, Military, formerly called *Trench-masters*. Sir William Pelham officiated as trench-master in 1622; the chief engineer was called *camp-master-general* in 1634. Capt. Thomas Ruid had the rank of chief engineer to the king about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, 25 April, 1787. It has a colonel-in-chief, 16 colonels-commandant, and 16 colonels. *Civil Engineering* became important in the middle of the last century, when Smeaton began the Eddystone lighthouse, and Brindley the Bridgewater canal. Since then the Romnies, Telford, the Stephenson and Brunels, Locke, and others have constructed breakwaters, docks, bridges, railways, tunnels, &c., which are the marvel of our age.

"Engineering is the art of directing the great sources of power in nature for the use and convenience of man." (Thos. Tredgold, died 1829.)

The new society of Civil Engineers formed by fusion of old societies, takes the *Standard* society of Civil Engineers

ENGLAND (from *Angles* and *land*, land), so named, it is said, by Egbert, first king of the English, in a general council held at Winchester, 829; or by Alfrethstan, 925. See *Anglo-Saxons*.

England was united to Wales, 1283; to Scotland in 1603; they have had the same legislature since 1707, when the three were styled Great Britain. James I. first adopted the title of king of England, Scotland, afterwards Great Britain, France, and Ireland.

After the treaty of Amiens, signed 27 March, 1802, France was omitted from the royal style. Ireland was incorporated with them, by the act of legislative union, 1 Jan. 1801, as the United Kingdom of Great Britain, France, and Ireland. The British empire is computed to contain about 7,000,000 square miles of territory, with 340,220,000 inhabitants.

Statistical details are given under the respective headings; *Army, Navy, Revenue, Population, &c.* Population of England and Wales, 1891, 29,001,018.

 Letter from the queen, to the empire (London Gazette, 2 Feb.)
 "Oswestry, January 26, 1890.
 "I must once again give expression to my deep sense of the loyalty and affectionate sympathy evinced by my subjects in every part of my empire on an occasion more sad and tragical than any but one which has befallen me and mine, as well as the nation. The overwhelming misfortune of my dearly loved grandson having been thus suddenly cut off in the flower of his age, full of promise for the future, amiable and gentle, and adorning himself to all, renders it hard for his sorely stricken parents, his dear young bride, and his fond grandmothers to bow in submission to the inscrutable decrees of providence.
 "The sympathy of millions, which has been so touchingly and visibly expressed, is deeply gratifying at such a time, and I wish, both in my own name and that of my children, to express from my heart, my warm gratitude to all.
 "These testimonies of sympathy with us, and appreciation of my dear grandson, whom I loved as a son, and whose devotion to me was as great as that of a son, will be a help and consolation to me and mine in our affliction.
 "My buravements during the last thirty years of my reign have indeed been heavy. Though the labours, anxieties, and responsibilities inseparable from my position have been great, yet it is my earnest prayer that God may continue to give me health and strength to work for the good and happiness of my dear country and Empire while life lasts."

'ENGLISHMAN,' a newspaper edited by Dr. Kewley, published in April, 1874, soon after the conviction of the claimant of the Tichborne estates (see *Travels*, 1873-4). For its libellous character, the editor was disarmed by the society of Gray's Inn, i. Aug. 1874; ordered to give up his chambers by vice-chancellor, 29 June, 1876. He died 16 April, 1880.

ENGRAVING on signets is mentioned *Ætæol.* xxviii. 11 (B.C. 1491). Engraving on plates and wood began about the middle of the 15th century. Engraving on glass was perfected by Bourdier, of Paris, 1799. The copyright to engraving has been protected by several statutes; among the principal are the acts 16 & 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict. 6 Aug. 1844, and 15 Vict. 28 May, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanised India-rubber, was shown by the electro-printing block company in 1860; see *Lithography and Photogalvanography*. In "Lynn Germania," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

ENGRAVING ON COPPER. Prints from engraved copper-plates made their appearance about 1450, and were first produced in Germany. Masso, a runaway Flin-guerra, is considered to have been the first Italian engraver, about 1440. (See *Ætæol.*) The earliest date known of a copper-plate engraving is 1461.

Rolling-presses for working the plates invented in 1545. Of the art of etching on copper by means of aqua-fortis, Francis Mazzuoli, or Parmegiano, is the reputed inventor, about 1532. *De Fide.*

ENGRAVING ON WOOD, long known in China, began in Europe with the *brief-makers* or manufacturers of playing-cards, about 1400 (see *Printing*). The art is referred by some to a Florentine, and by others to Remus, a German; it was greatly improved by Dürer (1471-1528) and Lucas van Leyden (1497). It was much improved in England by Bewick and his brother, and pupils, Bechtel, Anderson, &c., 1769, & seq. The earliest wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date 1497.

Mr. W. J. Linton's "Masters of Wood Engraving," with 250 fine examples, published July, 1890.

ENGRAVING ON STONE, to be hardened afterwards, was introduced into England by Messrs. Perkins and Heath, of Philadelphia, 1819.

John Fyfe, "father of English landscape engraving," born 1762; died 6 Feb. 1822.

aquatinta, by which a soft and beautiful effect is produced, was invented by the celebrated French artist, St. Non, about 1666; he communicated his invention to Le Ponce. Barabbe of Paris was distinguished for his improvements in this kind of engraving, 1763. *Order-scure* engraving originated with the Germans, and was first practised by Blair, one of whose prints bears date 1791 (see *Atlas*, &c.)

ENLISTMENT. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less than twenty-four hours after, and they are then at liberty to withdraw upon their returning the enlistment or bounty money, and 21s. costs. Enlistment is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines; and in 1867, to twelve years; see *Army*, 1867 and 1879, and *Foreign Enlistment*.

The dragoon regiment, the "Enniskillengers," was originally recruited here.

EQUESTRIAN ORDER in Rome was established with Romulus, about 750 B.C.; see *Knight-hood*.

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year: about 21 March, the vernal equinox, and 22 Sept., the autumnal equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for cases respecting sums under 500l. See *Supreme Court*, in which law and equity are combined.

Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage are now termed *Erastians*.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife was to be henceforth received in his court. The errors must be corrected with the pen. It is so in the army courts.

ERFURT (Central Germany), was founded in 476; and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitulated to Muret, when 14,000 Prussian troops surrendered, 16 Oct. 1806. In this city Napoleon and Alexander met, and offered peace to England, 27 Sept. 1806. The French retreated to Erfurt from Leipzig, 18 Oct. 1813. A German parliament met here in March and April, 1850. Population, 1850, 72,371.

ERIVAN (Armenia), in the 16th century the residence of the shahs of Persia, was taken by the Turks in 1553 and 1582; but recovered by Abbas the Great, 1604. After being several times captured, it was ceded to Persia, 1769. It was taken by Paskiewitch in 1827, and annexed to Russia by treaty in Feb. 1828.

ERZEROUH (Asiatie Turkey), a city built by Theodosius II., 415; taken by the Seljuk Turks in the 13th century, and by the Ottoman Turks in 1517. It was captured by the Russian general Paskiewitch, June, 1829, but restored in 1830. It was almost totally destroyed by earthquakes, 2 June to 27 July, 1859. Population in 1885, 60,000.

ESCORIAL, properly **ESCORIAL** (25 miles N.W. of Madrid), the magnificent palace of the

sovereigns of Spain, termed the eighth wonder of the world, was commenced by Philip II. in 1564, and completed in 1586, at a cost of about 10,000,000. It is built in the form of a gridiron in honour of St. Lawrence, on whose day (10 Aug. 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos the total length of all its rooms and apartments is above 125 English miles. The Escorial comprises a church, matasoleum, monastery, palace, library, and museum. It was struck by lightning and caught fire 11.30 p.m. 1 Oct. 1872, and was much damaged; but the grand library and other treasures were preserved.

ESPARTO, from the Latin *spartum*, *stipa tenacissima* of Linnaeus, a Spanish grass used by Romans for whip-thongs, and now largely employed in paper-making. In 1856 about 50 tons, in 1870 above 100,000 tons, and in 1890, 403,253 tons, were imported into Britain. The price has risen from 4s. to 10s. per ton. Living plants were received at Newcastle, July, 1867.

ESPIERRES (Belgium). At Pont-à-Chin, near this village, the French, under Pichegru, attacked the allied English and Austrian army (100,000 men), commanded by the duke of York, and were repulsed after a long and desperate engagement, losing the advantages gained by the victory at Turcoing, 22 May, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578, and abolished in 1791.

ESQUIRES, among the Greeks and Romans, were armour-bearers to, or attendants on a knight. *Blount*. In England the king created esquires by putting about their necks the collars of SS, and bestowing upon them a pair of silver spurs. John de Kingston was created a squire by patent, 13 Richard II., 1389-90. There are now legally esquires by birth, by creation, and by holding some office, but the title is very loosely given by courtesy.

"ESSAYS AND REVIEWS", by six clergymen and one layman of the church of England (the Rev. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo vol. in March, 1860. The book did not excite much attention at first, but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation 24 June, 1864. The ecclesiastical courts sentenced the revs. H. Williams and H. B. Wilson to suspension for one year, and costs, 15 Dec. 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, 8 Feb. 1864. The most remarkable amongst the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, now abp. of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce). The election of Dr. Temple to the see of Exeter was much opposed on account of his essay in this collection; see *Church of England*, 1869.

ESTE, HOUSE OF. Boniface, count of *Lucca* and duke of *Tuscany*, about 811, is said to have descended from *Odoacer*, king of *Italy*. From Boniface sprang *Albert Azzo II.* marquis of *Italy* and lord of *Este*, born about 906, who married—first, *Constance* of the house of *Guelf*, by whom he had *Guelf*, duke of *Bavaria*, the ancestor of the house of *Brunswick* (see *Bavaria* and *Brunswick*); and secondly, *Gersunda*, by whom he had *Fulk*, the ancestor of the *Estes*, dukes of *Ferrara* and *Modena*.

Population, 1886, 395,979.

ETATS, see *States*.

ETCHING, see *Engraving*.

ETHER was known to the earliest chemists. Nitric ether was first discovered by *Kunkel*, in 1681; and muriatic ether, from the chloride of tin, by *Courtauvauz*, in 1759. Acetic ether was discovered by *Leont Lauraguais*, same year; and hydrochloric ether was first prepared by *Gay-Lussac*. The phosphoric ether was obtained by *M. Boullay*. The discovery that by inhaling ether the patient is rendered unconscious of pain, is due to *Dr. C. T. Jackson*, of *Boston*, U. S. Mr. *Thomas Morton*, of the same place, first introduced it into surgical practice, under *Dr. Jackson's* directions (1846); see *Chloroform*, and *Anæsthesia*. The drinking of ether as an intoxicant greatly increased in the north of *England*, was checked by the enforcement of the *Temperance Act* of 1870, in regard to its sale. Oct. 1891. The term "ether" was applied to the transparent essential gases by the German astronomer *Encke*, about 1850, when studying the elements of *Pons' comet*, discovered in 1813.

ETHICS (Greek term for *Morals*). The works of *Plato*, *Aristotle*, and *Confucius*, contain heathen systems; the *New Testament* is that of Christianity. *John's Moral Philosophy* appeared in 1785, and *Locke's* *Elements of Morality* in 1845. An *English Society* existed in *London*, 1890.

ETHIOPIA. The name was applied mistakenly rather vaguely to countries the inhabitants of which had sun-burnt complexions, in *Asia* and *Africa*; but is now considered to apply properly to the modern *Nubia*, *Soumar*, and Northern *Abyssinia*. Many pyramids exist at *Nubia*, the capital of *Meroë*, the civilised part of ancient *Ethiopia*.

ETHNOLOGY, a branch of *Anthropology*, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind to each other is of recent origin. *Balbi's Ethnographic Atlas* was published in 1826, and *Dr. Prichard's* great work, *Researches into the Physical History of Mankind*, 1841-7. The *Ethnological Society*, established in 1843, published transactions. On 17 Jan. 1871, it was amalgamated with the *Anthropological Society*, (which see) and named the *Anthropological Institute*. *Dr. R. G. Latham's* works, on the *Ethnology* of the *British Empire*, appeared in 1851-2. Professor *T. H. Huxley* gave lectures on *Ethnology* at the *Royal Institution*, *London*, in 1866-7. Annual reports of the *Bureau of Ethnology*, *Washington, U.S.*, began to be published, 1879. The *International Congress of the Ethnographic Sciences* met at *Paris* Sept. 30, 1889.

ETHYL, a compound radicle, a colourless gas, with a slightly ethereal odour, a compound of carbon and hydrogen, first obtained in the free state by professor *Edw. Frankland* in 1849. Several of its compounds with metals take fire in the air.

ETNA, MOUNT (*Sicily*). Here were the fabled forges of the *Cyclops*; and it is called by *Pindar* the pillar of heaven. Eruptions are mentioned by *Diodorus Siculus* as happening 1693 B.C., and *Thucydides* speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 185, 121, and 43 B.C. *Lary*.

ETON COLLEGE (*Buckinghamshire*), founded by *Henry VI.* in 1440, and designed as a nursery to *King's College*, *Cambridge*. *John Stanbury*, confessor to *Henry VI.* (bishop of *Bangor*).

in 1445), was nominated the first provost. One of the provosts, William Wynnefete, (bishop of Winchester, 1447) greatly promoted the erection of the buildings. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, were formerly elected, on the first Tuesday in August, to King's College, Cambridge, and removed there when there were vacancies, according to seniority. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in funny dresses, to Salt-hill once in three years; the donation collected on the road (sometimes as much as 800*l.*) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The montem was discontinued in 1847. The college system was modified by the Public Schools act, 1869. In 1873 election Saturday ceased, the scholars to be students at Cambridge being chosen there. In 1880 there were 353 students; in 1891, 1,007.

ETRURIA (or **TUSCIA**, hence the modern name Tuscany), a province of Italy, whence the Romans, in a great measure, derived their laws, customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porcena of Clusina, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus, 396 B.C. A truce between the Romans and Etruscans for forty years was concluded, 351 A.C. The latter and their allies were defeated at the Vadimonian lake, 310, with the Boii their allies, 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining show the degree of their civilisation. Napoleon I. established a kingdom of Etruria, 1801, and suppressed it 1807, see Tuscany.—"The Cities and Cemeteries of Etruria," by George Dennis, published 1848 and 1878. *Etruria*, Staffordshire, the site of Josiah Wedgwood's porcelain works, &c., was founded in 1771.

EUBŌEA, the largest island in the *Ægean* sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, and was its most valuable possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Chæronea, 338, it became subject to Macedonia. It was made independent by the Romans in 194; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

EUCALYPTUS GLOBULUS, or Blue Gum Tree, a very last growing Tasmanian evergreen, of the order *Myrtaceæ*. From the extraordinary power of its roots of absorbing moisture, and the salutary aromatic odour of its leaves, it has been found highly beneficial in counteracting the malarial of marshy districts of hot climates, and hence has been named the fever-destroying tree. M. Hamel first sent seeds from Melbourne to Paris in 1854, and subsequently seeds were distributed over the south of Europe, the north and south of Africa, and elsewhere. He died in 1881.

Be rapid in the growth of this tree, that a forest may be planted in twenty years. It sometimes reaches the

height of 120 feet, with a circumference of 200 feet, swelling *Wollongongia glauca*, which see.

The timber, bark, and oils of the *Eucalyptus* are highly valuable, and professor Bentley says that the genus is one of the most important to man in the vegetable kingdom. In 1874 its medicinal value was said to have been exaggerated.

EUCHARIST, thanksgiving, an early name for the Lord's Supper; see *Sacrament*.

EUCLID'S ELEMENTS. Euclid, a native of Alexandria, flourished about 323-283 B.C. The *Elements* are not wholly his; for many of the demonstrations were derived from Thales, Pythagoras, Eudoxus, and others; Euclid reduced them to order, and probably inserted many theorems of his own. The *Elements* were first printed at Basil by Simon Grynnus, in 1533. Euclid is said to have told king Ptolemy that there was no royal road to geometry.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it; one was invented by Dr. Priestley, in 1772.

EUGENIOS, see *Heredity*.

EUGURINE TABLES, seven tablets of brass, probable date about 400 B.C., (with inscriptions relating to sacrifices, &c., four in Umbrian, two Latin, and one partly in both dialects), were discovered in 1444 at Gubbio, the ancient Engubium or Iguvium. The inscriptions are accurately given by Lepsius, in his "Inscriptiones Umbrice et Oscan," 1841.

EUNUCHS, first mentioned among the Egyptians and Assyrians, and said to have been first employed by Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the later Eastern empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, 14 Sept. 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It was attacked 17 Feb. 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which, however, was Selim Pasha, the commander of the Egyptian contingent.

EUPHRATES, the largest river in Western Asia. It rises in Armenia, and has two branches. On its banks are the remains of numerous ancient cities, such as Babylon and Birs Nimrod. The Euphrates Valley Railway, as a speedy means of reaching India, has been much advocated, especially by the late general Chesney, who published his survey of the Euphrates and Tigris in 1850. A parliamentary commission reported on it, Aug. 1872, when it was also considered at the meeting of the British association at Brighton. The construction would cost from five to ten millions sterling, and its advantages are considered rather hypothetical by the best judges.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphuæ; the Anatomy of Wit," by John Lyly, published in 1578.

EURASIAN PLAIN, the great central plain of Europe and Asia, so named by ethnologists (1865). The offspring of a European father and an Asiatic mother is termed Eurasian. The degraded condition of the Eurasians, which has caused

study, especially at Calcutta, was dismissed early in 1891. The Marchioness of Dufferin was deeply interested in the matter about 1884.

EUROPE, the smallest of the three divisions of the old continent, really an appendage of Asia; area, nearly 3,800,000 square miles; population, 301,700,000 (1872); 310,675,966 (1877); 336,321,680 (1884); 333,054,900 (1888); 357,379,000 (1891). For the history, see *Greece, Rome*, and the modern kingdoms.

EUROPEAN ASSURANCE COMPANY, see *Insurance*.

EUREYDICE, H.M.S. frigate, foundered in a squall off Dunmore, near Ventnor, Isle of Wight, 24 March, 1878; see *Naval and Wrecks*, 1878.

EUREYMEDON, a river in Pamphylia, near which Gimon, son of Mithridates, destroyed the fleet of the Persians at Cyprus, and defeated their land forces, 469 B.C.

EUSTACE, ST. (Lower Canada). The rebels were defeated here, 14 Dec. 1837; and compelled to surrender their arms. Their chiefs fled.

EUSTATIUS, ST., a West India island, settled by the Dutch, 1632; taken by the French in 1689; by the British in 1690; again by the British forces under Rodney and Vaughan, 3 Feb. 1781. It was recovered by the French under the marquis de Bouillé, 26 Nov. same year; captured by the British, 1801, 1810; restored to the Dutch, 1814.

EUSTON SQUARE MYSTERY, see *Trials*, July, 1879.

EUTAW SPRINGS (S. Carolina). Here the Americans were defeated by the British under Arnold, 8 Sept. 1781.

EUTYCHIANS, so called from Eutyches, an abbot of Constantinople, who asserted in 440 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradaeus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EUXINE, see *Black Sea*.

EVACUATION TREATY, see *France*, Sept. 1871.

EVANGELICAL, a term applied to a portion of the clergy of the church of England (also called the low church), who profess to preach the gospel more purely than their brethren termed the high church party; see *Church of England*.

The Evangelical Alliance was founded by Sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of Protestant Christians against Romanism and infidelity.

At a general meeting held in London 10 Aug. 1846, 921 members were present from all parts of the world.

Since 1845, annual meetings have been held in various towns in the United Kingdom.

General international conferences have been held: London, 1861; Paris, 1863; Berlin (revived by the Evangel. Socy., 1867); Geneva, 1867; Amsterdam, 1867; New York, Oct., 1879; Berlin, 1879; Copenhagen, 1885; Warsaw, 4 April, 1891.

A conference in connection with the Evangelical Alliance met at Washington, U.S.A., 9 Dec. 1887.

The "Evangelical Church" in Germany began with a fusion of the Lutheran and Calvinistic in Wesen in 1527; followed by similar movements in different parts of Germany, &c.

EVANGELISTS, preachers of the "gospel," or good news; see *Gospel*.

EVELINA HOSPITAL, Southwark, established in 1869 by Baron Ferdinand de Rothschild, in memory of his wife, and since maintained by him. Its enlargement by public aid was proposed in 1871.

EVENING SCHOOLS for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala in Wales by the rev. T. Charles in 1811. See under *Recreation*.

EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, 4 Aug. 1265, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know him, but was saved by exclaiming, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

EVICTIONS (in Ireland), 482,000 persons evicted from 1849-82, 119,000 reinstated as caretakers, see *Ireland*, 1886 *et seq.* Many evicted tenants made terms with their landlords, and returned to their farms, 1891-2.

EVIDENCE, LAW OF, regulated by 14 & 15 Vict., c. 99 (1851), 16 & 17 Vict., c. 83 (1853), 32 & 33 Vict., c. 68 (1869).

Mr. Labouchere's application for a mandamus of the Court of Queen's Bench to compel Sir Robert Carden to hear irrelevant evidence, refused 20 Nov. 1879.

EVIL MAY-DAY (1 May, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to Westminster, but they crying "mercy, mercy!" were all pardoned by the king, Henry VIII.

EVOLUTION THEORY includes the nebular theory and Mr. Darwin's doctrine of natural selection; see *Development*, and *Progressionists*.

In 1877 three forms of evolution were discussed:—1. That of all animals gradually from the lowest form, the amoeba, up to man, in opposition to the Biblical account of the creation; 2. that of every animal from protoplasm in a cell, or egg; 3. that of all the parts of an animal from its blood.

EXALTATION, see *Cross*.

EXAMINATIONS of candidates for employment in the civil service has been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations;" see *Civil Service*.

A strong protest against the system, fully signed, *Nineteenth Century*, Nov. 1888.

EXAMINER, liberal weekly journal, established Jan. 1868; extinct; last number, 26 Feb. 1881.

EXAMINER OF STAGE PLAYS, an office under the lord chamberlain, now held by Mr. E. F. S. Pigott, appointed 25 Aug. 1874. His more recent predecessors were, George Colman, Chas. Kemble, and his son John Mitchell Kemble, and Mr. Wm. Rodham Doane (1857-74).

EXCHORS, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, 548-553. They rule Ravenna from 568 to 754, when Eutychius, the last, was overcome by Astolphus the Lombard. The Exarch in the church was next in dignity to the patriarch.

EXCHANGE, formerly *Bourse*, the Royal Exchange being "Britain's Bourse;" that at Paris is still named "*La Bourse*," from *bursa*, a purse. One called *Collegium Mercatorum* existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. See *Royal Exchange*, and *Bills of Exchange*.

EXCHEQUER, an ancient institution, consisting of officers with financial and judicial functions: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III. about 1221. Sir Robert Walspole was the last chancellor of the exchequer who acted judicially (in 1735). The legal function of the chancellor was abolished by the Judicature act, Aug. 1873. Charles II. seized on the Goldsmiths' funds in the exchequer to prepare for war, 2 Jan. 1672. The English and Irish exchequers were consolidated in 1816; see *Chancellors of the Exchequer*, and *Tally Office*.

EXCHEQUER BILLS. The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1677, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and being received for taxes, and paid by the bank in lieu of taxes, in the dealings with the exchequer, they usually bear a premium. Amount in circulation, 56,574,760 in 1877; in 1854, 16,008,700.

Robert Aylett, a cashier of the bank of England, tried for embezzling exchequer bills, and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 34,459*l.* 18 July, 1853.

Mr Beaumont Smith tried for forging exchequer bills to the amount of 500*l.*; pleaded *guilty*; sentenced to transportation, 4 Dec. 1841.

EXCHEQUER BONDS, a species of public securities, introduced by Mr. W. E. Gladstone, in 1853, have not been well received.

TELLERS OF THE EXCHEQUER. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1846, or by surrender or abolition, in Oct. 1844), there were the four iterative offices of *tellers* of the exchequer, also abolished, 10 Oct. 1844.

John Jeffreys Pratt, earl, afterwards marquess Camden, was appointed a teller of the exchequer, in 1780, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income (amounting in the whole to upwards of a quarter of a million sterling) and placed it at the service of the state, as he annually accrued.

COMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. The first comptroller-general was sir John Newport, appointed 11 Oct. 1834.—34,459*l.* per annum have been saved to the state by the retrenchments in this department of the government.

COURT OF EXCHEQUER CHAMBER. Erected by Edward III. in 1257. It was remodelled by Elizabeth, in 1584, and there made to comprise the judges of all the courts. This court is for error from the judgments of the courts of queen's bench, common pleas, and exchequer of pleas in actions commenced therein. Re-modelled by act a Geo. IV. & 1 Will. IV. c. 70 (23 July, 1830).

The Exchequer office, Westminster, was instituted by Henry IV. in 1399.

EXCHEQUER, COURT OF (*Curia Regia*), instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the common pleas until they were separated, 16 John, 1215. *Coke's Reports*. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.* Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, *taxation*, and *fine imposed*, as well as all matters of common law between subject and subject. The judges are styled barons, first appointed 1234. There were a chief and four puisne barons: the fifth judge having been added 23 July, 1830. The office of Cursitor Baron was abolished in 1856. For changes, see *Supreme Court*. The ancient court sat for last time, 10 July, 1875. The Exchequer division was abolished in 1881; in Ireland in 1887. See *Supreme Court Judicature Act*, passed 27 Aug. 1881.

EXCISE. The system was established in England by the Long Parliament in 1643, duties being levied on wines, beer, &c., and tobacco, to support the army against Charles I. It was continued under Charles II. The present system was settled about 1733. The old excise office was built on the site of Gresham college in 1774; the present is at Somerset-house. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782; but received them again in 1868. In 1849 the boards of excise, stamps and taxes, were united, as "the board of commissioners of inland revenue." Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others, of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 & 18 Vict. c. 27, July 3, 1854. The excise duties were further modified in 1860; see *Revenue*.

EXCLUSION BILL. (to exclude the Duke of York, afterwards James II., from the throne), was passed by the commons, but rejected by the lords in 1680. The revival of the question led to the dissolution of parliament in 1681.

EXCOMMUNICATION, or separation from Christian communion (*Matth.* xviii. 17; *1 Cor.* v. 2 &c.), was instituted to preserve the purity of the church. The Roman church excommunicated by *Bell, Book, and Candle* (which see). See *Interdict*.

Gregory VII. excommunicated the emperor Henry IV., and absolved his subjects from their allegiance 1077
Innocent III. excommunicated John of England, placing the country under an interdict 1208-14
Gregory IX. excommunicated the emperor Frederick II. four times between 1231-45
Louis XII. of France was excommunicated by Julius II. 1510: Luther by Leo X. 1521; Henry VIII. of England by Paul III. in 1535; and Elizabeth by Pius V. 25 April, 1570
The emperor of France, the king of Sardinia, and others, were virtually excommunicated (but not by name) on account of the annexation of the Romagna by Sardinia 29 March, 1860

EXECUTIONS, see *Crimes*. In the reign of Henry VIII. (38 years) it is said that no less a number than 72,000 criminals were executed. *Stow*. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe, the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to 312; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London (formerly generally at Tyburn) was in front of Newgate from 1783 to 1868, when an act was passed directing executions to take place within the walls of prisons. The dissection of the bodies of executed persons was abolished in 1832, see *Death*, 1868.

John Calcraft, born 1800, executioner for London, 1828-1872, died 13 Dec. 1879; his successor Wm. Marwood, died 4 Sept. 1883; he was succeeded by Berry; said to have resigned March, 1890.

EXETER (Devonshire), said to have been named *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian; its present name is derived from *Excesta*. It was for a considerable time the capital of the West Saxon kingdom. The bishopric anciently comprised two sees Devonshire (founded about 900) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin, and afterwards at

St. German's. About 1090 the seat was united. St. Peter was the first bishop of Cornwall, before 900; Batholomew, the first bishop of Devonshire, 905; and Lanfric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan: Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see, 1049; the see was valued in the king's books at 600*l.* per annum. Present stated income, 4200*l.* Population, 1881, 37,655; 1891, 37,580.

EXETER CHANGE (London), was built about 1680, on part of the site of Exeter house, the palace of Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquess of Exeter near its site, opened in 1845, was pulled down in 1862, for the Strand Music-hall, now Gaiety theatre.

EXETER COLLEGE (Oxford) was founded by Walter Stapleton, bishop of Exeter in 1314. The college buildings mainly consist of a quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious and philanthropic institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c., opened 29 March, 1831. See under *Musical*. Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the church of England, on Sundays.

The Sacred Harmonic Society met here 1831-80; last concert, "Israel in Egypt," 30 April, 1880. The hall was purchased for the Young Men's Christian Association for 25,000*l.* July 1880; re-opened (Gubies), 29 March, 1881.

EXHIBITION OF 1851 (THE GREAT EXHIBITION). The original idea of a *National Exhibition** is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking."

* Industrial exhibitions began with the French; *Expositions* having been organised and opened at Paris in 1798, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage, in 1828, near Charing-cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1840. Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence, Constantinople, Bayonne, Melbourne, Vienna, Philadelphia, and many other places (which see).

† The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (after sir Joseph) Paxton (who died 6 June, 1855), and the architects were Messrs. Fox and Henderson, to whom it was agreed to pay 70,000*l.* or 75,000*l.* if the building were permanently retained. *Monats.* 25 Oct. 1854. Its length was 1051 feet, corresponding with the year; the width 425 feet, with an additional projection on the

Many persons admitted into it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs Fox and Henderson, Feb. 1851.

Reception of goods began in Feb., and the sale of season tickets.

The Exhibition opened by her majesty 1 May. The number of exhibitors exceeded 27,000, of whom 2021 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defied calculation.

The palace continued open above 23 weeks, altogether 144 days (1 May to 15 Oct.) within which time it was visited by 6,170,000 persons, averaging 42,536 a day, whose admission at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,107*l.* including season tickets, leaving a surplus, after payment of expenses, of about 150,000*l.* 1851.

The greatest number of visitors in one day was 209,760 (8 Oct.); and at one time (6 o'clock, 7 Oct.) there were 99,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals, as having been gathered together, it may be said, in one room.

The Exhibition was closed to the public 11 Oct. A memorial statue of the prince consort by Joseph Durham, placed in the gardens of the Royal Horticultural Society, uncovered in the presence of the prince and princess of Wales 10 June, 1853. See Crystal Palace.

EXHIBITION OF 1862 (INTERNATIONAL).

A proposal in 1858 for another great exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The scheme was revived in April 1860, when the prince consort engaged to guarantee 10,000*l.* if 240,000*l.* should be subscribed for by other persons.

A charter granted to the following commissioners: earl Granville, the marquess of Omandes, C. W. Dilke, jun., and Thomas Fairbairn 25 Feb. 1861. The guarantee fund amounted to 349,000*l.* in Nov. 1860, and to 453,300*l.* 25 April 1862. The building, erected at South Kensington, by Messrs. Kelly and Lucas, according to a design by capt. Fowke, made over to the commissioners, 12 Feb. 1862.

The Exhibition opened by the duke of Cambridge and royal commissioners 1 May.

The fine arts department included a noble collection of paintings and sculptures.

The jurors' award of medals was announced in the building 11 July.

The Exhibition was closed 1 Nov., when the total number of visitors (exclusive of attendants) had been 6,117,450.

north side, 236 feet long, by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building, the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about 29 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and 17 acres of glass in the roof, besides about 1500 vertical glazed columns.

* This was placed in the hands of commissioners, who have promoted the South Kensington museum, and in 1857 proposed the establishment of a science library. The main building occupied about 16 acres of ground, and the annexes 7 acres. The south front was 1190 feet long and 35 feet high, and over the east and west fronts rose the two domes 260 feet high. The interior was described by Mr. John G. Crace. The building was given up to Messrs. Kelly and Lucas on 31 Dec. 1862, the house of commons having refused to purchase it for 50,000*l.* 1 July, 1863; and the pulling down commenced on 6 July. The domes and other parts of the structure were purchased for erection in Alexandra-park, Muswell-hill, near London (north).

The Exhibition reopened on 2 Nov. for the sale of goods exhibited; it was finally closed 15 Nov. 1862.

The success of the Exhibition was much impaired by the disease of the prince consort, 24 Dec. 1861, and the breaking out of the civil war in the United States of America. The foreign exhibitors in 1851 were 6366; in 1861, 16,455. Exhibitors at London, in 1851, 14,000; at Paris, in 1855, 22,000; at London, in 1862, 29,000; at Paris, in 1867, 50,000.

EXTRACT OF MEAT, obtained by Liebig in 1847; a company was formed to manufacture it in South America in 1866.

EXTRADITION TREATIES. The extradition of criminals formed part of the Ashburton treaty (*see* *each sec.*), 9 Aug. 1842. Between Great Britain and France, 1843. In Dec. 1865, the French government gave notice of withdrawing from it in six months. It was renewed with modifications, for six months, 21 May, 1866. A new act was passed, 9 Aug. 1870; amended in 1873. Similar treaties have been concluded with other powers: with Austria, 3 Dec. 1873; Switzerland, 4 April, 1874; Holland, Aug. 1874; with Spain, 1878.

In 1866, M. Lamirand, charged with forgery and fraud against the Bank of France, fled to America. He was pursued, and was arrested at Montreal, on 1 Aug. under the governor-general's warrant. On 11 Aug. while his examination was still pending, he petitioned the governor-general not to warrant his surrender before he could apply for a writ of *habeas corpus*, and was assured on 17 Aug. that ample time should be allowed for this purpose. On 22 Aug. he was finally committed; and on 24 Aug. his petition for a writ of *habeas corpus* was presented to Judge Drummond, twenty-four hours' notice having been given to the representatives of the crown and the Bank of France. After arguments had been heard and the case adjourned until the following day, he was surreptitiously carried off the same night by train to Quebec, and hurried on board a steamer bound for Europe, by virtue of an extradition warrant, purporting to be signed by the governor-general at Ottawa, on 23 Aug. He was conveyed to France, and on 5 Dec. was tried, found guilty, and condemned to ten years' imprisonment. These circumstances led to much discussion, and the Canadian authorities were censured for irregularity and want of discretion. The discussion ended by Lamirand declining British intervention.

Dispute with United States respecting the surrender of Ezra D. Winslow, a fugitive, by Great Britain, which is refused unless it is agreed that the prisoner shall only be tried for the offence for which he has been committed (according to the treaty). According to the legend, the whole family, on behalf of the state, carried on the war against the Volentes. During a march to Rome, they were surprised, and all the grown-up males (306) were slain 477 B.C. From a boy detained at Rome, arose the noble Fabii of the following ages. The fables of Vishnu, Sermas, or Pilpay, are the most beautiful, if not the most ancient in the world. Sir William Jones, Professor Max Müller traced La Fontaine's fable of the Milkmaid to a very early Sanscrit collection. *Æsop's fables* (which see) supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320 who added other fables and appended a worthless life of *Æsop*. The fables of Phædrus in elegant Latin-*varius* (about A.D. 8), of La Fontaine (1700) and of Gay (1727) are justly celebrated.

The conflict was suppressed by Belisarius with difficulty, and the games were abolished for a time.

FERMENTATION, termed by Gay-Lussac one of the most mysterious processes in nature. He showed that in the process, 45 lbs. of sugar are resolved into 23 of alcohol and 22 of carbonic acid. His memoir appeared in 1810. In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere. For his researches he was awarded an annual pension of 120,000 francs in 1874.

line of works, 21 Dec. 1845; but night coming on, the operations were suspended till daylight, when their second line was stormed by general Gilbert, and 74 guns captured. The Sikhs advanced to retake their guns, but were repulsed with great loss, and retreated towards the Sutlej, 22 Dec.; and recrossed that river unmolested, 27 Dec. The British loss was reckoned at 2415.

FERRARA, formerly part of the exarchate of Ravenna, under the emperors of the East. It was subdued by the Lombards in the 8th century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1206 it fell into the hands of the house of Este (which see), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Cesar, became duke of Modena. The French under Massena took Ferrara in 1796; but it was restored to the pope in 1814. An Austrian garrison held it from 1849, it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860. The centenary of the university, founded in 1392, celebrated 18 April, 1892.

FERRARS' ARREST. In March, 1542, Mr. George Ferrars, a member of parliament, while in attendance on the house was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their sergeant to require his release, which was resisted, and an affray taking place, his name was broken. The house in a body repaired to the lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrars from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members from arrest. *Holinessed*.

FERROL (N.W. Spain). Upwards of 10,000 British landed near Ferrol under the command of sir James Pulteney, in Aug. 1800. They gained possession of the heights; but, despairing of success, on account of the strength of the works, sir James re-embarked his troops. His conduct was much condemned. Soult captured Ferrol, 27 Jan. 1809. An insurrection of about 1500 men in the arsenal here broke out, headed by brigadier Ponce and capt. Montoya, who raised the red flag, 11 Oct. They dispersed or surrendered when about to be attacked, 17 Oct. 1872.

The kingdom was divided into baronies, which were given on condition of the holders furnishing the king with men and money. The *va-salage*, limited by Henry VII., 1495, was abolished by statute, 1660. The feudal system was introduced into Scotland by Malcolm II. in 1006, and the hereditary jurisdictions were finally abolished in that kingdom, 1746-7. The feudal laws, established in France by Clovis I. about 486, were discontinued by Louis XI. in 1470.

FEUILLANTS, a religious order founded by Jean de la Barrière in 1577 at the abbey of Feuillant, near Toulouse, and settled in Paris in 1587. The duty imposed on imported flax, 1842, was repealed 1845. In 1851 *chevalier* Clausen patented a method of "cottoning" flax.

FLORENCE (*Florentia*), capital of Tuscany (which see), and from 1864 to 1871, of Italy, is said to have been founded by the soldiers of Sulla (80 B.C.), and enlarged by the Roman triumviri. In its palaces, universities, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy and *Accademia della Crusca* (established 1582) were instituted to enrich literature and improve the language of Tuscany; the latter was so named, because it rejects like *dran* all words not purely Tuscan. Both are now united under the former name. Population, 1890, 191,453.

FLORES, or Isle of Flowers (one of the *Azores*, which see), discovered by Vanderberg in 1439; and settled by the Portuguese in 1448.

FLORIDA, a peninsula, one of the southern states of North America, first discovered by Sebastian Cabot in 1497. It was visited by Juan Ponce de Leon, the Spanish navigator, April 4, 1512, in a voyage he had undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them! Florida was conquered by the Spaniards under Ferdinand de Soto in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in

1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1762; and again by gen. Oglethorpe in 1740; ceded to the British crown in 1763; taken by the Spaniards in 1781; and guaranteed to them in 1783. Capital, Tallahassee. Population in 1880, 269,413; 1890, 391,422.

FLORIN, a coin first made by the Florentines. A *florin* was issued by Edward III. which was current in England at the value of 6s. in 1337. *Camden*. This English coin was called *florin* after the Florentine coin, because the latter was of the best gold. *Ashe*. The florin of Germany is in value 2s. 4d.; that of Spain, 4s. 4d.; that of Palermo and Sicily, 2s. 6d.; that of Holland, 2s. *Adolph*. Silver florins (value 2s.) were issued in England in 1849.

FLOWERS. Many of our present common flowers were introduced into England from the reign of Henry VII. to that of Elizabeth (1485-1603). The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by Geo. Morris, in 1792. A very great number have been introduced from America, Australia, the Cape, &c., during the present century. Many of the dates in the following list, given in botanical works, are doubtful.

(11 May, N.S.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland. The king Louis XV. and the dauphin were present. The success of the British at the commencement is still quoted as an illustration of the extraordinary power of a column; and the advance of the Austrians during several hours at Marenco (14 June, 1800) was compared to it by Bonaparte. The allies lost 12,000 men, and the French nearly an equal number; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died) was carried about to all the posts in a litter, assuring his troops that the day would be their own.

FONTHILL ABBEY, Wiltshire, founded in 1796, the mansion of William Beckford, author of "Vathek" and son of Alderman Beckford. He died 2 May, 1844. Within this edifice (which alone cost 273,000*l.*) were collected costly articles of virtue and art, and the rarest works of the old masters. The sale of the abbey and its contents to Mr. Farquhar took place in 1822; 7,200 catalogues at a guinea each were sold in a few days. On 21 Dec. 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

The secretary for foreign affairs negotiates treaties, selects ambassadors, consuls, &c., for foreign countries, and grants passports. The new foreign office building in the Italian style (designed by Sir Gilbert Scott), was begun in 1864. A portion of it was inaugurated by Mr. Disraeli's reception, 25 March, and it was occupied by lord Stanley, 24 June, 1868. See *Administrations* under separate heads, and *Secretaries*.

FORKS were in use on the Continent in the 13th and 14th centuries. *Voltaire*. This is reasonably disputed. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in Italy, and adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," 1608. Two-pronged forks were made at Sheffield soon after. Three-pronged forks are more recent. Silver forks, previously only used by the highest classes, came into more general use in England about 1814.

Mr. G. Smith found a bronze fork with two prongs at Kouyunjik, Assyria, 1873

The Chinese threatened war if they did not quit within 90 days, 18 Aug. 1874. By British interposition the Japanese withdrew, an indemnity having been agreed on; treaty between Japan and China signed 31 Oct. 1874. Formosa flourished under the rule of Ting; removed in 1878. FORNOVO (Parma, Italy). Near here Charles VIII. of France defeated the Italians, 6 July, 1495.

FORSTER'S ACT, see *Education*, 1870.

FORT DU QUEEN, N. America. Near here general Braddock was surprised by a party of French and Indians, his troops routed and himself killed, 9 July, 1755. The fort was named *Fort Pitt* after its capture by Forbes, 24 Nov. 1758. It is now *Pittsburg*.

FORT ERIE (Upper Canada). This fortress was taken by the American general Browne, 3 June, 1814. After several conflicts it was evacuated by the Americans, 5 Nov. 1814.

FORT GEORGE, Inverness, N.W. Scotland, was erected in 1747, to restrain the Highlanders.—**FORT WILLIAM**, besieged by them in vain in 1746, is now in ruins.

FORTH, a great river of Scotland, rising in Ben Lomond, and entering the North Sea as an estuary, termed the Firth of Forth. The **FORTH AND CLYDE CANAL** was commenced 10 July, 1768, under the direction of Mr. Smeaton, and opened, 28 July, 1790. A communication was thus formed between the eastern and western seas on the coast of Scotland.

The **FORTH RAILWAY-BRIDGE** projected, and a raft launched in June, 1866
 Mr. (afterwards Sir T.) Bouch, of Edinburgh, was engaged to prepare plans for a suspension-bridge, 1878.
 The Forth bridge company accepted tenders from Wm. Arrol & Co. (1,550,000*l.*) for constructing bridge and railway, Oct. 1879; through Tay-bridge disaster, &c., the scheme was resumed and eventually abandoned by the company, 13 Jan. 1881.

The construction of the present **FORTH BRIDGE** was undertaken by the company supported by the North British, North Eastern, Great Northern, and Midland railway companies; the act was passed, June, 1882; engineers, Mr. John Fowler and Mr. Benjamin Baker, whose plans were based on the cantilever or bracket principle; Messrs. Wm. Arrol & Co. were the contractors. The rocky islet of Inchgarvie was of great importance in the construction of the bridge; the works began by building the foundations, Jan. 1883. The last bolt was driven, 6 Nov. 1889, the strength of the bridge was tested by the passage of nearly 2,000 tons, steamed half way across, 21 Jan.; and officially tested for the board of trade, 30 Feb. 1890.

The first train which crossed the entire bridge was driven by the marchioness of Tweeddale, carrying a distinguished company, in five minutes, 24 Jan. 1890. The prince of Wales after driving in the last rivet, in the presence of the duke of Edinburgh, the duke of Fife, Prince George of Wales, the marquis of Tweeddale, the earl of Rosebery, and other distinguished visitors, including M. Eiffel, and other eminent engineers, said "Ladies and gentlemen, I now declare the Forth bridge open," 1.30 P.M. 4 March, 1890.

The ceremony was followed by a banquet in a hall adjoining the works.
 The length of the bridge (from North to South Queensferry), with the approaching viaducts, is one mile 1,007 yards; the highest part of the bridge is 361 feet; the clear roadway under the centre of the bridge is 132 feet above high water. The greatest number of men employed at one time was 5,000. 56 lives were lost during the construction, in spite of great precautions.

Estimated cost 1,600,000*l.*, actual cost about 2,500,000*l.*
 Mr. Matthew William Thompson, chairman of the Forth bridge and Midland railway company, and Mr. John Fowler, were created baronets, Mr. Benjamin Baker, was made K.C.M.G., and Mr. William Arrol was knighted, 1890.

The bridge was opened for the ordinary railway trains, 2 June, 1890.
 The bridge slowly crossed by the queen coming south, 29 June, 1891.

by the fall of something through high wind, 3 persons killed, no hurt else.
The bridge firmly withstood a violent gale, 20 Jan. 1890.

FORTIFICATION. The Phenicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Dürer wrote on fortification in 1527; and great improvements were made by Vauban, who fortified many places in France; he died 1707. The new fortifications of Paris were completed in 1846; see *Paris*. In Aug. 1860, the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway, and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment; the estimated expense being 9,500,000*l.* A committee to investigate our fortifications was appointed, 16 April, 1868.

FORTIS, a powerful explosive invented in Belgium about 1887, said to be well adapted for mining purposes. In May, 1890, it was manufactured by the Fortis Powder and Explosives Company. Successful experiments at Liège, 8 Sept. 1891.

FORTUNE-TELLING is traced to the early astrologers, by whom the planets Jupiter and Venus were supposed to betoken happiness. The Sibyls were women said to be inspired by Heaven; see *Sibyls* and *Cippas*. In England the laws against fortune-telling were at one time very severe. A declaration was published in France, 11 Jan. 1680, of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. *Nécessité*. Fortune-tellers, although liable by the acts of 1743 and 1824 to be imprisoned as rogues and vagabonds, still exist in England.

FORTY-SHILLING FREEHOLDERS, see *Freeholders*.

FORUM, at Rome, originally a market-place, became about 472 B.C. the place of assembly of the people in their tribes (the Comitia), and was gradually adorned with temples and public buildings.—Near **FORUM TRAEVURUM**, in Mesia, the Romans were defeated by the Goths, Nov. 251. After a struggle in the morning, the emperor Decius and his son were slain and their bodies not recovered. See *Rome*, 1885.

FOSSALTA, near Bologna, central Italy. Here Enzo or Enrico, titular king of Sardinia, natural son of the emperor Frederick II., was deposed and made prisoner, 26 May, 1249, and retained. He was kept in honourable captivity till his death, 14 March, 1272.

FOTHERINGHAY CASTLE (Northamptonshire), built about 1490. Here Richard III. of England was born in 1459; and here Mary queen of Scots was tried, 11-14 Oct. 1566, and beheaded, 8 Feb. 1567. It was demolished by her son, James I. of England, in 1604.

FOURHARD, near Dundalk, N. Ireland. John Stewart, brother of Robert Bruce, after fleeing Ireland in 1324, was defeated by Sir John

Burningham, 3 Oct. 1348. Bruce was killed by Roger de Malsep, a baron of Dundalk.

FOUNDLING HOSPITALS are ancient. A species of foundling hospital was set up at Milan in 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be the "children of the state."

No foundling hospital in England when Addison wrote in 1713.

London foundling hospital, projected by Thomas Coram, a sea-captain, incorporated, Oct. 1739; opened. 2 June, 1756

Haadell gave an organ; opened it. 2 May, 1750
It supports about 500 infant children; Coram's statue was put up in 1856

Foundling hospital in Dublin instituted in 1704. Owing to great mortality, and from moral considerations, the internal department was closed by order of government. 21 March, 1835
Foundling hospital at Moscow, founded by Catherine II. in 1775; about 12,000 children are received annually

FOUNTAIN COLLECTION of Renaissance works, Faience, Limoges, Raffaella, and Pailsey enamelled ware, &c. (unequalled); and also a fine collection of coins, medals, carved ivory work, &c., formed by sir Andrew Fountaine, in the reigns of Anne and George I.; placed in Norfolk Hall, Norfolk, about 1730, sold by Christie and Mansel for 91,112*l.*, 16-19 June, 1884; by the sale of ancient drawings, on 11 July, the sum was raised to 96,278*l.* Sir Andrew Fountaine died in 1873.

FOUNTAINS. The fountain of Hero of Alexandria was invented about 150 A.C. Among the remarkable fountains at Rome are the Fontana di Trevi, constructed for pope Clement XII. in 1735; the Fontana Paolina, erected for pope Paul V. in 1612; and Fontana dell' Acqua Felice, called also the Fountain of Moesa. The fountains in the palace gardens at Versailles, made for Louis XIV. and the Grand Jet d'Eau, at St. Cloud, are exceedingly beautiful. There are above 100 public fountains in Paris, the most striking being the Château d'Eau on the Boulevard St. Martin (by Girard, 1811) and that at the Palais Royal. London is not remarkable for fountains; the largest are in Trafalgar-square, constructed in 1845, after designs by sir Charles Barry. There are beautiful fountains at Chatsworth, in Derbyshire, the seat of the duke of Devonshire. The magnificent fountains at the Crystal Palace, Sydenham, were first publicly exhibited on 18 June, 1856, in the presence of the queen and 20,000 spectators.

The fountain at Park-lane, London, W., the gift of Mrs. Brown, was inaugurated and uncovered, 9 July, 1875. It has statues of Chaucer, Shakespeare, and Milton, the work of Mr. Thomas Croft, and cost 3000*l.*

FOURIERISM, a social system devised by M. Charles Fourier (who died in 1837). The Phalanstery (from *phalange*), an association of 400 families living in one edifice, was to be so arranged as to give the highest amount of happiness at the lowest cost. The system failed; indeed, it is said, by the smallness of the scale on which it was tried.

See *Phalanstery*, a somewhat similar system, established by M. Godin, a manufacturer of stoves &c., at Reims, N. France, was reported successful in Jan. 1866.

"**FOUR MASTERS**" a name given to Michael, Conary, and Cunnery O'Gerry, and Frances O'Mulvery, who compiled from original documents the annals of Ireland from 2242 B.C. to

FRANCE, ISLE OF, *see* Mauritius.

FRANCHE COMTE, in upper Burgundy, E. France, was conquered by Julius Caesar, about 45 B.C.; by the Burgundians, early in the fifth century, A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48), and restored to him. By marriage with the count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; restored by the treaty of Aix la Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

FRANCHISE. A privilege or exemption from ordinary jurisdiction, and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as formerly in England: *see* Sanctuary. In 1420, the elective FRANCHISE for counties was restricted to persons having at least 400s. a year in land, and resident; for recent changes, *see* Reform.

FRANCIS' ASSAULT ON THE QUEEN. John Francis, a youth, fired a pistol at queen Victoria as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, 30 May, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, 17 June following, but was transported for life. He was liberated on ticket-of-leave in 1867.

FRANCISCANS. Grey or Minor Friars, an order founded by St. Francis d'Assisi, about 1209. Their rules were chastity, poverty, obedience, and very austere regimen. About 1220 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses, 1536-38.

FRANCISCO, SAN, the largest city in California, *which see*. The centenary of the foundation of the city by Fr. Juan de Morúa, 8 Oct. 1776, was celebrated in 1876. The city suffered by earthquakes in 1868 and 1872. Population, 1880, 233,959; 1890, 298,997.

FRANCONIA, or FRANKENLAND (on the Main), formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 8 Nov. 911; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

FRANCO-PRUSSIAN WAR originated in the emperor of the French's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with

Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfurt, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1. The emperor recognises the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxembourg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty was published in the *Times*, 25 July, 1870. After some discussion, its authenticity was admitted; count Bismarck asserting that it emanated entirely from the French emperor, and that the scheme had never been seriously entertained by himself.]

In March, 1869, a dispute arose through the French emperor's proposal for purchasing Luxembourg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved German Confederation; and the affair was only settled by a conference of the representatives of the great powers in London, at which the perfect neutrality of Luxembourg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications. 7-11 May, 1869

Prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Romania), consented to become a candidate for the throne of Spain, 4 July, 1870

This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, prince Leopold, with the consent of his sovereign, declined the proffered crown. 12 July.

The submission did not satisfy the French government and nation, and the demand for a guarantee against the repetition of such an acquiescence irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister. 13 July.

Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister. 15 July.

War was announced by the emperor, with the hearty consent of the great majority of the chambers. The left-republican party opposed the war; M. Thiers and a few others only protested against it as premature. 15 July.

3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.

4. The left, under the crown prince of Prussia about 160,000.

Commander-in-chief, king William second, general Helmuth Karl Bernhard von Moltke (born 26 Oct, 1800, died 24 April, 1891).

The North German army, at the beginning of August consisted, firstly of 500,000 line with 1,200 guns and 53,000 cavalry secondly of 180,000 reserve, with 234 guns and 18,000 cavalry and thirdly, of 200,000 landwehr or militia, with 10,000 cavalry making a grand total of 880,000 men with 1,580 mobilised guns and 103,000 horses.

To these must be added, firstly the Bavarians 600,000 line with 120 guns and 14,800 horses—25,000 reserve with 2,400 horses and 22,000 landwehr secondly the Wurtembergers—22,000 line with 54 guns and 6,500 horses 6,500 reserve and 16,000 landwehr and thirdly the Hessians—16,000 line with 54 guns, 4,000 reserve, and 9,000 landwehr.

All the German troops taken together as under arms at present, 1,124,000 men. Aug 1870.

Four weeks previous, on the peace footing they numbered only 600,000.

The French and Germans in this war were considered to be equally brave and efficient but the French generals appear to have acted greatly upon impulse. The Germans seem to have been marvellously guided by a well matured plan their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Sedan back to Sedan Moltke appears to have left nothing to chance and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: 1. the enormous superiority of the Germans in regard to numbers 2. the absolute unity of their command and concert of operation 3. their superior mechanism in equipment and supplies 4. the superior military general education and discipline of the soldiers 5. superior education of the officers, and the dash and intelligence of the cavalry. *Quarterly Review*. FRANKLIN, the English freeholder in the middle ages, see "the Franklin's Tale" in Chaucer's Canterbury Tales. (written about 1364)

FRANKLIN, SEARCH FOR Sir John Franklin, with captains Crozier and Fitzjames, in H. M. ships *Erebus* and *Terror* (sailing in all 138 persons), sailed on his third Arctic expedition of discovery and survey, from Greenhithe, on 24 May, 1845, see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from England and elsewhere in search of them, and coals, provisions, clothing, and other necessities, were deposited in various places in the Arctic seas by our own and by the American government, by Lady Franklin, and numerous private persons. The *Triadelle*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen Sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her Majesty's government, on 7 March, 1850, offered a reward of 20,000£ to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny

" The *Investigator*, and Sir E. Belcher's squadron were made, but no traces of Franklin's party had

been met with. *Laurent Bellet* was unfortunately drowned in August, while voluntarily converting despatches for *sur E. Belcher*. *Capt. M. Clure* had left the *Harold* (10) at Cape Lombard, 31 July, 1850. On 8 Oct the ship was frozen in and so continued for nine months. On 26 Oct 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N P - N W passage. In Sept 1851, the ship was again fixed in ice, and so remained till her return and a party from *Capt. Kellett's* ship the *Reedley* (15), still in with them in April 1852. The position of the *Enterprise* (14) was still unknown.

A monument to *Bellet's* memory was erected at Greenwich. His Journal was published in 1854. Dr Rae in the spring of 1853 again proceeded towards the magnetic pole and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to *sur J. Franklin* and his party—namely *sur John's* star or order, a set of a watch, silver pens and forks with crowns, &c. He also printed the statement of the natives that they had met with a party of white men about four winters previous and had sold them a seal and that four months later in the same season they had found the bodies of thirty men (some buried) who had evidently perished by starvation the place appears from the description, to have been in the neighbourhood of the Great Fish river of York. Dr Rae arrived in England on 22 Oct 1854, with the relics, which have since been deposited in Greenwich hospital. He and his companions were awarded 5000 l. for their discovery.

19 The *Phoenix* (North Star) and *Julia* of under the command of *Capt. Inglefield* sailed in May and returned in Oct 1854.

Sur E. Belcher (No. 21) after much deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command, and *Capt. Kellett* gave similar orders to *Capt. M. Clure* of the *Forestier*. The vessels had been abandoned 15 May when the crews of the *Phoenix* and *Julia* (under *Capt. Inglefield*) were rescued (16). On their return to England all the crews were tried by court martial and honourably acquitted. 27 Oct.

Capt. Collinson's fate was long uncertain and another expedition was in contemplation when intelligence came in Feb 1855 that he had met the *Battleship* (16) at Fort Clive on 22 Jan. 1854 and had sailed immediately in hopes of getting up with *Capt. Maguire* in the *Plotter* (2), which had sailed two days previously. *Capt. Collinson* having failed in getting through the ice in 1850 with *Capt. M. Clure* returned to Hong Kong to winter. In 1851 he passed through Prince of Wales's Straits and remained in the Arctic region without obtaining any intelligence of *Franklin* till July 1854 when being off a more relaxed from the ice he sailed for Fort Clarence where he arrived 15 above mentioned. Captains *Collinson* and *Maguire* were in England in May 1855.

20 The third American expedition in search of Dr Kane in the *Advance* consisted of the *Reedley* and the steamer *Arctis* the barque *Congo*, and another vessel under the command of *lieut. H. J. Hartenstam* accompanied by a brother of Dr Kane as surgeon. 21 May. 1853. On 27 May 1853, Dr Kane and his party quitted the *Advance* and journeyed over the ice 1500

* *Capt. Kellett's* ship the *Reedley* was found adrift 1000 miles distant from where she was left by a Mr *George Henry*, commanding an American whaler who brought her to New York. The British government having abandoned their claim on the vessel it was bought in order of the American congress thoroughly repaired and equipped, and entrusted to *Capt. H. J. Hartenstam*, to be presented to Queen Victoria. It arrived at Southampton 25 Dec 1856 was visited by her majesty on the 16th, and formally surrendered on the 30th. When the ship was broken up a desk was made of the wood, and presented by Queen Victoria to the presidents of the United States, 29 Nov 1856.

miss, to the Danish settlement on their way home in a Danish vessel, they fell in with *lieut. Hartenstam*, 28 Sept. and arrived with him at New York, 1st Oct 1855. Dr Kane visited England in 1856 he died in 1857.

The Hudson's Bay Company under advice of Dr Rae and *sur G. Back* went out on an overland expedition, June 1855 which returned Sept. following. Some more remains of *Franklin's* party were discovered 1855.

21 The 18th British expedition (equipped by lady *Franklin* and her friends) the government having declined to fund it out another—the *For* was a steamer, under *Capt. (since an) P. L. M. Minto*, R.N. (see No. 11) sailed from Aberdeen 2 July, 1857 returned 22 Sept 1859.

On 6 May, 1859, *lieut. Hobson* found at Point Victory near Cape Victoria besides a cairn, a tin case, containing a paper signed 22 April, 1848, by *Capt. Fitzgibbon* which certified that the ships *Trebus* and *Terror* on 22 Sept 1846 were lost in lat 70° 30' N and long 96° 23' W that *sur John Franklin* died 22 June, 1847 and that the ships were deserted 22 April, 1847. *Capt. M. Clure* continued the search and discovered skeletons and other relics. His Journal was published in Dec 1859 and on 28 May 1860 gold medals were given to him and to lady *Franklin* by the Royal Geographical Society.

Mr Hall the acting explorer reported in Aug 1864, circumstances that led him to hope that *Capt. Crozier* and others were surviving. A natural monument by *Point*, set up in Waterloopleace, was inaugurated, 15 Nov 1866. It is inscribed to *FRANKLIN* the great navigator and his brave companions who sacrificed their lives in completing the discovery of the north west passage 4 Oct 1848.

Sur John Franklin discovered the north-west passage by sailing down *Pel* and *Victoria* Straits, now named *Franklin* Straits. "In his search expedition under *lieut. FREDERICKSHALD (Norway). Charles XII. of Sweden was killed by a cannon-shot before the walls, while examining the works. His hand was on his sword, and a prayer-book in his pocket, 11 Dec. 1718.

FREE CHURCH OF ENGLAND. An Episcopal Church founded in 1844, and enrolled in her majesty's High Court of Chancery in 1863.

The bishops are Benjamin Price (bishop primus), who resides at Lifford, Frederick Newman, at Ashford, Kent, and a missionary bishop, Henry Otton Meyers, at Honolulu. This church grew out of the Oxford tractarian movement of 1830. The first church was planted at Bridgetown, Devon, by the rev. James Shore, M.A., curate of the parish, it was built by the Duke of Somerset, and opened in 1844. Two other churches were established in the same year—one at Exeter, and the other at Lifford. But it was not till 1849 that much progress was made, when an impetus was given to the movement by the late bishop of Exeter (Palgrave) in succession of Mr. Shore, for preaching in his diocese without his licence. The work spread, and the organization was enrolled under a deed poll as an 'Episcopal Church.' But as 'Consecration' could not be obtained a bishop president was elected till 1896, when the accession of the right rev. bishop Lummis from the 'Protestant Episcopal Church of America' (the first bishops of which church were consecrated by the archbishop of Canterbury at Lambeth Palace, in 1793), afforded an opportunity, which was embraced, of obtaining episcopal consecration for the bishops of the Free Church of England in the Canterbury line of episcopal succession.

The services of the F. C. E. are conducted exactly as those of the evangelical section of the national church, excepting the omission of some words in the offices which express doctrines opposed to the Protestant Reformation.

FREE CHURCH OF SCOTLAND was formed by an act of secession of nearly half the body from the national church of Scotland, headed by Dr. Thomas Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings, see *Patronage*. The Free Church claims for the parishes the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719s. 14s. 3d. had been subscribed. In 1853 there were 850 congregations; in 1873, 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638s. from which was paid the sum of 138s. each to 700 ministers.

The Rev. Mr. Knight, censured for opinions respecting *Wesley*, seceded 22 Oct. 1873. The Reformed Presbyterian Church (see *Consecration*), joined the Free Church 24 May, 1876. Professor Robertson Smith, generally censured for his article 'Bible, &c.' in the 'Encyclopædia Britannica,' 1875, after long consideration by the assembly, admonished only 27 May, 1880. Professor Robertson Smith expelled from his professorship, but to retain salary, by the general assembly (394—232) 26 May, 1881.

Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV, 1828; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege, passed 13 April, 1829; Reform acts, 1832, 1867, 1868. FREE HOSPITAL, ROYAL. Gray's Inn-road, founded in 1828 by Dr. William Marden (born Aug. 1790), who actively superintended it till his death, 16 Jan. 1867. In 1851, he founded the Cancer Hospital (Brompton), which see. Patients admitted without letters. In 1878 Mr. Wm. Birks Rhodes, 'the Houslow miser,' bequeathed to the hospital about 39,000l.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple, and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 9th century. A modern speculative cosmopolitan freemasonry with some analogies has essential differences from some early secret societies, and is not earlier than the seventeenth century. In 1717, the grand lodge of England was established, that of Ireland in 1730, and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738, again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen-street, London, built 1771, rebuilt, and consecrated 14 April, 1860. Partly burnt 3 May, 1883. The charity instituted, 1788. The duke of Sussex and the earl of Zetland were each twenty-eight years grand-master of England. Earl de Grey, afterwards marquis of Ripon, was installed grand-master of the English freemasons in rooms at the earl of Zetland, 14 May, 1870. The marquis (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. The prince of Wales was installed at Edinburgh as patron of the freemasons of Scotland, 12 Oct. 1870. As grand-master past and present of the mark masons, London, 8 Dec. 1863. FREE TRADE principles, advocated by Adam Smith in his 'Wealth of Nations' (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who was very instrumental in passing these measures, and termed 'Apostle of Free Trade,' died 2 April, 1865. Since 1830 the exports have been tripled. See *French Treaty*. An agitation for free trade has begun in the United States. A reform league was formed at Boston, 20 April, 1869, and the movement became active in New York in Nov. and has since continued. A free trade budget was brought in by the ministry in Sydney in 1873. A new free-trade league was inaugurated in London in Dec 1873, and one at Melbourne, Australia, Sept 1876. Free trade warmly advocated in New South Wales, supported in New Zealand, opposed in Canada and in Victoria, Australia 1877-80. Much agitation against free-trade in 1880-2. FRENCH EXHIBITION, at Earl's Court, West Brompton, London, W., was opened by the lord mayor Isaac, 17 May, closed 1 Nov 1890.

The exhibition principally consisted of objects which appeared in the Universal Exhibition at Paris, 1889. It included works of art, manufactures, books, panoramas of parts of Paris, and a hypodrome. In the 'Wild East grounds' appeared Algerian Arabs, with their families and steeds, a chariot drawn by three African lions was driven by their owner round the arena.

FRENCH LANGUAGE is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romance dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The dialect of the Isle of France became predominant in the 12th century. The French language as written by Froissart assimilates more to the modern French and its development was almost completed when the *Academie Française* (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I, 1066. Law pleadings were changed from French to English in the reign of Edward III, 1362. *Stow*.

FRENCHTOWN (Canada) was taken from the British by the American general Winchester, 22 Jan 1813, during the second war with the United States of America. It was retaken by the British forces, under general Proctor, 24 Jan, and the American commander and his troops were made prisoners.

FRENCH TREATY, the term given to the treaty of commerce between Great Britain and France, signed 23 Jan 1860 at Paris, by Lord Cowley and Richard Cobden and by the ministers MM Baroche and Dulaury. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in North America (1861-5). The French assembly determined that on 15 March, 1871, this treaty should cease in 12 months from that date. A fresh treaty was signed at Paris 29 Jan 1873. Free trade was somewhat restricted, but the new French navigation law was relaxed. Negotiations for a new treaty began in London, 26 May, 1881. See *France*, 1881-2.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt, Italy, and Lugland, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated. See *Stereochromy*.

FRIEDLAND (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon, on 14 June, 1807. The allies lost eighty pieces of cannon and about 18,000 men, the French about 10,000 men. The peace of Tilsit followed, by which Prussia was obliged to surrender nearly half her dominions.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1643, visited by Wallis, who called them Keppel Isles, 1767, and by captain Cook, who named them on account of the friendly disposition of the natives, 1773. Subsequent voyagers describe them as very friendly.

FRIENDLY SOCIETIES, which originated in the clubs of the militious classes were subjected to slight control in 1703, and have been regulated by various enactments. Other acts were passed in 1855, 1858, and 1860. Important ones, 11 Aug 1875, 24 July 1876, 1882 and 1887. In London, the Ditch Friendly Society dates from 1687, the Norman 1703, the Lincolns, 1708.

An example of a friendly society and mutual insurance was given in 1811, by the Friendly Society of the City of London, which was the first of the kind. It had 8 chiefs, funded in 1813 and broken up in 1886. Members, 225,000; capital, about 16,000,000; returned July 1891.

It was annexed to Holland by Bonaparte, in 1806, to the French empire, 1810 and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect. — **FRIESLAND**, 1727, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (or *Cheval de Frise*, a Friesland Horse) is derived from Friesland, where it was invented.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Agueda with 42,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessieres with a body of the Imperial guard, and on 5 May, made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

GARDENING. The first garden, Eden, planted by God. Gen ii. The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophet, and Christ's agony took place in a garden. Xenophon describes the garden at Sardis, and Lucianus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50), and Pliny's Lucullan villa is circumstantially described (about A.D. 100). The Romans introduced painting into Britain, the religious orders maintained it, and its cultivation increased in the 16th century, when many Flemish came here to surpass the pictures of Philip II. Miller's dictionary was published in 1724, the Horticultural Society (which see) was established in 1804. GARTER, ORDER OF THE. Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round table, and proclaimed a solemn tilting. On New Year's day 1343-4, he published letters of protection for the said coming and returning of such foreign knights as would venture their reputation at the jousts and tournaments about to be held. These took place 23rd April, 1344. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having saved, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1346. See below.

Edward III. gave the garter pre-eminence among the ensigns of the order. It is of blue velvet bordered with gold, with the inscription in old French—*Hous au qui s'ent y passe* (Evil be to him who evil thinks). The knights are installed at Windsor and sived *Equeles equeles Persepolis*, knights of the golden garter. *Bestard*. The order until king Edward VI. time was called the order of St George the patron saint of England. GAS, in chemistry, a permanently elastic aeriform fluid, see *Oxygen*, *Hydrogen*, *Nitrogen*, *Chlorine*, &c.

It is stated that Monge and Clouet condensed sulphurous acid before 1800 and Northmore liquefied chlorine 1805

Faraday determined a gas to be the vapour of a volatile liquid existing at a temperature considerably above the boiling point of the liquid and that the condensing points of different gases are nearly the boiling points of the liquids producing them. He by pressure condensed chlorine gas into a liquid 1823

Other gases liquefied by intense cold and great pressure (as indicated by Faraday), oxygen by

Colliet, at Paris, 2 Dec, and independently by
Bachelin at Geneva, 28 Dec.
Nitrogen, hydrogen and atmospheric air, liquefied

The pedigree of Christ is given in *Matth.* i. and *Luke* iii. Many books on the subject have been published in all European countries; one at Magdeburg, *Theatrum Genealogicum*, by Henningus, in 1598. Anderson, *Royal Genealogies*, London, 1732. Sims' *Manual for the Genealogist*, &c., 1888, will be found a useful guide. The works of Collins (1736 *et seq.*), Edmondson (1764-84), and Nicolas (1825 and 1857), on the British peerage, are highly esteemed. The Genealogical society, London, established in 1853. GENEVA CONVENTION, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Gènevoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilized powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference. The International Society (termed "the Red Cross Society"), established in consequence of these proceedings, was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. See *Aid to Sick and Wounded*. Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.—Dec., 1870. At a meeting in London, 6 Aug., 1872, M. Dunant proposed a plan for the uniform treatment of prisoners of war.

GENS-D'ARMES were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organized as a royal corps by Charles VII. about 1441; the younger sons of Scottish nobles being usually the captains. The name *gens-d'armes* was afterwards given to the police; but becoming obnoxious, was changed to "municipal guard" in 1830.

GENTLEMAN from *gentilis*, of a *gens*, a race or clan). The Gauls observing that during the empire of the Romans, the *senatus* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *seniores* and *gentilissimos*. This distinction of gentleness was much in use in England, and was given to the well-descended about 1430. *Sidney*. Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or peers. William IV. commanded that it should be called his majesty's honourable corps of gentlemen-at-arms, 7 March, 1834. *Cuningh.*

The 7th International Geodetic congress met at Rome 15-24 Oct. 1887. It recommended the international unit of the hour, and longitudes with Greenwich. An international conference of 40 delegates met at Washington, 1 Oct., president Adm. Rogers, agree to recommend Greenwich as prime meridian; France and Brazil abstain. 13 Oct. 1884
 The terms of a universal day were also agreed upon 1 Nov. "

International geodetic conference met at Berlin 27 Oct. 1886; met at Salzburg, 17 Sept. 1888; at Paris 3 Oct. 1889

GEOGRAPHY. The first geographical records are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archi-

pelago, and site of Troy. *Iliad*. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 A.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240. *Longlet*. Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society* of London was established in 1830; that of Paris in 1821. The Geographical Society's exhibition opened by the marquis of Lorne, 9 Dec. 1885. The society issued a circular for promoting a more uniform spelling of geographical names, Dec. 1891. —See *Africa*, *North West Passage*, &c.

GEOLOGY, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Aristotle, Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Menavi wrote concerning the fossils in the pope's museum. Cosalpino Majoli, and others (1597). Strada (1606). Valla (1670). Quirini (1676). Plinck and Lamer (1678). Leibnitz (1760) recorded observations, and put forth theories on the various changes in the crust of the earth

Hooke (1686) in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than cities in ruins, and though difficult, it would not be impossible to trace a chronology out of them."

Burnet's, "Theory of the Earth" appeared in 1690. Whiston's in 1696

Buffon's geological views (1749) were renounced by the Sorbonne in 1787, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow laborers and successors were Gesner (1758), Mitchell (1760), Bayle (1762-73), Pallas and Saussure (1793-1800).

Werner (1773) ascribed all rocks to an aqueous origin, and even denied the existence of volcanoes in primitive

geological times, and had many followers, Kirwan, De Loo, &c.—Hutton (1785) supported by Playfair (1802) warmly opposed Warron's views, and asserted that the principal changes in the earth's crust are due to the agency of fire. The rival parties were hence termed Neptunists and Plutonists.

Mr A. Geikie and other eminent modern geologists ascribed the origin of the landscape features of the earth chiefly to denudation by the action of water 1865 & 69.

William Smith, the father of British geology (who had walked over a large part of England) drew up a tabular View of British Strata, in 1799, and published it and his Geological Map of England and Wales, 1815-16, died 26 Aug. 1839. The Rev Adam Sedgwick, another father died 27 Jan. 1813, aged 87. Sir Charles Lyell, died 22 Feb. 1873.

In 1803 the Royal Institution possessed the best geological collection in London collected by H. Davy, C. Hatchett, and others; the proposal of Sir John B. Aikin, Sir Abraham Hume, and the right hon. C. F. Grey, to send the government in establishing a school of mines there in 1804, was declined, 13 Nov. 1807.

In 1807 the Geological Society of London was established. By collecting a great mass of new facts, it greatly tended to check the disposition to theories and led to the introduction of views midway between those of Werner and Hutton.

The Geological Society of Dublin 1839, of Edinburgh, 1841, of France 1830, of Germany, 1848.

In 1833 Mr (afterwards Sir Henry) De la Beche suggested the establishment of the present Museum of Geology which began at Craig's Court and which was removed to its present position on Jemmy's Street. To him are due the valuable geological maps formed on the Ordnance survey. The building was erected by Mr Parnethorne and finally opened by the prince on 14 May 1837. Attached to the Museum are the Mining Records Office, lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died 13 April 1865, succeeded by Sir Rodolph Murchison, who died 22 Oct. 1871, succeeded in professorship after wards Sir A. R. Murray, 1872, died 9 Dec. 1891, by Archibald Geikie 1881, and 1891.

A great many maps have been published with memoirs. The survey of England on the scale of an inch to a mile was completed in Jan. 1884. Some maps have been made on a scale of six inches to a mile. The surveys of Scotland and Ireland are in progress (1893).

A mineral map of India was established at Calcutta by the E. I. Company in 1840.

International geological congress originated at the Buffalo meeting of the American association for the advancement of science in 1876, met at Paris 1878, Bologna, 26 Sept. 1881, Berlin 29 Sept. 1885, London, 27 Sept. 1888.

The English standard works on geology at the present time are those of Leveillé, Murchison, Phillips, De la Beche, Murray, Ansted, and Geikie.

The strata composing the earth's crust may be divided into two great classes.

I Those generally attributed to the agency of water.

II To the action of fire which may be subdivided as follows.

Aqueous formations stratified, rarely crystalline — sedimentary or fossiliferous rocks.

Metamorphic or non-fossiliferous igneous formations, unstratified, crystalline —

Volcanic, as basalt, &c.
Plutonic, as granite, &c.

Fossiliferous, or sedimentary, rocks are divided into three great series —

The Palaeozoic (most ancient forms of life) or Primary.
The Mesozoic (middle life period), or Secondary.
The Neozoic or Cænozoic (more recent forms of life), or Tertiary.

GEOMETRY, so termed from its original application to measuring the earth, is ascribed to the Egyptians, the annual inundations of the Nile having given rise to it by carrying away the landmarks and boundaries.

Thales introduced geometry into Greece about 600 B.C. Pythagoras cultivated the science about 580. The doctrine of curves originally attracted the attention of geometers from the conic sections, which were introduced by Plato, about 390 B.C. Euclid's *Elements* compiled about 300 B.C. Archimedes, a discoverer in geometry, 287-212 B.C. The conchoid curve invented by Nicomachus 220 B.C. Ptolemy, the astronomer and geographer, 150 B.C. Geometry taught in Europe in the 13th century. It works in unison with the British American Association which was formed to promote civilisation in Ireland and to bring the Irish-American, a weekly newspaper Dec. 1887.

GEORGES' CONSPIRACY, in France General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII. Feb 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*see* *Lucho* &c.).

GEORGIA, the ancient Iberia, now a province of Russia, near the Caucasus, submitted to Alexander about 337 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereign Christian dynasty was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs, by the Turkish sultan Alp-Arslan, 1068, and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler Heraclius, surrendered his territories to the czar in 1799, and in 1802 Georgia was declared to be a Russian province. — **GEORGIA, IN NORTH AMERICA**, was settled by gen Oglethorpe, in 1732. Separating from the congress of America, it surrendered to the British, Dec. 1778, and its possession was of vast

importance to the royalists in the war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home, the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state Jan 1868. A ridiculous negro insurrection suppressed Aug 1875. GERM THEORY OF DISEASE supposes "that many diseases are due to the presence and propagation in the animal system of minute organisms [termed *microbes*] having no part or share in its normal economy." Macleagan, 1876. See *Animalcules* and *Bacteria*. Dr Cohn, of Breslau, whose work was published in 1872, classifies bacteria as—I Spherical or micrococci. II Micro-bacteria, or bacteria proper (rod-shaped). III Desmo-bacteria, the same but longer, IV Spiro-bacteria, spiral-shaped or curly. Translation of his work, 1881.

The doctrine of causing an animal to be held in the middle ages and put forth in the 16th century, but contagious organisms were not discovered till the 19th by professor Pasteur and others, 1875 &c. At the British Association, 14 Sept 1870 professor Huxley expressed his concurrence with the "germ theory" see under *Diseases* and *Infection* 1882. Dr E Klein in Feb 1885 reported his investigations on the relation of bacteria to cholera. At the Royal Institution on May 27 1887 he demonstrated the propagation of scarlet fever by microbes in cow's milk.

Numerous specimens of these germs were exhibited at the Royal Institution in illustration of professor Endall's discourse on "Living contagia" 16 Jan 1885.

GERMAN LANGUAGE has two great branches: *hoch* and *niedrig*, high and low German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the statistical epic in low German, "Reinhold Fuchs," appeared in 1498, see *Reynard*.

GERMANY (*Goi mania, Alemania*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them, and although that people conquered some parts of the country, they were expelled before the close of the 3d century. In the 5th century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the 6th century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec 800. A list of his successors is given in another page. At the extinction of his family, the empire became elective, and was subsequently obtained by members of the house of Hapsburg (from 1437 till 1806). Germany was divided into circles 1501-12. The confederation of the Rhine was formed 12 July, 1806, the Germanic confederation, 8 June 1815, and the North German confederation, 18 Aug 1866, the treaty ratified, 8 Sept 1866. GLOBE. The globular form of the earth, the five zines, some of the principal circles of the sphere, the aspects of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round, that there might be antipodes on the opposite part of the globe, that Venus was the morning and evening star, that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the sphere of the moon, the sun, Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars. About 500 B.C.—Aristarchus of Samos maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd, that the philosopher nearly lost his life, 280 B.C.; see *On common notions*.

To determine the figure of the earth a degree of latitude has been measured in different parts of the world by Bouguer and La Condamine in Peru and by Maupertuis and others in Lapland 1735. Estimated density 5.6 that of water. Weight, 6,000,000,000,000,000,000,000 tons.—Ptolemy 1875. France and Spain measured by Méchain, Delambre, Biot, and Arago, between 1792 and 1822. Measurements made in India by Col (afterwards sir George) Everest published in 1830. Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851 and to determine its density by Maskelyne, Baily and

others and in 1826, 1828 and 1834, by Mr (aft. sir) G B Airy the astronomer royal.

ARMY OF GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 308 B.C. and that Archimedes constructed a planetarium about 215 B.C. The globe of Gottorp, a cone of silver, elev 9 feet in diameter, containing a table and seats for twelve persons and the inside representing the visible surface of the heavens the stars and constellations all distinguished according to their respective magnitudes, all being turned by means of curious mechanism, their true position rising and setting are shown. The outside is a terrestrial globe. The machine called the globe of Gottorp from the original one of that name which at the expense of Frederick II duke of Holstein was erected at Gottorp under the direction of Adam Olearius and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757 but it was afterwards reconstructed. *See* *Coar*. The globe at Pembroke hall Cambridge erected by Dr Young (master 1773) is eight feet in diameter. In 1852 Mr Ashmun erected in Fenchurch square, for Mr Wild, a globe 60 feet 4 inches in diameter lit from the centre by day, and by gas at night. It was erected in 1852, the models were sold, and the building eventually taken down.

Gross bribery took place here at the election for the parliament in 1859.—The BISHOPRIC was one of the six erected by Henry VIII in 1541, and was formerly part of Worcester. It was united to Bristol in 1836, but in 1884 an act was passed to provide for their again becoming separate bishoprics. The abbey, which was founded by king Wulpho about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. GLOVES. Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves are presented to judges at maiden assizes. The importation of foreign gloves was not permitted till 1827. "Gloves and their Ancele," by S. W. Beck, published in 1883.

It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts.

GLYOXYLINE (invented by Mr. (aft. sir) F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp and saltpetre saturated with nitro-glycerine. It was abandoned for compressed gun-cotton.

It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions. Population, 1890, 23,093.

GOWRIE CONSPIRACY *John Ruthven*, earl of *Gowrie*, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone *James VI* of Scotland, and seize the government. For this purpose the king was decoyed into *Gowrie's* house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, *Alexander*, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, *William*, was treacherously executed in 1624 for his share in the raid of *Ruthven*, in 1582, and he and his father, *Patrick*, were among the assassins of *Rizzio*, 9 March, 1566.

GRAAL, Holy (Sangreal). The publication of *Tennyson's* poem with this title, Dec. 1869, led to much discussion. *Tennyson* treats it as the cup in which *Christ* drank at the Last Supper. The medieval romances treat it as the dish which held the paschal lamb. The word is probably old French, *grail*, from the old Latin *gradalis*, a dish.

GRACE, a title assumed by *Henry IV.* of England, on his accession, in 1399. *Excellent Grace* was assumed by *Henry VI.* about 1425. Till the time of *James I.* 1603, the king was addressed by that title, but afterwards by the title of *Majesty*.

only "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "Grace of God" is said to have been taken by bishops at *Ephesus*, 431 (probably from 1 Cor. xv. 10), by the *Carolingian* princes in the 9th century, by popes in the 13th century, and about 1440 it was assumed by kings as signifying their divine right. "Des graces" was put on his great seal by *William II.* of England, and on his gold coin by *Edward III.* The king of *Prussia's* saying, that he would reign "by the grace of God," gave much offence, 18 Oct. 1861.

GRACE AT MEAT. The ancient Greeks would not partake of any meat until they had first offered part of it, as the first fruits, to their gods. The short prayer said before, and by some persons after meat, in Christian countries, is in conformity with *Christ's* example, *John* vi. 27, &c.

GRAHAM S DIKE (Scotland), a wall built in 209 by *Severus* *Septimus*, the Roman emperor, or, as others say, by *Antoninus* *Pius*. It reached from the *Firth* of *Forth* to the *Glyde*. *Buchanan* relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

GRAIN *Henry III.* is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight. 12 grains to be a penny weight, 12 penny weights one ounce, and 12 ounces a pound Troy. *Lawson*. An act for the safe carriage of grain (43 & 44 Vict. c. 43), passed 7 Sept. 1880.

GRAMMARIANS. A society of grammarians was formed at *Rome* so early as 276 B.C. *Blair*, *Apollodorus* of *Athens*, *Varro*, *Cicero*, *Mucius*, *Julius* *Cæsar*, *Nicias*, *Ælius* *Donatus*, *Remmius*, *Palemon*, *Tyrrannion* of *Pontus*, *Athenæus*, and other distinguished men, were of this class. A Greek grammar was printed at *Milan* in 1476, *Lily's* Latin grammar (*Brevia Institutione*), 1513, *Lindley Murray's* English grammar, 1795, *Cobbett's* English grammar, 1818—*Harris's* *Heimæus* was published in 1750, *Horne Tooke's* "Læpæ Pterocenta," or the "Dissertations of *Purley*," in 1786, treatises on the philosophy of language and grammar. *Cobbett* declared *Mr* *Canning* to have been the only purely grammatical orator of his time, and *Dr* *Parr*, speaking of a speech of *Mr* *Fitt's*, said, "We threw our whole grammatical mind upon it, and could not discover one error." The science of grammar has been recently much studied with excellent results.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive power." On 15 July, 1857, M. Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the academy 15 Sept. 1869.

James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street, and carried away, with other property, 24 March, 1784, a day before the dissolution of parliament; it was never recovered, and was replaced the next day. A new seal was brought into use on the union with Ireland, 1 Jan. 1801. A new seal for Ireland was brought into use and the old one defaced, 21 Jan. 1832. GREECE, anciently termed *Hellas*. The name of *Græcia* first occurs in the writings of Aristotle (B.C. 384-322). Greece was so called from an ancient king, *Græceus*, and *Hellas* from another king, *Hellen*, the son of *Deucalion*. From *Hellen's* sons, *Dorus* and *Æolus*, came the *Dorians* and *Æolians*; another son *Xuthus* was father of *Achæus* and *Ion*, the progenitors of the *Achæans* and *Ionians*. Homer calls the inhabitants indifferently *Myrædonæ*, *Hellenes*, and *Achæians*. They were also termed *Danai*, from *Danaus*, king of *Argos*, 1474 B.C. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, *Thessaly*, and the islands. The principal states of Greece were *Athens*, *Sparta*, *Corinth*, *Thebes*, *Arcadia*, and afterwards *Macedon* (all which see). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810; in 1861, 1,096,810, with the *Ionian* isles (added in 1864), about 1,348,322; in 1870, 1,457,894; in 1879, 1,979,147; in 1880, 2,187,208. The only history is mythic, and the dates purely conjectural.

SECOND GRESHAM ADMINISTRATION, formed after the death of Mr. Pitt, on 23 Jan. 1806. From the ability of many of its members, their friends and it contained "all the talents, wisdom, and ability of the country," a term applied to it derisively by its opponents. The death of Mr. Fox, 13 Sept. 1806, led to changes, and eventually the cabinet resigned, 25 March, 1807:—

GRESHAM COLLEGE (London), established by Sir Thomas Gresham in 1555, founder of the Royal Exchange. He left a portion of his property in trust to the city and the Mercers' company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures commenced in Gresham's house, near Broad-street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Exchequer office erected on its site, the property having been acquired by the crown for an annuity of 500*l*. The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, 2 Nov. 1843. It cost above 7000*l*. In 1871 the college acquired a valuable collection of books and pictures, bequeathed by Mrs. Hallier. Changes respecting the lectures were advocated in 1875, and some made in 1876.

The amalgamation of the university teaching extension society, advocated by Mr. Goschen, 15 Oct. 1888. The proposal to make the college a teaching university for London was referred to a royal commission, March. Earl Overton, chairman; first meeting 30 June, 1892.

GREYNA GREEN (Dumfries, S. Scotland, near the border). Here runaway marriages were contracted for many years, as Scotch law ruled that an acknowledgment before witnesses made a legal marriage. John Paisley, a tobacconist, and termed a blacksmith, who officiated from 1760, died in 1814. His first residence was at *Magg's Hill*, on the common or green between Greytna and Springfield, to the west of which village he removed in 1782. A man named Elliot was afterwards the principal officiating person. The General Assembly, in 1826, in vain

attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

GREY ADMINISTRATION succeeded the Wellington administration, which resigned 16 Nov. 1830. It carried the Parliamentary and Corporation Reform Acts (*which see*), and terminated 9 July, 1834.

GRIQUALAND WEST AND EAST, two districts in British South Africa, containing diamond fields. The first diamond was discovered in West Griqualand in March, 1867, and caused a great influx of immigrants from all nations, and the formation of many settlements. Diamonds to the value of 12,000,000*l*. were found there between 1871 and 1880, and about 15,000,000*l*. between 1883 and 1887. The district was annexed to Cape Colony 27 Oct. 1871, and incorporated with it in 1880. Kimberley, the capital, was founded in 1871; population in 1890, about 6,000 Europeans and 10,000 natives. GROCERS anciently meant "ingrossers or monopolisers," as appears by a statute 37 Edw. III. 1363: "Les marchants n'ont engrossment totes maneres de merchandises vendables." The Grocers' company, one of the twelve chief companies of London, was established in 1345, and incorporated in 1429.

Humboldt was one of the first by whom it was brought to Europe, in order to ascertain its value in agriculture. The importation of guano into the United Kingdom appears to have commenced in 1839. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa); 243,016 tons in 1851 (of which 6522 tons came from Western Australia); 131,358 tons in 1864, 237,393 tons in 1865, 135,697 tons in 1866; 280,311 in 1870, 114,454 in 1875, 152,989 in 1877; 177,793 in 1878; 74,221 in 1883, 21,175 in 1887; 1888, 24,432; 1889, 28,604, 1890, 27,095.

QUELFIS and **GHIBELINES**, names given to the papal and imperial factions who destroyed the peace of Italy from the 12th to the end of the 13th century (the invasion of Charles VIII of France in 1494). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelins*), and Henry, nephew of Welf, or Guelph, duke of Bavaria, in 1138. The former was successful, but the popes and several Italian cities took the side of his rival. *His Guelph* and *His Ghibelin* are said to have been used as war-cries in 1140, at a battle before Wimpfen, in Württemberg, when Guelph of Bavaria was defeated by the emperor Conrad IV who came to help the rival duke Leopold. The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guelph (of uncertain origin) is the popular name of the present royal family of England, see *Brutus* etc.

GUIDE-BOOKS for travellers are an English invention. Pitrone's "British Itinerary" appeared in 1776, the last edition in 1840 when it was superseded by railway guides. Galignani's "Picture of Paris" 1814 Murray's "Handbook for Travellers on the Continent," the parent of the series appeared in 1836. The publication of Cail and Essté Bickel's foreign guide-books began in 1828 with a handbook for the Rhine in German. French. This was followed by German handbooks for other parts of the continent, which owed much to Murray's handbooks and included much original matter. The first English editions appeared in 1860. See *Murray*

Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton replaced older ones, 1708, renewed 1837. The hall can contain 7000 persons. GUILLOTINE, an instrument for causing immediate and painless death named after its supposed inventor, a physician named Joseph Ignace Guillotin. In 1866 M Dubois, of Lyons, stated that the idea only was due to Guillotin who at a meeting of the legislative assembly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M Louis secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792 a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pillitter on 25 April, and Daugremont was its first political victim, 21 Aug, following Guillotin died in 1814. The guillotine at Paris was burnt by the communists insurgents, 7 April, 1871. A similar instrument (called the *Marianne*) is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the *Maiden* and the *Widow*.

GUINEA (W coast of Africa) was discovered by the Portuguese about 1482. From their trade with the Moors originated the slave trade, Sir John Hawkins being the first Englishman who engaged in this traffic. Assisted by English gentlemen with money for the purpose, he sailed from England in Oct. 1562, with three ships, proceeded to the coast of Guinea, purchased or forcibly seized 300 negroes, sold them profitably at Hispaniola, and returned home richly laden with hides, sugar, ginger, and other merchandise, in Sept. 1563. This voyage led to similar enterprises. *Hakluyt See Slave Trade*. An African company to trade with Guinea was chartered 1588. The Dutch settlements here were transferred to

Great Britain, 6 April, 1872. See *Sierra*, and *Ashantee*.

Reduced at various times, in 1717 to 21s. In 1810 guineas were sold for 22s 6d, in 1816, for 27s. In 1811 an act was passed for bidding their exportation, and their sale at a price above the current value 21s. The first guineas bore the impression of an elephant, having been coined of this African gold. Since the issue of sovereigns, 1 July, 1817, guineas have not been coined.

GUN, see *Artillery*, *Cannon*, *Fire-arms* — *GRY-CLUB*, for pigeon shooting, founded by Sir Gilbert East, in 1862, had 200 members, noblemen and gentlemen, in July, 1867.

GUN-COTTON, a highly explosive substance, invented by professor Schonbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. See *Cotton*. Its nature was known to Traconnot and Pelouze.

The diet of Frankfurt voted 3 Oct 1846 a recompense of 100,000 florins to professor Schonbein and Dr Beutler as the inventors of the civil powder provided the authorities of Mayence after having tried, pronounced it superior to gunpowder as an explosive. Improvements were made in the manufacture of gun cotton by an Austrian officer Baron von Lenk about 1850 and it was tried by a part of the Austrian army in 1855 but did not obtain favour.

In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr Little (Frederick) Abel, our military chemist was directed to experiment on the explosive and dangerous qualities of gun cotton. The British Government also appointed a committee to consider its merits. A complete decision was not arrived at. The first trial of English made gun cotton was made in the spring of 1864 at the manufactory at Stewinmarket, Suffolk by Messrs. Fox & Co.

There was manufactured by a company the patent safety gun cotton according to Mr Abel's patent (including the pulping, compression, and wet processes) based on researches commenced in 1866. The cotton was said to be explosive by detonation and not by ignition. A great explosion took place at Stewinmarket, 24 persons were killed (including A. B. H. and W. B. Fox & Co. managers) about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment 11 Aug 1871.

The verdict at the inquest attributed the explosion to the culpable addition of sulphuric acid to the gun cotton subsequent to its passing the tests required by government, 6 Sept. 1871.

A government commission appointed in Sept. to consider the manufacture and use of gun-cotton reported in favour of both, with special regard to compressed gun-cotton, 13 Dec. 1871.

Another report recommended this gun-cotton to be stored wet, with drying apparatus near and to be kept in sligher boxes, 25 July 1872.

Mr. E. O. Brown of the war department Woolwich discovered that wet gun-cotton can be exploded by concussion by a detonating fuse about Nov. 1872.

It is used as an explosive agent in mining, &c. Gun-Cotton made on a similar principle, was patented by Mr. W. A. Dixon about 1866.

Corrosive Gunpowder, patented by Mr. R. Punsion 1871.

A modified form was tried and reputation successful near Faversham 31b 1875 See *History*.

GUNPOWDER The invention of gunpowder is generally ascribed to Bertholdus, or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindoos possessed it centuries before its composition moreover, is expressly mentioned by Roger Bacon, in his treatise *De Alchymia Magna*. He died in 1292 or 1294. Various substitutes for gunpowder have been recently invented such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun paper by Mr. Hochstadt. A new gunpowder by W. Newmayer of Leipzig near Leipzig, was discussed in Nov. 1866. "Pellet gun powder" was ordered to be used in gun-charges in the army, Mar. 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c. was passed 28 Aug. 1860 and other acts since. See *Birmingham* 1870. In May, 1872, a company was formed to manufacture Mr. R. Punsion's patent cotton gunpowder, asserted to be very safe and controllable. The manufacture of the new German brown or "cocoa powder set up at Chilworth in Surrey 1886. See *Chronoscope*.

Mr. Gale a blind gentleman of Plymouth on 21 June 1865 patented his method of rendering gunpowder safe from fire by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before the Queen at Windsor, 10 Nov. 1865 and it was severely tested at a martello tower, near Hastings, 30 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder Company was formed, Oct. 1866, and wound up, March, 1867.

GUNPOWDER PLOT, for springing a mine under the houses of parliament and destroying the three estates of the realm—king, lords, and commons—there assembled was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman Catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whether they had fled, 8 Nov. and Guy Faux, Mr. Everard Digby, Rookwood, Winter, and others, were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to Lord Montagu led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices.

GYMNASIUM, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on 29 Jan. 1865, and a large and perfect gymnasium at Liverpool was inaugurated by Lord Stanley, 6 Nov. 1865. GYPSIES, GIPSIERS, or EGYPTIANS (French, *Bohémiens*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*), vagrants, supposed to be descendants of low-caste Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century, and at Paris in 1427. In England an act was made against their itinerancy, in 1530, and in the reign of Charles I. thirteen persons were executed at one assize for having associated with gypsies for about a month. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Father Paa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held. George Smith, king of the gypsies, Falcon hall, Edinburgh, protested against the Movable Jwellings bill, 10 Jan. 1891. The Gypsy Lore society, founded in 1888, had 70 members in 1891, and published a journal.

GEORGE BORROW fraternised with the gypsies and wrote several works describing his adventures, especially "The Zincali" (1841), "The Bible in Spain" (1842), "Lover's" (1843), and a "Dictionary of the Gypsy Language" (1874). He was blind in 1803, and died in Aug. 1883.

Some of them conveyed to King's Cross station, London, 16 April, 1887, at Chester, April, 1887. Matilda II. crowned queen of the American gypsies near Dayton, Ohio, Nov. 1888.

GYROSCOPE (from *gyros*, to revolve), the name of a rotatory apparatus invented by Fegol of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Behnkenberger of Tübingen (born 1765, died 1831).—The gyroscope, by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

If any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his commitment be just. This act (founded on the old common law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone*.

The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. HANSARD'S DEBATES, see *Reporting*.

HANSE TOWNS. The Hanseatic League (from *hansa*, association), formed by port towns in Germany against the pirates of the Swedes and Danes, began about 1140; the league signed 1241. At first it consisted only of towns situated on the coasts of the Baltic sea, but in 1370 it was composed

of sixty-six cities and forty-four confederates. The league proclaimed war against Waldemar, king of Denmark, about the year 1248, and against Eric in 1248, with forty ships and 12,000 regular troops, besides seamen. On these several princes ordered the merchants of their respective kingdoms to withdraw their effects. The thirty years' war in Germany (1618-48) broke up the strength of the association, and in 1630 the only towns retaining the name were Lubeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries in the 15th century. Their privileges by treaty in England were abolished by Elizabeth in 1578.

HARMONISTS, a sect, founded in Wurtemberg by George and Frederick Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823, but failed in his scheme at establishing a 'social community' and returned to England see *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Urenie, and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The best known harmoniums in England are those of Alc. Vandre and Deban. The latter claiming to be the original maker of the French instrument. In 1841, Mr W. J. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonium, and by successive improvements he produced a fine instrument with diapason quality, and great rapidity of speech, without loss of power.

HARMONY, the combination of musical notes of different pitch, appears not to have been practised by the Greeks.

Huchbold a Flemish monk published combinatorics in his *Enchiridion Musicae*, 9th century. Harmonium greatly promoted by Pilestina and especially in Monteverde.

Jean de Muris wrote Ars Contrapuncti in 14th century.

Francis of Cologne described dissonant 1600. Beethoven greatly enlarged the range of harmonic power.

HARO, CRY OF (*Clameur de Haro*) traditionally derived from Raoul, or Rollo of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well, that injured persons uttered the cry "*Ha Rou! Ha Rou!*" A *mon orde, mon prince, on me fait tort*." The cry was raised in a church in Jersey in 1839. It has now no legal effect.

HARP Invented by Jubal, 3875 B.C. (*Gen. ii. 21*). David played the harp before Saul, 1063 B.C. (*1 Sam. xvi. 23*). The Cimbri, or English Saxons, had this instrument. The celebrated Welsh harp was strung with gut, and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Borumbe monarch of Ireland. It was given by his son Donagh to pope John XVIII. together with the crown and other regalia of his father in order to obtain absolution for the murder of his brother Toig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII. who presented it to the first earl of Clanricarde. It then came into possession of the family of De Burgh next into that of MacMahon of Clanagh county of Clare afterwards into that of MacNamara of Limerick and was at length deposited by the right

HEAD ACT, see Ireland, 1465.

HEALTH, GENERAL BOARD OF was appointed by the act for the promotion of the public health, passed in 1848. This board was reconstituted in Aug 1854, and sir Benjamin Hall was placed at its head with a salary of 2000l, succeeded by W F Cowper, Aug 1855, and by Ch B Adderley in 1858. In 1858 this board was incorporated into the privy council establishment, Dr Simon being retained as medical officer. See *Hygiene, Hygiene, Sanitation, Lichens, Public Health* &c

HEARTH, or CHIMNEY, TAX, on every fire place or hearth in England, was imposed by Charles II in 1662, when it produced about 200,000l a year. It was abolished by William and Mary at the Revolution in 1689, imposed again, and again abolished

HEAT (called by French chemists *Caloric*). Little progress has been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in

motion among the particles of matter, which view he supported by experiments on friction (recorded in 1806). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heidelberg and of Mr. James P. Joule of Manchester, who assert that heat is the equivalent of work done. Mr. Joule, in his papers published 1841-2, laid the foundation of the science of thermo-dynamics on which he worked till his death, 11 Oct. 1889. The Joule Memorial fund proposed, 30 Nov. 1889, was instituted by the Royal Society, Jan. 1890. In 1854, Sir William Thomson, of Glasgow, published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo electric battery was constructed by Mareus of Vienna, in 1865. Professor Tyndall's "Heat, a Mode of Motion," first published Feb. 1863, third edition, 1868, sixth edition, 1880. The researches of philosophers are still devoted to this subject; see *Boling's L'orescence*. Greatest heat in the hot summer of 1863 at Nottingham, in sun, 122.4, in shade, 92.2, 22 July, 1 p.m. 14 Aug. 1876, 95.7 in the shade, 117 in sun, 26 June, 1878, 95 in the shade.

Sir George Cayley invented a heated air engine in 1807, and Mr. Darling applied it to raising water in Yorkshire in 1818. One invented by Mr. Wenham was described in 1873. Improvements have been made by C. W. Siemens. Coal gas is generally employed. See *Gas Engines*.

Cayley, John, was a constructed ship in which can run, at what was the motive power. On Jan. 18, it sailed down the bay of New York at the rate of 14 miles an hour. It was said at a rate of 80 per cent. less than steam. Although the engines were not successful, Cayley continued his experiments and patented an improved engine in 1866. In 1868 he proposed condensation of the sun's rays and then employment as a motive power, in March 1869, he exhibited his apparatus in New York shortly before his death, aged 86.

Mr. C. Price states that on 14 July 1847 the temperature was 98° in the shade at Uckfield, Sussex. In London 94° in the shade 15 July 1881. In London, W. 11 Aug. 1884, in the shade, 92.6. In Princeton, Dartmoor 94 in the shade 24 July 1884. London, 91° in the shade 31 Aug. 1885, see *United States*, 1894.

HEBREWS, see *Jews*. The Epistle to the Hebrews ascribed to St. Paul is dated 64. The chief classic authors of all nations, except Greece, have been translated into Hebrew.

HERRIDES (the *Hædes* of Ptolemy and the *Habides* of Ptolemy), western isles of Scotland, long subject to Norway, ceded to Scotland in 1264, and annexed to the Scottish crown in 1540 by James V. The heritable jurisdictions were abolished in 1747.

HEBRON (in Palestine) Here Abraham resided 1860 B.C., and here David was made king of Judah 1048 B.C. On 7 April, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, and to contain the remains of Abraham and his descendants.

HECATOMB, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedæmonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

HECLA, MOUNT (Ireland) Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olauson and Paulsen. Great & avulsions of this mountain oc-

curred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784-5, when rivers were dried up, and many villages overwhelmed or destroyed. The mountain was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoria of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE dates from the flight (Arabic *hejra*) of Mahomet, from Mecca to Medina, on the night of Thursday, 15 July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantuani proves that the 16th was the first day, 37 of its lunar years are equal to 32 of the solar or vulgar era.

HEIDELBERG (Germany) was the capital of the Palatinate, 1362-1719. The protestant electoral house becoming extinct in 1693, a war ensued, in which the castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1343, when it contained twenty-one pieces of wine. Another was made in 1664, which held 600 hogheads. It was destroyed by the French in 1688, but a larger one, fabricated in 1751, which held 800 hogheads and was formerly kept full of the best Rhine wine, is said to be mouldering in a damp vault, empty, since 1769. Population, 1890, 31,737.

The anniversary of the foundation of the university in 1386 was enthusiastically celebrated early in August, 1886.

HEIDER POINT (Holland) The fort and the Dutch fleet lying in the Texel surrendered to the British under the duke of York and Sir Ralph Abercromby, by the prince of Orange, after a conflict 540 British were killed 30 Aug. 1799. The place was left in Oct., see *Bergen*.

HELENA, ST., an island in the South Atlantic Ocean, discovered by the Portuguese under Juan de Nova Castilla, on St. Helena's day, 21 May, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651, and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company on one more. St. Helena was the place of Napoleon's captivity, 16 Oct. 1815, and here he died, 5 May, 1821. His remains were removed in 1840, and interred at the Hotel des Invalides, Paris, see *France*, 1840. The house and tomb have been purchased by the French government. The bishopric was founded in 1859. Governor, adm. Sir Charles Elliot, 1863-9, adm. Charles George Edward Patey, 1869, Hudson Ralph Jernham, 1873, died April, 1884, col. Grant Blunt, hon. Wm. Grey Wilson 1889. Population, 1871, 6241, in 1883, 5085, 1891, 4,116. Revenue, 1891, 8,728, expenditure, 9,032.

No crime, debt or disease reported by the governor. By the fall of a rock near Jamestown, 9 persons killed, spring 1890, 1 May, ..

HELIGOLAND, an island in the North Sea, formerly a dependence of the duchy of Holstein, subject to Denmark, was taken from the Danes by the British, 5 Sept. 1807, made a depot for British

merchandise, confirmed to England by the treaty of Kiel 14 Jan 1814. In a naval engagement off Heligoland, between the Danes and the Austrians and Prussians, the allies were compelled to retire, 9 May, 1864. A fashionable bathing place for Germans. Heligoland was ceded to Germany by the Anglo-German agreement, 18 June, given up by Mr Barkley to the new German governor, 9 Aug., visited by the emperor William II., and proclaimed part of the empire, 10 Aug 1890. Population, 1881, about 2000.

HELIOGRAPHY (from *helios*, the sun)

A system of telegraphing by means of reflecting the rays of the sun, said to have been employed by the ancients in the time of Alexander about 333 B.C.

A portable heliograph invented by Mr H. Vane of the Persian telegraph department was announced in 1875. It was employed in India 1875-78 and in the Afghan and Zulu campaigns, 1879-80. See also *heliograph*.

HELIOMETER, an instrument for measuring the diameters of the sun, moon planets and stars, invented by Savary, in 1743, applied by M. Bouguer, in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Radcliffe observatory Oct 1849.

HELIOPOLIS, see *Baalut* (in Syria). The name was also given to a city in Lower Egypt (the biblical On or Beth-hemesh) in the earliest known times a chief seat of the worship of the sun. It suffered much by the Persian invasion 525 B.C. and was in ruins in the time of Strabo, who died about A.D. 24.

HELIOSCOPE (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye) was invented by Christopher Scheiner in 1625.

HELIOSTAT, an instrument invented to make a sunbeam stationary, or apparently stationary, invented by s'Gravesande about 1719 and greatly improved by Malus and others. One constructed by MM. Foucault and Duboscq was exhibited at Paris in Oct 1862.

HELLAS, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C. derived its name from Hellen, king of Phthiotis, about 1600 B.C. The Hellenes separated into the Dorians, Achæans, Ionians, and Achæans. The present king of Greece is called 'king of the Hellenes' see *Greece*.

HELLENIC SOCIETY, to promote Hellenic studies, formed at a meeting, 16 June, 1879, by Mr C. I. Newton and others. Journal published 1881, cf *eng*.

HELLESPONT (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. According to the legendary story of the loves of Hero of Sestos, and Icarus of Abydos, Icarus was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea dated seventh century B.C. Lord Byron and Hunt Ekenhead also swam across, 3 May, 1810. See *Xerxes*.

HELL-FIRE CLUBS Three of these associations were suppressed, 1731. They met at Somerset-house, and at houses in Westminster and in Conduit-street.

HELLHOFFITE, a new powerful and safe explosive, composed of nitrates, &c., invented by Hellhoff and Gruen of St Petersburg, announced August, 1885.

HELMETS, among the Romans, were provided with a vision of graven birds, to raise above the eyes, and heavier to lower for entering, the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet, but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated visor and the helmet of Robert I. was surmounted by a crown, 1306. *Osullivan*.

HELOTS, captives, derived by some from the Greek *heklos*, to take, by others from *Hela*, a city which the Spartans hated for refusing to pay tribute. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helots*, 700 B.C. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C., and is considered to have formed four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C., but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedæmonian treachery. *Herodotus*. The connection between the Helots and Helos, is now considered mythical.

HELVETIAN REPUBLIC Switzerland having been conquered by the French in 1797 a republic was established April, 1798, with this title, see *Switzerland*.

HELVETII a Celto-Germanic people, who inhabited part of what is now called Switzerland. They joined the Cimbri, with whom when the Romans were defeated near Geneva, and the consul Longinus killed 107,000, and when they themselves were defeated by Marius and Catulus, 101. Invaded Gaul, 61 B.C., they were defeated and massacred by Julius Cæsar, 58 B.C., near Geneva.

HEMP AND FLAX Flax was first planted in England, when it was directed to be sown for making nets, 1532-3. "Bounties were paid to encourage its cultivation in 1783 and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *See John Sunlar*. The importation of hemp and flax in 1870, was 3,510,178 cwt., in 1877 3,502,447 cwt., in 1879, 2,943,738 cwt., in 1883, 3,082,109 cwt., in 1887, 3,105,169 cwt., in 1890 3,777,364 cwt. The cultivation of flax was revived at the death of cotton during the American civil war, 1861-4.

HENGESTDOWN (or *Henstall*) Here. Egbert 14 and to have defeated the Danes and West Britons, 835.

HENOTICON (from the Greek *henotes*, unity), an edict of union for reconciling the Dutchians with the church issued by the emperor Julian at the instance of Arius patriarch of Constantinople, 482. It was zealously opposed by the popes of Rome, and was annulled by Justin I. in 518. The orthodox party triumphed, and many heretic bishops were expelled from their sees.

HEPTARCHY (or government of seven rulers) in England was gradually formed from 455, when Hengist became king of Kent. It terminated in 828, when Egbert became sole monarch of England. There were at first nine or ten Saxon kingdoms, but

Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler, as Northumbria see *Berana*.

HERACLEA, see *Pandora*.

HERACLIDÆ, descendants of Hercules, who were expelled from the Peloponnese about 1200 B.C. but reconquered it in 1048, 1103-4 or 1109 B.C., a noted epoch in chronology, all the history preceding being accounted fabulous.

HERALDRY Marks of honour were used in the first ages. *Nisbet* The Phrygians had a sow, the Thracians, Mars, the Romans, an eagle, the Goths, a bear, the Flemings, a bull, the Danes, a horse, and the ancient French a lion, and afterwards the fleur-de-lis (which see). Heraldry, as an art, is ascribed by St. Charles, about 800, and next to Frederick Barbarossa, about 1152, it began and grew with the feudal law. *Maclean* The great English works on Heraldry are those of Barham or Birkham, published by Gwiltum (1610), Edmondson (1780), and Burke's "Arms" (1842, new ed. 1883, contains a history and the arms of above 66,000 British families, &c.) See *Blazon*.

Edward III. appointed two heralds kings at arms for the south and north (Burrin, Norfolk) 1340

Richard III. incorporated and ended the 1433 4

HERALDS COLLECT Philip and Mary enlarged its privilege, and confirmed them by letters patent 15 July 1554

Formerly, in many ceremonies the herald represented the king's person and therefore wore a crown, and was always a knight

The college has an earl marshal, 3 kings of arms (Garter, Clarenceux, and Norroy) 6 heralds (Richmond and Lancaster, Chester, Windsor, St. Michael, and York), 4 pursuivants, and extra heralds, see *Earl Marshal* and *Kings of Arms*.

The building in Doctors' Commons, London, was erected by Sir Christopher Wren (after the great fire in 1666) 1683

HERALDS VISITATIONS were occasionally held in former times at which the lauded gentry were required to attend to prove their pedigrees which were then entered in a book. The list is said to have been held in 1687. Some of the records have been printed.

A heraldic exhibition to which the queen contributed was opened in Edinburgh July-August 1891. The Treatise by the Rev. J. Woodward and the late G. Burnett was completed in two vols. 1892

HERAT, on the confines of Khorasan, a strong city, called the key of Afghanistan. It was conquered by Persia, early in the 16th century, by the Afghans, in 1715, by Nadir Shah, 1731; recovered by the Afghans, 1749. The Persians, baffled in an attempt in 1838, took it 25 Oct. 1856, in violation of the treaty of 1853, and war ensued between Great Britain and Persia. *Pearse* was made in April, 1857; and Herat was restored 27 July following. It was seized again by Ishaq Mahomed, 26 May, 1863, taken by Yakoub Khan, rebelling against his father, 6 May, 1871. Yakoub, reconciled to his father, was made governor, 16 Sept. 1871.

Ayoub governor for his brother Yakoub, smothered at Kabul May, 1879

HERBERT HOSPITAL for Soldiers, Woolwich, erected 1866.

HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, 23 or 24 Aug. 79.

Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MSS. papyri were found in a chest, in 1754, and many antiquities were purchased by Sir William Hamilton, and sold to the British Museum, where they are deposited, but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

HEREDITARY The transmission of qualities of like kind of those of the parents has been especially studied by Mr. Francis Galton, F.R.S. who published "Hereditary Genius," 1869, and "Records of Family Faculties," (containing tabular forms to be filled up, in order to obtain authentic data for his new science of "Eugenics") Money prices, 5s. and upwards, were offered for the best records. His "Inquiries into Human Faculty" was published in 1883, and "Natural Inheritance" in 1889.

HEREFORD was made the seat of a bishopric about 676, Putter being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was re-opened after very extensive repairs, on 30 June, 1863. It is valued in the king's books at 768l. per annum. Present income, 4200l. Population, 1861, 19,821, 1891, 20,267.

HERETICS (from the Greek *hairesis*, choice). Paul says, "After this way they all have say, so worship I the God of my fathers," 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichæans, Nestorians, Arians, &c., see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220, and immediately adopted by pope Innocentius III.

HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schaumburg became count of Holstein his descendants ruled till 1459, when Adolphus VII died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as his duke, through fear of his arms. In 1544, his grandson, Christian II, divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII, 15 Nov, 1863. From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751-1818, and the

reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1814, constituent assemblies were granted to them. Since 1844 disputes have been life between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia, war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein, but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*see* *see*), 14 Aug 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug 1866. Population in 1860, 1,004,473. The 5th clause, directing North Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed, and was abrogated, Feb 1879.

HOLY ALLIANCE was ratified at Paris, 26 Sept 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

HOLY MAID OF KENT Elizabeth Barton was noted by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII if he divorced Catherine of Spain, and married Anne Boleyn, and direful calamities to the nation. She and her confederates were executed at Tyburn, 5 May, 1534.

HOLYOKE, Massachusetts, U S A Roman Catholic church here took fire, a panic ensued, and

about 80 were burnt or trampled to death, 26, 27 May, 1875.

HOLY PLACES IN PALESTINE These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I they were placed under Latin monks, protected by the French government, but the Greeks from time to time obtained firman from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatt-i-sherif, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks who claim additional privileges and cause fresh discussions. 1808

The Russ and French governments sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute, an arrangement prevented by the Greek revolution. 1841

The subject again agitated and the Porte proposed that a mixed commission should adjudicate on the rival claims. V. Titoff the Russian envoy acting on behalf of the Greeks and M. Layaletie, the French envoy, on that of the Latins took up the question very warmly. 1850

A firman issued by the Porte confirming and consolidating the rights previously granted to the Greek Christians and declaring that the Latins had no right to claim exclusive possession of certain holy places assigned but permitting them to possess a key of the church at Bethlehem &c, as in former times. 9 March, 1853

The French government acquiesced with much dissatisfaction but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Orloff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kamardy in 1774 and demanded that the firman of 9 March, 1853 should be read at Jerusalem although it militated against his pretensions which was accordingly done. The dispute still continued the Porte being exposed to the attacks of both the Russian and French governments. March, 1853

Prince Mischkoff arrived at Constantinople as envoy extraordinary and in addition to the claims respecting the holy places made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854. 6. (See *Russo-Turk War*) 28 Feb

HOLY ROMAN EMPIRE The German empire received this title under the emperor Otto I the great, crowned at Rome by pope John XII, 2 Feb 962. See *Rome*, and *Germany*.

HOLY ROOD or CROSS A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about 615. The feast of the invention (or finding) of the cross is on 3 May, that of the exaltation of the cross, 14 Sept. At Botley, abbey, in Kent, was a crucifix, called the *Rood of Grace*, at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St Paul's cross, London, 1536.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchy of Scotland. The abbey, of which some vestiges remain, was founded by David I in 1128 and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed chamber which was occupied by queen Mary, and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, 9 March, 1566. The north-west towers were built by James V, and the remaining part of the palace was added during the

reign of Charles II. Mr. Pinkerton states that the palace was burnt in 1650, and rebuilt in 1659. Great improvements were made in 1857. The queen held her court here, 30 Aug. 1850.

HOLY SEPULCHRE, a Byzantine church in modern Jerusalem. Ferguson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, the "dome of the Rock." The question is still undecided. The order of the Holy Sepulchre was founded by Godfrey of Bouillon, 1099; revived by pope Alexander VI. 1496; re-organised, 1847 and 1868.

HOME SECRETARY, see *Secretaries*, and all the administrations under the name of their premier. New Home Office, Westminster, occupied 6 Aug. 1875.

"**HOME, SWEET HOME**" The words are attributed to John Howard Payne, an American actor, who died in 1852, the music is said to be Italian, but it is probably by Sir Henry Bishop, who introduced the song into *Clari*, or the *Maid of Milan*, in 1823.

HOMER'S ILLIAD AND ODYSSEY, the earliest and most perfect epic poems in the world. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C. Among the thousands of volumes burnt at Constantinople, A.D. 477, are said to have been the works of Homer, written in golden letters on the great gut of a dragon, 120 feet long.

F. A. Wolf, in his *Prolegomena*, in 1795, argued that the Homeric poems were composed of independent epic songs, collected and arranged by Parnassians about 550 B.C. This theory occasioned much controversy. The first English version of the *Iliad*, by Arthur Hall, appeared in 1721. The present text is attributed to the time of Pindar, who died B.C. 498. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1792. The translation of the *Iliad* by the earl of Derby (1844) is much commended.

HOMICIDE is said to have been tried at Athens by the Areopagites. Among the Jews, wilful murder was capital; but for chance-medley the offender was to flee to one of the cities of refuge, and there continue till the death of the high-priest, 1451 A.C. (*Numer. xxxv.*). 9 Geo. IV. c. 31 (1828), distinguishes between justifiable homicide and homicide in its various degrees of guilt, and cir-

circumstances of provocation and wilfulness; see *Murder*.

Animals have been tried and punished for killing human beings. A bull was hanged for homicide near the Abbey of Beaulieu May, 1499

HOMILDON HILL (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), 14 Sept. 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMILIES in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people. Charlemagne's "Homiliarium" was issued 809. The Book of Homilies drawn up by abp. Cramer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.

HOMOEOPATHY, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr. Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brands*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient to regulate his diet and habits carefully. It has led to a more accurate study of the materia medica. Introduced into England, 1827. The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept. 1850. and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the *Hornpipe* is supposed to be so named from its having been performed to the Welch *gob-corn*, that is hornpipe, about 1300. *Sponcer*. The horse tax was imposed in 1784. Its operation was extended, and its amount increased, in 1796, and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000 per year.

The day is said to have been first divided into hours from 203 B.C. when L. Papius Censor created a sundial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*) 158 B.C. the time was called at Rome by public criers. In England, the measurement of time was in early days uncertain one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours, said to have been invented by Alind A.J. 866, see *Day For Hours of Prayer*, see *Hours* *The Hour*, daily conservative newspaper first appeared, 24 March, 1873, last time, 11 Aug 1876

HUDSON'S BAY, discovered by Sebastian Cabot, 1512, and re-discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610, had been visited by Froisher. The "governor and company of adventurers of England trading to Hudson's Bay," obtained a charter from Charles II in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March, 1869), were transferred to the Dominion of Canada for 300,000s., and a right to claim a certain portion of land within fifty years, and other privileges, the company having consented to this, 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. (afterwards lord) Wolseley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our common

is one of peace." Hiel was unsupported and offered no resistance. The lieutenant-governor, Adams George Archibald, arrived 3 Sept. The Company had a large sale of furs in 1888. See *Mamibos* and *Western Territories*.

HUE AND CRY, the old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken, but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710.

HUGUENOTS, a term (derived by some from the German *Edugnosson*, confederate, by others from Hugues, a Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598 (revoked in 1685). The massacre of St Bartholomew's day, 24 Aug. 1572, occurred during a truce, see *Calvinists*, *Protestants*, *Bartholomew*, *Edict*, and *Calvinists*. 8 Smiles's "History of the Huguenots," appeared in 1867. The crypt in Canterbury cathedral, assigned to French protestants in 1550, is still used by them for divine worship.

HUMAITA, a strong post on the river Paraguay, fortified at a great cost with a battery of 300 cannon, by Lopez, the president of Paraguay, and believed to be impregnable, was passed by the Brazilian ironclads, 17 Feb. 1868. On the 16th, Caxias, the Brazilian general, stormed a work to

the north of Humaita, and captured many stores. Humaita itself, after a severe siege, was abandoned, 24 July, 1868.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned, was founded in 1774, by Drs Goldsmith, Heberden, Towers, Lettsom, Hawes, and Coggin, but principally by the last three. The society has above 280 depôts supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde park. The motto of this society is appropriate — "*Latet scintilla forem*." "A small spark may perhaps be kind." Nearly 500 persons were relieved in 1837, 544 in 1890, 536 persons rewarded for bravery. See *Drowning*, and *Lisbon*, Dec. 1890.

HUMANISM, a name given to the philosophical study of man's personality as distinguished from a class, especially advanced by Petrarch and other energetic advocates of the revival of the study of ancient classic literature, termed the "new learning," and ("*litera humaniora*") the age of the *renaissance*, in the 14th, 15th, and 16th centuries, whereby freedom of thought and language was greatly promoted.

See *Huns*, and *Attila*. After Attila's death, in 453, the Gepidae, and in 500 the Lombards held the country. It was acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 890 the country was settled by a Scythian tribe, named *Vingours* or *Ungri* (whence the German name *Ungarn*) and the Magyars of Finnish origin. HYDERABAD (S India), the territory of the Nizam (the great in theocratic potentate in India), who derives his authority from Asaf Jah, a chief under Aurangzeb, who made him viceroy of Nizam-ul-Mulk, regulator of the state. He died in 1748. Population in 1881, 9,845,594, in 1891, 10,454,930.

Civil war between his descendants ensued 1748-62.

Nizam Ali dethroned his brother 1761, ravaged the country, 1765 made a treaty with the East India Company. 1766 he joined Hyder Ali, left him 1768, acquired part of Tippos Sultan's territories, and became feudatory of the British empire 1799 and 1807 died 1802.

One of his successors, Sir Asaf Jah, ruled feebly, and succeeded by an illegitimate son 1802.

The Nizam died, leaving his young son in charge of Asaf Jung, enjoining him to support the British during the reign which he did faithfully 1857-6.

Sir Asaf Jah made K.C.S.I., visited Europe to promote the Queen 29 June, returned to Bombay, 24 Aug 1866, died 8 Feb 1883.

HYDRAULIC PRESS, see under *Hydrostatics*.

HYDROCHLORIC ACID or **CHLOROHYDRO-ACID**, the only known compound of chlorine and hydrogen, as discovered by Dr. Priestley, 1774.

its constitution determined by Davy, 1810. It is also called muriatic acid and spirit of salt, see under *Muriatic*.

HYDROGEN (from *Hydro*, water). Paracelsus observed a gas rise from a solution of iron in oil of vitrol, about 1500. Turquet de Mayerne discovered its inflammability, 1656, as did Boyle, 1672. Lavoisier noticed its detonating power, 1790. In 1766 Cavendish proved it to be an elementary body, and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced, subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state. It was liquefied by Raoul Pictet and Cailletet, end of 1877.

HYDROGENIUM, a hypothetical metal. In a paper read before the Royal Society, 7 Jan 1869, Mr Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium."

HYDROGRAPHY is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British admiralty, by which a series of charts has been issued.

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia, but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann*: Archimedes was killed in 212 B.C., and Hypatia was torn to pieces at Alexandria, A.D. 415. Robert Boyle described a hydrometer in 1675. Baume's (1762) and Brix's (about 1818) have been much employed. Modifications of the apparatus have been invented.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C. by the Arabs in the 10th century A.D. and revived by Dr Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Graefenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr Sidenham, before 1689. Priessnitz died 26 Nov 1851.

A grand hydropathic establishment at Bushey Herts opened, 13 Feb 1883. Many others exist throughout the kingdom.

HYDROPHOBIA, in man, rabies in animals. M Pasteur announced his discovery of a method of checking this disease, analogous to vaccination.

He operates on monkeys and other animals successfully, May, on dogs Aug 1884, on 40 persons 14 Dec 1885. An international hospital afterwards termed the Pasteur institute, founded (40,000 subscribers) May, 1886 opened by president Carnot, 14 Nov 1888. Out of 226 cases treated, 4 deaths reported 12 April, 1886, 1673 persons treated, 2 May 1888 to 1 May, 1889. The principle much opposed 1886-7. A British commission for inquiry (Mr James Paget, Dr Burd in Sanderson, and others) appointed 25 April, 1886, 10,000 Paris, and reports conclusions in M. Pasteur's treatment, 27 June, 1887. M. Pasteur proposes and verifies other applications of his principles, 1887-8. The book, "M. Pasteur, Histoire d'un Savant," was published in 1883; and an English translation by Lady Clara Hamilton in 1885.

Reported number of patients by M. Pasteur since 1885, 6,950 up to 28 June, 1889, 1,270 patients, 23 deaths in the year, Oct 1889. Meeting of eminent men at the mansion house, London, to establish a fund to support the Pasteur institute, 1 July above 2,000 subscribers. 1 Oct 1889.

HYMNS. The song of Moses is the most ancient, 1491 B.C. (*Exod* xi.) The Psalms date from about 1000 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col* iii 16). The composition of hymns for the Christian church is very ancient. The hymns of Dr Watts (died 1749), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. "Hymns, Ancient and Modern," edited by rev air Henry Baker, first appeared in 1860. "A Dictionary of Hymnology," edited by the rev John Julian, was published Jan 1892.

Hendenham, at Breslau 19 Jan 1880, on "Hypnotism or Animal Magnetism" was translated by L. C. Woolridge, and published in 1888. See *Mesmerism*.

As the theatre is supported by subscription, and no money taken at the doors, it is considered independent of the lord chamberlain's censorship in regard to the plays performed. Ibsen's *"Raskolnikov"* was performed 23 Feb., and his *"Ghosts"* 13 March, 1891. Other performances were given at the private theatre in the club-house erected on the site of Evans' hotel, Covent Garden, 22 May, 1891 et seq. INDEPENDENTS or CONGREGATIONALISTS, hold that each church or congregation is independent of all others in religious matters, that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed, and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached these doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr Robinson, often regarded as the author of *Independency*. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, 12 1658, and the congregational union of England and Wales formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851 they had 3244 churches for 1,067,760 persons in England and Wales, in 1887, the congregationalists had 4338 churches and mission stations, annual meetings are held, see *Worship*. The first independents in Scotland were the Glasgows (which see). The first independent church in America was founded by the followers of John Robinson, at Plymouth, New England, in 1620.

INDEXES OF PROHIBITED BOOKS. The index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity,

was confirmed by a bull of pope Clement VIII. in 1595.

The council of Nice (325) forbade magical books. Pope Paul IV. 1555, began the "Index," published by Paul IV. 1559. The Talmud and heretical books were especially prohibited, causing much dissatisfaction. The Inquisition was engaged in the work, which was organized by the Council of Trent. The Congregation of the Index was instituted, and rules laid down. The Indexes are—1. Prohibitions, of books absolutely forbidden to be read, 2. *Perpetuum*, of books not to be loaned till purged from error.

Many of the works of the great authors of France, Spain, Germany, and England, are thus prohibited. On 25 June, 1804, Hugo's *"Les Misérables"* and other books were added to the number and many others since.

brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit however gradually arose in the Bengal native army. In March several regiments were disbanded followed by others, till in June the army had lost by disbandment and desertion, about 30,000 men. On 5 April, a sepoy and on 20 April, a jemadar, or native lieutenant, were executed. At the end of May 34 regiments were lost. In April, 85 of the 3rd Bengal native cavalry at Meerut refused to use their cartridges. On 9 May they were committed to gaol. On Sunday, the 20th, a mutiny in the native troops broke out they fired on their officers killing col. Fane and others. They then released their commanders, massacred many Europeans and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi (which see).

INDIA COMPANY, EAST. The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, Captain Lancaster, was brought home in another ship, the sailors having saved his own, but his information gave rise to a more profitable voyage, and the establishment of a company, whose first charter, in Dec. 1600, was renewed in 1609, 1657, 1661, 1693, and 1744. Its stock in 1600 consisted of 72,000*l.*, when it fitted out four ships. Meeting with success, it continued to trade, and India stock sold at 500*l.* for a share of 100*l.* in 1683.

A new company (the "English") was chartered 5 Sept. 1698 and the old (the "London") company, from trading for three years, the two were united 1702

New East India Company established 1708

Privileges of the company continued till 1783 1744

Affairs of the company were brought before parliament and a committee exposed a series of intrigues and crimes Aug 1772

As remedial measures two acts passed, (one authorising a loan of 1,000,000*l.* to the company) the other (intituled the India bill) effected most important changes in the constitution of the company and its relations to India. A governor general was appointed to reside in Bengal, to which the other residencies were then made subordinate, a supreme court of judicature was instituted at Calcutta, the salary of the governor was fixed at 25,000*l.* per year, that of the council at 10,000*l.* each, and of the chief judge at 8000*l.* the affairs of the company were controlled, all the departments were reorganised, and all the territorial correspondence was henceforth to be laid before the British ministry June 1773

Mr. Pitt's bill appointing the Board of Control (which act), passed 28 May, 1784

The company's charter was renewed for 20 years 1793

Trade with India thrown open 1805

Trade to China opened, Charter renewed till 1854 1833

The government of India was committed in the hands of the company till parliament should otherwise provide 1833

In consequence of the mutiny of 1857, and the dissolution of the company's army, the government of India was transferred to the crown, the Board of Control was abolished, and a Council of State for India instituted by the act 21 & 22 Vict. c. 106, which received the royal assent, 2 Aug. 1858

The company's political power ceased on 1 Sept., and the queen was proclaimed as Queen of Great Britain and the Colonies, &c. in the principal places in India, amid much enthusiasm 1 Nov "

The company to be dissolved, 1 June, 1874, and

* Lord Palmerston brought in a bill for the purpose on 12 Feb., which was accepted by the house on 18 Feb. He resigned on the following day, and the bill dropped. A similar bill was introduced by Mr. Disraeli on 12 March; but many of its details being objected to, it was withdrawn. On Lord John Russell's reposition, the house proceeded to consider the matter by way of resolutions; on 17 June, Lord Stanley brought in the above mentioned bill, being the third on the subject introduced during the session.

INDICTION, a Roman term originally applied to a tribute of corn, paid every fifteen years, and to the time at which it was paid. The first examples in the Theodosian code are of the reign of Constantine II., who died 361.—In memory of the great victory obtained by Constantine over Maxentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epochs 1 Jan. 313. It was first used by the Latin church in 342.

INDIGO, the dye obtained from the wood plant, *Indigo tinctoria*, was used by the Egyptians, and other ancient nations; and the processes are described by Pliny. After the passage of the Cape of Good Hope, in 1497, it was gradually superseded by the eastern indigo, got from the *indigofera*. The mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1845, 10,127,488 lbs.; in 1850, 70,482 cwt.; in 1855, 63,237 cwt.; in 1861, 84,109 cwt.; in 1866, 74,250 cwt.; in 1869, 86,721 cwt.; in 1874, 79,255 cwt.; in 1877, 106,307 cwt.; in 1874, 85,707 cwt.; in 1876, 88,722 cwt.; in 1877, 60,640 cwt.; in 1879, 80,146 cwt.; in 1880, 58,283 cwt.; in 1881, 81,068 cwt.; in 1882, 95,272 cwt.; in 1883, 100,243 cwt.; in 1884, 104,423 cwt.; in 1885, 94,314 cwt.; in 1887, 76,700 cwt.; in 1888, 78,128 cwt.; in 1889, 90,238 cwt.; in 1890, 81,854 cwt.

INDORE, a province of British India; the principal native rulers have been the Mahratta chiefs, named Holkar, rivals of the Scindiahs at Gwalior. Rao Holkar received a grant of territory from the British in 1733. After severe conflicts the Mahratta chiefs were finally quelled in 1818. The town of Indore, founded in 1767, was destroyed by Scindia after a battle on 14 Oct. 1801. The maharajah Shivaja Rao Holkar died 17 June, 1886. Succeeded by his son, Tuckaji Rao Holkar, who was present at the queen's jubilee in London in 1887. Indore was visited by the viceroy, the marquis of Lansdowne, 24 Nov. 1891. INDUCTION of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850. See under *Electricity*.

INDUCTIVE PHILOSOPHY, based on the results of observations and experiments, really common sense, is especially expounded by Bacon in the second book of his "*Novum Organum*," published 1620. Wm Harvey (1578-1657) endeavoured "to search out the secrets of nature by the way of experiment." See *Blood*.

INDULGENCES in the early church were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo III about 800, were granted in the 11th century by Gregory VII, and by Urban II, and by others, in the 12th century as rewards to the crusaders. Clement V was the first pope who made public sale of indulgences, 1313. In 1517, Leo X published general indulgences throughout Europe, and the resistance to them led to the Reformation.

INFALLIBILITY OF THE POPE, in regard to faith and morals, was decreed by the Vatican Council, and promulgated, 18 July, 1870. The doctrine was most opposed in Germany, and led to the constitution of the church named "Old Catholics," which see. Mr Gladstone's pamphlets, "The Vatican Decrees in their bearing on Civil

Allegiance," published Nov. 1874, and "Vaticanism," in Feb 1875.

INFANTICIDE, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20 000 infants were killed annually, it is now gradually decreasing in India. On 12 Nov. 1851, Mr Raffles induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out to improper persons. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by poison and neglect, 23 Sept 1870. She had adopted about 40 children, receiving a few pounds as premium, in four years, many had died. John and Catherine Barnes, of Transmere, near Birkenhead, convicted of manslaughter 29 Oct 1879, a gross case. See *Truth*, 1879. *The Infant Life Protection Act* passed 25 July, 1872. Female infanticide prohibited in China about June, 1873.

INFANTRY, foot soldiers, their organisation much improved during the wars of Charles V and Francis I., in the 16th century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment which is termed the 100th. The number, now 109, includes the nine regiments formerly in the pay of the East India company, and several colonial corps. Marshal Soult (or marshal Bugeaud) said, "The British infantry is the finest in the world, happily there is not much of it." In 1891, 69,274.

INFIRMARIES. Ancient Rome had no houses for the cure of the sick, diseased persons were carried to the temple of Esculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 364, and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann*, see *Hospitals*. Parish workhouse infirmaries established, 1867.

INFLUENZA, a name given in Italy about 1741 to an epidemic febrile catarrh with variations, probably known to the ancients.

It prevailed in Europe in 1590, and has since frequently appeared, generally commencing in Russia and thence spreading over the continent. It appeared in Britain in 1765 and frequently since, especially in 1830-1, 1833, 1836-7 and 1847. It appeared at Paris in 1866-7 and at Berlin, 1874-5. In Oct. 1889, it was severe in St. Petersburg, and thence spread over Europe, reaching Great Britain, Canada and the United States N. A., Jan. 1890, causing indirectly the deaths of several eminent persons. In the spring, the disease was severe in India and Australia. In 1890 the disease was seen in the west of the United States N. A. and in London and other parts of England and also on the continent. The disease reappeared in Jan. 1890, in much the same localities. In London the general mortality was much increased all classes being attacked. The death of the Duke of Clarence and Avondale 14 Jan. 1892 was attributed to pneumonia following influenza. Report of the epidemic of 1890-91, by Dr. Parsons, caused by government about 3 July, 1891. Special government inquiry into the disease ordered early Feb. 1892.

The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black, but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermilion and gum. **INDIAN INK** was brought from China, and must have been in use by the people of the east from the earliest ages. **INDIAN or SYMPATHETIC INKS**, were known at early periods. Ovid (A. D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Petr. Borel, in 1653, and by Le Mort, in 1669. *See* *Bookman*.

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000) near the old fort of Inkermann, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie, and Forrester, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs of gunpowder occurred near Inkermann, and caused great loss of life.

INOCULATION, see *Small Pox*. Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her son inoculated at 4 days old with success. She was allowed to have it first tried in England on seven condemned criminals, 1721, and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale of London, inoculated Catherine II, empress of Russia, in 1768. Of 5064 who were inoculated in 1797-99, only three died. An inoculation hospital was established in 1746. Inoculation was introduced by Dr. Jenner, 21 Jun. 1799, he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. Inoculation was forbidden by law in 1840. See *Vaccination*, *Sheep*, and *Hydrophobia*.

INQUISITION or HOLY OFFICE. Previous to Constantine (306), heresy and spiritual offences were punished by excommunication only, but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Praxillian was put to death in 384 by the emperor Maximus. Justinian decreed the doctrine of the four holy synods as to the holy scriptures and their canons to be observed as laws, 529, hence the penal code against heretics. About 800 the power of the western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death, the punishment being termed in Spain *auto-da-fé*, an act of faith. In the 12th century many heresies arose, and during the crusades against the Albigenses, Gregory IX.,

in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burnt heretics, assassinated by an accused gonfalonier, 6 April, 1252, was canonized.

Pierre de Castelnau sent against the Albigenses, 1200. St. Dominic made the first inquisitor-general.

INSOLVENCY. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England by 50,733 insolvents from the time of its passing in 1814, to March, 1827, a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l*., might petition the court of bankruptcy, and propose compositions, and have *pro tem* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bankruptcy act, the business of the insolvent debtors court was transferred to the court of bankruptcy; and a number of imprisoned debtors were released in Nov. 1861. INTERDIOT or ECCLESIASTICAL CENSURE, seldom decreed in Europe till the time of Gregory VII. 1073, but often afterwards. When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties, save the baptism of infants, and taking the confessions of dying penitents. In 1170, pope Alexander put all England under an interdict; and when king John was excommunicated in 1208, the kingdom lay under a papal interdict for six years. England was put under an interdict, on Henry VIII. shaking off the pope's supremacy, 1535; and pope Sixtus V. published a crusade against queen Elizabeth of England in 1588; see *Excommunication*.

INTEREST, see *Usury*. The word interest was first used in an act of parliament of the 21st James I. 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent. The rate fixed by the act was 8l. for the use of 100l. for a year, in place of usury at 10l. before taken. The Commonwealth lowered the rate to 6l. in 1651; confirmed in 1660; and by an act of the 13th of queen Anne, 1713, it was reduced to 5l. The restraint being found prejudicial to commerce was somewhat relaxed in 1839, and was totally removed by 17 & 18 Vict. c. 90 (1854).

INVOCATION OF THE VIRGIN AND SAINTS to intercede with God. This practice of the Romish church has been traced to the time of Gregory the Great, 593. The Eastern church began (in the 5th century) by calling upon the dead, and demanding their suffrage as present in the divine offices.

IODINE (from the Greek *iōdes*, violet-like), was discovered by M. De Courtois, a manufacturer of saltpetre at Paris in 1812, and investigated by M. Clement, 1813. On the application of heat it rises in the form of a dense violet-coloured vapour, easily evaporates, and melts at 220 degrees. It changes vegetable blues to yellow, and a seven-

thousandth part converts water to a deep yellow colour, and starch into a purple.

IONA, ICOLMKILL, or Hii, one of the Hebrides. About 555 St. Columba founded a monastery here, which flourished till the 8th and 9th centuries, when it was frequently ravaged by the Norwegians. Other religious houses afterwards were formed here, and the lake was long esteemed sacred.

After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors, was annexed to the Roman empire, 133, and conquered by the Turks.—Ionia was renowned for poets, historians, and philosophers. The "Antiquities of Ionia" were published by Chandler, Revett, and Puri, 1769-1840, and the Dilettanti Society, 1840-1881.

IONIAN ISLANDS (on W. coast of Greece) Corfu, the capital, Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. They were colonised by the Ionians, and partook of the fortunes of the Greek people; were subject to Naples in the 13th century, and in the 14th to Venice.

"O'Flaherty, Keating, Toland, Kennedy, and other modern Irish historians, have rendered all uncertain, by deducing their history from the Deluge with as much assurance as they deliver the transactions of Ireland from St. Patrick's time." — Anderson.

One of the finest thick and heaviest armour plates ever rolled in the world was praised into the very perfection of a manufactured armour plate at the great Atlas Ironworks of Sir John Brown and Co. Sheffield. The size of it when in the furnace was a little over 20 feet long by about 4 feet broad and 21 inches thick.

Its rough weight was over 25 tons. It was hunk up in the furnace before being rolled by five mild plates each 3 inches thick and one mild plate of 6 inches.

This mass when reduced by intense heat to the consistency of dough was withdrawn from the furnace, and in the course of less than a quarter of an hour was passed between the enormous rollers in many times.

It was reduced to a compact slab of iron of a uniform thickness of 2½ inches and then passed on to the bed to cool it for having its rough edges planed down to the proper dimensions 6 Sept. 1867. Armour plate 24 inches thick rolled at same works Oct 1876.

About 40,000 persons were decorated in 1870-71.

IRON CROWN (of Italy), of gold and precious stones, set in a thin ring of iron, said to have been forged from a nail of Christ's cross, was made by order of Theodelinde for her husband, Agilulf, king of the Longobards, 591. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy, Napoleon I at Milan on 26 May, 1805, put it on his head, saying, "*Dieu me l'a donnee, gare a qui y touche*" (God has given it to me, woe to him who touches it). The crown was removed from Monza to Mantua by the Austrians, on 23 April, 1859. After the peace of Vienna in 1866, the crown was given up to general Menabrea on 11 Oct., and presented to King Victor Emmanuel, at Turin, on 4 Nov. * The following conjectures have been made as to his identity.—An Armenian patriarch formerly carried from Constantinople (who died ten years before the mask) the due de Vendôme's son of Louis XIV, reported to have perished in the camp before Duxmude the due de Beaufort, whose head is reported to have been taken off before Cauda James duke of Monmouth, executed on Tower hill a son of Anne of Austria, queen of Louis XIII, either by cardinal Mazarine or by the duke of Buckingham the twin brother of Louis XIV (a conjecture revived by Voltaire and others) Fouquet, an eminent statesman in the time of Louis XIV, a count Mathias secretary of state to Charles III, duke of Mantua. M Delort and the right hon. Agar Ellis (afterwards lord Dover) endeavoured to prove Mathias to have been the person. The mask it seems, was not made of iron, but of black velvet strengthened with whalebone, and fastened behind the head with a padlock.

The following terms are often used with reference to certain periods in the history of Italian literature and art.

1. **Trecento** (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento."
2. **Quattrocento** (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the 15th century. During this period Latin was revived, to the prejudice of Italian.
3. **Cinquecento** (five hundred), from about 1480 to 1550. A sumptuous style of art, founded on the heathen mythology, began to prevail.
4. **Seicento** (six hundred), from 1550 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. **Seicentists** is a term of reproach. The **Trecento** and **Cinquecento** were the most flourishing periods.

ITALIAN REPUBLIC was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte, president, Jan. 1802.

ITALY, a name mythically derived either from Italus, an early king, or *italus*, a bull calf. The invading Pelasgians from Greece, and the Aborigines (Umbrians, O-cans, and Etruscans), combined, form the Latin race, still possessing the southern part of Europe. The history of Italy is soon absorbed into that of Rome, founded 753 B.C. In the middle ages it was desolated by intestine wars and the interference of the German emperors; since then, Spain, France, and Germany struggled for the possession of the country, which has been divided among them several times. Spain, which predominated in Italy during the 16th and 17th centuries, yielded to the house of Austria at the beginning of the 18th. The victories of Bonaparte in 1797-8 changed the government of Italy; but the Austrian rule was re-established at the peace in 1814. In 1818 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky; see *below*. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April, 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily was re-established. 17 March, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On 29 Oct., 1861, the internal government was re-organized, the 59 provinces were placed under prefects, subject to four directors-general. War with Austria was declared 18 June, 1866, and on 3 Oct., peace was signed at Vienna, and Venetia was ceded to Italy; see *below* for the events. The settlement of the kingdom of Italy was consummated by the occupation of Rome as the capital, 1870. Estimated population of the kingdom, 1862, 25,003,635 (Rome was added in 1870). 1878, 28,209,620; Jan. 1882, 28,452,639; 1890, 30,158,408. 1890-91, revenue, 78,126,383; expenditure, 81,850,050; imports, 71,905,383; exports, 51,171,079. JACOBINS.

J was distinguished from I by the Dutch scholars of the 16th century, and introduced into the alphabet by Giles Beys, printer, of Paris, 1550. *Dufresnoy*.

JACOBINS, a name given to the Dominicans in France, because their first convent was the hospital of the pilgrims of St. James (Jacobus), at Paris, at the request of pope Honorius III. (1216-27). The Jacobin club (first called "club breton") consisted of about forty gentlemen and men of letters, who met in the hall of the Jacobin friars, at Paris, in Oct. 1789, to discuss political and other questions. Similar societies were instituted in all the principal towns of the kingdom. The club was closed 11 Nov. 1794.

JACOBITES, a Christian sect, so called from Jacob Baradus, a Syrian, about 541; see *Eutychians*.—The partisans of James II. (Latin, Jacobus II.) were so named after his expulsion from England in 1688-9.

A sentimental revival of Jacobitism appeared in England in 1891, the "White Rose League" having been formed. The marquis de Buxigny and other members of the "Legion des Jacobites" were stopped in their attempt to place a large floral wreath on the tomb of Mary, queen of Scots, in Westminster Abbey, 8 Feb. 1892.

JACOBUS, a gold coin, so called from king James I. of England, in whose reign it was struck, 1603-25.

JACQUARD LOOM, for figured fabrics, invented by Joseph Marie Jacquard, of Lyons, and patented 23 Dec. 1801.

JACQUERIE, a term applied to bands of revolted peasants (headed by one Caillot, called Jacques Bonhomme), who ravaged France during the captivity of king John in 1358, and were quelled with much bloodshed. Similar insurrections occurred in Germany. One was termed the *Bundschuh*, from the large shoe especially worn by peasants, in 1502; and another termed the Bund (or league) of the Poor Conrad, 1514 and 1524, which also cost about 100,000 lives, and led to the insurrection of the anabaptists.

JAFFA, a seaport of Syria, celebrated in scripture as Joppa, whence Jonah embarked (about 862 B.C.), and where Peter raised Tabitha from the dead (A.D. 38); in mythology the place whence Perseus delivered Andromeda. Jaffa was taken by the caliph Omar, in 636; by the Crusaders, 1099; by Saladin, 1193; by Louis IX., 1252; and by Bonaparte, 7 March, 1799; the French were driven out by the British in June, the same year. Here, according to sir Robert Wilson, were massacred 3800 prisoners by Bonaparte; but this is doubted. Jaffa suffered by an earthquake in Jan. 1837, when it is said that 13,000 persons were killed.

JAGELLONS, a dynasty which at times reigned over Lithuania, Poland, Hungary, and Bohemia, beginning with Jagellon, duke of Lithuania (husband of Hedwig, daughter of Louis of Hungary, 1384), who became king of Poland as Ladislaus III. or V. in 1399, and ending with Sigismund II., who died in 1572.

JAINS, see *Jaynes*.

In later days they degenerated from their strict discipline, and several times deposed and killed the sultans. During an insurrection, 14-15 June, 1826, when nearly 3000 of them were killed, the Ottoman army was re-organised by Mahmud II. and a firman was issued on 17 June, abolishing the Janissaries.

JANSENISTS, persons who embraced the doctrine of Cornelius Jansen, bishop of Ypres, who died in 1638. The publication of his "*Augustinus*," 1640, in which he maintained the doctrine of free grace, kindled a fierce controversy, and was condemned by a bull of pope Urban VIII. in 1642. Through the Jansenists Jansenism was condemned by Innocent X. in 1653, and by Clement XI., in 1713, by the bull *Unigenitus*. This bull the French church rejected. Jansenism still exists at Utrecht and Haarlem; see *Port Royalists*. Loos, abp. of Utrecht, died, June, 1873.

JANUARY derives its name from Janus, an early Roman divinity. January was added to the Roman calendar by Numa, 713 B.C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. Mild Januaries in England, 1804, mean temperature, 43° 2'; 1834, 44° 4'; 1846, 43° 7'; 1875, 43° 4'; 1884, 43° 9'. 1894, 43° 5' (on 18 days above 50°).

JAVA, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland by treaty in 1814, and given up in 1816. The English promoted free labour instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labour, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java

led to warm discussions in the Dutch chamber in 1866.

The valuable "History of Java," by sir T. Stamford Raffles (successful governor 1812-16), was published 1817.

Java has a great many volcanoes, and has frequently been devastated by eruptions and earthquakes, those of 5 Jan. 1869, 31 Oct. 1876, and 10 June, 1877, were very destructive.

Java and neighbouring isles desolated by a series of violent eruptions from about two thirds of its 46 volcanoes, beginning with Krakatoa, casting up immense quantities of lava, mud, ashes, and fragments of rocks, darkening the air for about 50 square miles. Mountains were split up, some disappeared, and many new craters were formed. Rumbling noises heard 25 Aug., violent eruptions of Krakatoa 26 Aug. There was much submarine disturbance and an immense "tidal wave" destroyed Amoy and other places, 27 Aug. The high houses in the streets of Banda were swallowed up, and new volcanic peaks appeared, rendering navigation highly dangerous. Loss of life estimated at 35,000, 28 Aug. Great atmospheric oceanic, and electrical disturbances for thousands of square miles between 24th, 1883.

A committee of the Royal Society issued a report on the eruption Oct. 1883.

Serious volcanic outbreak, great destruction, about 100 persons perished, early May 1885.

Insurrection of the natives at Amoy, some Europeans and natives killed, the revolt checked by the police and settled, 16 July, 1888.

JERSEY. The chief island of the channel archipelago (which includes Guernsey, Sark, Alderney, &c.), formerly held by the Romans in the 3rd and 4th centuries after Christ—Jersey being termed *Cæsarea*. The isles were captured by Rollo, and thus became an appanage of the duchy of Normandy, and were united to the crown of England by his descendant, William the Conqueror. The inhabitants of the Channel Islands preferred to remain subjects of king John, at the period of the conquest of Normandy by Philip Augustus, and while retaining the laws, customs, and (until lately) the language of their continental ancestors, have always remained firm in their allegiance to England. Almost every war with France has been characterized by an attack on Jersey, the most formidable of which, under the banner de Bulleucourt, was defeated by the English garrison and Jersey militia, commanded by major Phislon, 6 Jan. 1781. Mr. J. Bertrand Payne, in his "Armorial of Jersey," and his "Gossyping Guide," has exhaustively treated the general and family history of the island. Jersey became a place of refuge for M.M. Rocher, Baroche, Drouin de Lhuys, and other distinguished French imperialists, Sept. 1870. Some of the Trappists and other monks expelled from France, settled in Jersey, 1880-1. JESUITS. The society or company of Jesus, was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonized Having been wounded in both legs at the siege of Pampeluna, in 1521, he devoted himself to theology, and renounced the military for the ecclesiastical profession He dedicated his life to the Blessed Virgin as her knight, made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris,

16 Aug. 1534. He presented his institutes, in 1539, to pope Paul III., who made many objections, but Ignatius adding to the vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, 27 Sept. 1540 The number of members was not to exceed sixty, but that restriction was taken out by another bull, 14 March, 1543, and popes Julius III., Pius V., and Gregory XIII. granted many privileges Loyola died 31 July, 1556 Francis Xavier, and other missionaries, the first brethren, carried the order to the extremities of the habitable globe, but it met with great opposition in Europe, particularly in Paris see *Paraguay* and *Jansenists* The order still exists in many European states contrary to the laws

In early times real and substantial persons were required to pledge themselves to answer to the crown for an embezzlement or fine set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it; and in 1285, 13 Edw. I. sheriffs and bailiffs were, before they made delivery of the distress, to receive pledges for pursuing the suit, and for the return of the property, if return were awarded. But this becoming a matter of form, the fictitious names of Doe and Roe were used until the form was declared to be no longer necessary by the Common Law Procedure Act, 1852.

JULIAN ERA AND YEAR, see *Calendar*. *Julian period* (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714.

JUSTICIARS In ancient times the kings of England used to hear and determine causes, but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labour among persons, men of wisdom and fearing God, and out of such to appoint judges The barons kings of England appointed a judge

after this manner, who was, in fact, the king's deputy. After the Norman conquest, the person invested with that power had the style of *Capitaneus Justiciorum*, or *Justiciarius Anglie*. These judges continued until the erection of the courts of king's bench and the common pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067, and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III). Authorities vary.

KEEPER OF THE KING'S CONSCIENCE. The early chancerys were private, and out of their supposed moral control of the king's mind grew the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common law courts afford no redress. The keeper of the king's conscience is therefore now the officer who presides in the court of chancery, see *Chancellor and Lord Keeper*.

The two offices were made one by 5 July 1563. *Council*, see *Chancellor*. The office of lord keeper of the great seal of Scotland was established in 1708, after the union.

KHARTOUM, capital of Nubia, at the confluence of the Blue and White Nile, built by Mohamed Ali, 1820. Its prosperity was destroyed by the rapacity of the governors. Population in 1877 only about 15,000.

After successful administration of Charles George Gordon compelled to leave Khartoum, and returned to England 1877

In his defence of Khartoum against the Mahdi (from Feb. 1884) he was greatly aided by colonel John Donald Stewart and Mr. Frank Power, correspondent of the *Times* (who were both massacred during an expedition, Sept. 1884). He manifested much military skill, political sagacity, tender humanity, and marvellous power in inducing his followers to overcome serious difficulties and patiently endure great sufferings and privations. Khartoum was surrendered, and Gordon and his faithful followers killed, early on 26 Jan. 1885. See under *Soudan*.

KHERSON, an ancient Dorian colony (deriving its name from Chersonesus, a peninsula), came under the sway of the great Mithridates about 120

B.C.; and afterwards under that of Rome, A.D. 30. It continued important, and its possession was long disputed by the Russians and Greeks. Justinian II. cruelly treated it. It was taken by Vladimir, grand-duke of Russia in 988, when he and his army received Christian baptism, and he married the emperor's sister Anne, who obtained Kherson as her dowry. The city was destroyed by the Lithuanians; and the Turks found it deserted when they took possession of the Crimea in 1475. What ancient remains the Turks and Tartars had spared, the Russians conveyed away for the construction of Sebastopol.

KHERSON, a Russian city on the Unieper, founded 1778. Potemkin, the favourite of Catherine, who died at Jassy in 1791, is buried here, and John Howard, the English philanthropist, who died here, 20 Jan. 1790, is buried about three miles from the town, where an obelisk has been erected to his memory, by the czar Alexander I.

KHIVA (formerly Curassania), in Turkistan, Asia, successively formed part of the territories of the Seleucids, Bactria, Parthia, Persia, and the Califfate, till about 1072, when it was subjugated by the Seljuk Tartars, by the Moguls in 1221, and by Timur the Tartar in 1370, whose descendants ruled till 1511, when they were expelled by the Czbegs, a Turkish tribe who still inhabit the country. An expedition sent against it by the emperor Nicholas of Russia in 1839 perished through the rigour of the climate in 1840. In 1875, colonel F. A. Burnaby reached Khiva, after a perilous ride, when his progress was stopped by Russian jealousy.

The author of the *Impartate* life of St. Patrick, says, "that in 434 he came to a pleasant place where the river Mnasda (Moy) empties itself into the ocean, and on the south banks of the said river he built a noble church called Kil-Aladh, of which he made one of his disciples, Muredach, the first bishop." The see of Achonry was united to Killala in the 17th century; and both were united to Tuam in 1839, see *Tuam and Bishops*

And again, "if any man of English race use an Irish name, Irish apparel, or any other guise or fashion of the Irish, his lands shall be seized, and his body imprisoned, till he shall conform to English modes and customs." Had never to have been enforced. It abolished the Broken laws

A charter was granted to Kilmallock by Edward VI., and another by Elizabeth in 1584. The town was invested by the Irish forces in 1598, but the siege was raised by the earl of Ormond. There was much fighting here in 1641 and 1642, see *Finnians*, March, 1867.

Formerly, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included St. George's Fields, &c. A consequence of the bankruptcy act, 1861, was the release of many insolvent debtors; and an act was passed in 1862 "for discontinuing the queen's prison and removal of the prisoners to Whitecross-street prison." The buildings, used as a military prison, were pulled down and the site sold, 1879-80.

KNEELING. The knee was ordered to be bent at the name of Jesus (see *Philippians* ii. 10), about the year 1275, by the order of the pope. The ceremony of a vassal kneeling to his lord is said to have begun in the 8th century.

KNIGHTS. The word knight is derived from the Saxon *Cniht*, a servant (i.e., servant to the king, &c.). The institution of the Roman knights (*Equites* or horsemen, from *equus*, a horse), is ascribed to Romulus, about 750 B.C., when the curiae elected 300. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon heptarchy. The first knight made by the sovereign with the sword of state was Athelstane, by Alfred, A.D. 900. *Spelman*. The custom of ecclesiastics conferring the honour of knighthood was suppressed in a synod held at Westminster in 1100. *Ashmole's Institutes*. *Salmon*. On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his manor was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. Cervantes' "*Don Quixote*," a

satire on knight-errantry, was published in 1605, see *Basenot, Chivalry, Tournaments, Holy Sepulchre, John, and Michael*

FEMALE KNIGHTS. It is said that the first were the women who preserved Troas from the Moors in 1249, by their stout resistance. Large immunities were granted to the women and their descendants. Several female orders appear in the preceding list. Ladies have been admitted to several male orders.

KNIGHTS OF GLTY AND KERRY IN ISLAND. The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the 13th century. The 19th knight of Kerry died 6th Aug. 1880.

KNIGHTS OF THE SHIRE, OR OF PARLIAMENT: summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort, in 1265, and in a more formal manner, 20 Jan. 1265. There are writs extant as far back as 11 Edward I. 1263. The knights are still girded with a sword when elected, as the writ prescribes.

KNIGHTS OF LABOUR. A large secret trade union in the United States, and to have been originated by a man named Stevens in Philadelphia in 1869, for protection of workmen against capitalists. They were energetic in the promotion of railway and other strikes, especially in Missouri in March, 1886. Head quarters at Philadelphia, May, 1886. The society is condemned by the pope. Decline of the order reported Aug. 1888; active in Aug. 1890.

KNIVES. In England, Hallamshire (the country round Sheffield) has been renowned for its cutlery for five centuries; Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made *fine* knives, &c.; and that he obtained a prohibition of foreign ones, 1563. Clasp or spring knives became common about 1650; coming originally from Flanders.—*Knife-cutting machines* were patented by Mr. George Kent in 1844 and 1852; others have been invented, by Masters, Price, &c.; see *Foras*.

KNOW-NOTHINGS, a society which arose in 1853, in the United States of America. Their principles were embodied in the following propositions (at New York, 1855). They possessed several newspapers and had much political influence:—

1. The Americans shall rule America.
 2. The Union of these States.
 3. No North, no South, no East, no West.
 4. The United States of America—as they are—one and inseparable.
 5. No sectarian interference in our legislation or in the administration of American law.
 6. Hostility to the assumption of the pope, through the bishops, &c., in a republic sanctified by Protestant blood.
 7. Through reform in the naturalization laws.
 8. Free and liberal education—no institutions for all sects and classes, with the Bible, God's holy word, as a universal text-book.
- A society was formed in 1855 in opposition to the above, called *Know-Nothingness*. Both bodies were absorbed into the two parties, Democrats and Republicans, at the presidential election in Nov. 1856.

KÖNIGGRÄTZ (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king William I., 3 July, 1866. Prince Frederick Charles halted at Kammenitz on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7:30 a.m. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 o'clock, and a desperate struggle ensued, the result appearing uncertain, till the army of the crown prince of Prussia arrived about 12:30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The Austrians are said to have lost 174 guns, about 40,000 killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venetia to Italy; and led to the legislative independence of Hungary.

KÖNIGSBERG, the capital of east Prussia, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. India, founded by Baluk Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahometans, an outbreak of the Kookas took place near Loodians, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, on 19 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872. The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

KORAN or ALKORAN (AL KURAN), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. The leading article of faith preached is compounded of an eternal truth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God. *Gibbon*. The Koran was translated into Latin in 1143; into French, 1647; into English by Sale, 1734; and into other European languages, 1763 et seq. It is a rhapsody of 6000 verses, divided into 114 sections; see *Mahometanism*, &c.

By direction of the American minister at Constantinople, captain Ingraham, of the American sloop *St. Louis*, demanded his release; but having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Koszta was then given up. On 1 Aug., the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Koszta returned to the United States.

An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufac- tured, has been increased to forty pounds, ten times the price of standard gold. The masters and mistresses of manor-houses, in former times, served out bread to the poor weekly; and were therefore called *Lafords* and *Lef-days*—signifying *bread piers* (from *hleaf*, a loaf); hence Lords and Ladies. Similar relics discovered in lake Constance, March, 1882; they have also been discovered in Britain and various parts of Europe, Africa, and South America; they are now considered to be evidence of a stage in human progress. LAMIAN WAR, 323 B.C. (excited by Demosthenes, the orator), between Athens and her allies and Antipater, governor of Macedon. Antipater fled to Lamia, in Thessaly, and was there besieged. He escaped thence and defeated his adversaries at Crannon, 322 B.C.

LAMMAS-DAY, the 1st of August, one of our four cross quarter-days of the year. Whitsunide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Ladyday, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* probably comes from the Saxon *lammages*, lamb mass, because formerly upon that day our ancestors offered bread made of

new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

LAMPETER COLLEGE (Gordonshire), was founded by bishop Burgess in 1822, and incorporated 1828 Henry James Prince, founder of the *Agapemone* (which see), was one of the revivalist Lampeter brotherhood, instituted among the students here about 1836.

LAMPS. The earthen lamp of Epictetus the philosopher sold after his death for 3000 drachmas. Lamps with horn sides said to be the invention of Alfred. London streets were first lighted with oil-lamps in 1681, and with gas-lamps in 1814. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand in 1784, and was brought into general use in England early in the present century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825, the moderator lamps of Levasseur, Hadrot, and Newburger. See *Safety Lamp*. Paraffin oil and naphtha spirit are now much used in lamps. The Water Safety Lamp invented by Mr. Devoil was tried and approved 2 June, 1890. The flame is extinguished by the water if the lamp is overturned.

LANARK (W. Scotland), was a Roman station, and made a royal bough 1103.

LANCASHIRE was created a county palatine by Edward III. for his son John of Gaunt, who had married the daughter of Henry first duke of Lancaster, in 1359, and succeeded him in 1362. The court of the duchy chamber of Lancaster was instituted in 1376. On the accession of Henry IV. in 1399 the duchy merged into the crown. Net revenue to the queen in 1888, 50,000*l.*, total receipts, 86,284*l.* For charities, see *Gley*, and other administrations. See *Cotton*.

LANCASTER, supposed to have been the *Ad Alannum* of the Romans. Lancaster was granted by William I or II to Roger de Poitou, who erected a castle upon its hill. It was taken by the Jacobites, Nov. 1715 and Nov. 1745. It was disfranchised for bribery by the Reform act of 1867. The public park, value about 23,000*l.*, was presented by Mr. Jas. Williamson, of Rylands, 21 Nov. 1881. The Storrs Institute (technical), founded by Mr. Thomas Storrs, by a gift of 20,000*l.* in memory of the queen's jubilee in 1887 when he was mayor, opened by the marquis of Hartington, 23 Oct. 1891. Population, 1881, 24,239; 1891 31,038.

LANCASTERIAN SCHOOLS, based on a system of education by means of mutual instruction, devised by Joseph Lancaster about 1796, were not much patronised till about 1808. The system led to the formation of the British and Foreign School society, in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

LANCET, a weekly medical journal, established and edited by Thomas Wakley, surgeon (afterwards coroner for Middlesex and M.P. for Finsbury), first published 3 Oct. 1823. An injunction obtained by Mr. Abernethy against the publication of his lectures in the "*Lancet*," was dissolved by the lord chancellor in 1825. Mr. Wakley died 16 May,

1862. The proprietors of the "*Lancet*" have at various times employed medical men as commissioners of enquiry. The reports of the Analytical Sanitary Commission of the "*Lancet*" in 1851-54, were published by Dr. A. H. Hamall, as "*Food and its Adulterations*," in 1855. The "*Lancet*" commissioners (three physicians) enquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

LAND is said to have been let generally in England for 1*s.* per acre, 36 Hen VIII. 1544. The whole rental of the kingdom was about 6,000,000*l.* in 1600, about 14,000,000*l.* in 1688. In 1798 Mr. Pitt proposed his income tax of 10 per cent. on an estimate of 100 millions, taking the rent of land at 50 millions, that of houses at 10 millions, and the profits of trade at 40 millions, but in his estimate were exempted much land, and the inferior uses of houses. LANGUAGE must either have been revealed originally from heaven, or the fruit of human invention. The latter opinion is embraced by Hæcæ, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldean, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech," *Genesis* x. 1. George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

* *Dominant Language*—Annas Montanus, editor of the Antwerp Polyglott Bible (1547-58); sir Wm. Jones said to have known 114 languages or dialects, and so well, and Niebuhr (1776-1819) knew 20 languages in 1800, and more afterwards; Hans Canon von der Gabelenküew knew many languages critically; he died 3 Sept. 1874, aged nearly 47.

The original European languages were thirteen, viz.: Greek, Latin, German, Slavonian, spoken in the east. Welsh; Basque, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jaegelian, remaining yet in Laburnia, the Chamae, in the north of Hungary; and the Fliano, in east Friesland.

From the Latin spring the Italian, French, Spanish, and Portuguese.

The Turkish is a mixed dialect of the Tartarian. From the Teutonic spring the present German, Danish, Swedish, Norwegian, English, Scotch, &c. There are 3424 known languages, or rather dialects, in the world. Of these, 237 are Asiatic, 587 European; 266 African, and 1624 American languages and dialects.

Adelung In 1861 and 1862 professor Max Muller lectured on the "Science of Language" at the Royal Institution, London. He divides languages into three families:—I. ARYAN (in Sanskrit, noble).

Southern Division: India (Prakrit, and Pali; Sanskrit, dialects of India, Gipsy).

Iranic (Persi; Armeni, &c.).

Northern Division: Celtic (Cymric; Cornish, Welsh, Manx, Gaelic, Breton, &c.).

Italic (Italian, Latin, Umbrian, &c.). Italian, Spanish, Portuguese, French, &c.).

Illyric (Albanian).

Hellenic (Greek, and its dialects).

Teutonic (High German, Middle German, Low German; Gothic, Anglo-Saxon, Dutch, Frisian, English, Scandinavian: Old Norse, Danish, Swedish, Norwegian, Icelandic).

II. SEMITIC: Southern: Arabic (including Ethiopic and Amharic). Middle: Hebrew (Hebrew, Samaritan, Phoenician, and its dialects). Northern: Aramaic (Chaldee, Syriac, Cuneiform inscriptions of Babylon and Nineveh).

III. TURANIAN (from *Tur*, a wilderness). Northern Division: Tungusic (Chin, &c.). Mongolic: Turkish, Samoyed, and Fennic.

Southern Division: Tur (Sanskrit, &c.). Hindalayan: Malayu (Polynesian, &c.). Gangetic, Lomtic (Burmese, &c.). Mundic, Lamlit.

LANGUE D'OC, see *Troubadours*.

LANGUEDOC (a province, S. France), formed part of the Roman Gallia Narbonensis; was named Gothia, as having been held by the Visigoths 409, who were expelled by the Saracens, in turn driven out by Charles Martel in the 8th century. In the dark ages the country was named Septimania (probably from its containing seven important towns), afterwards Languedoc (from its dialect, see *Troubadours*), about 1270, when annexed to the monarchy. It suffered during the persecutions of the Albigenses and Huguenots.

LANSDOWN, near Bath (Somersetshire). The parliamentary army under sir Wm. Waller was here defeated, 5 July, 1643.

LANTERNS of scented horn were invented in England, it is said, by Alfred; and it is supposed that horn was used for window lights also, as glass was not generally known, 872-901. *Notre* London was lighted by suspended lanterns with glass sides, 1415.

LANTHANUM, a rare metal discovered in the oxide of cerium, by Mosander in 1839.

LAON (N. France). A succession of actions between the allies (chiefly the Prussians) and the French, was fought under the walls of the town, which ended in the defeat of the latter with great loss, 9-10 March, 1814. Laon surrendered to the Germans 9 Sept. 1870. As the last man of the garde mobile left the citadel, a French soldier, in contravention of the capitulation, blew up the powder magazine, causing great destruction to the town and fortress. The grand-duke William of Mecklenburg-Schwerin was bruised, and 95 German riflemen and 300 French garde mobiles were killed or wounded; general Thiermain Du Hamel, the commander, was wounded. The French attributed the explosion to accident.

LA PEROUSE'S VOYAGE. In 1785 La Perouse sailed from France for the Pacific, with the *Bonsole* and *Astrolabe* under his command, and was last heard of from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was obtained until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on the New Hebrides, authenticated by articles which he brought to Calcutta, 9 April, 1828.

LAPLAND or SAMELAND (N. Europe), nominally subject to Norway in the 13th century, and now to Sweden and Russia. Several Laplanders were exhibited at the Westminster Aquarium, Nov. 1877.

LARYNGOSCOPE, an instrument consisting of a concave mirror, by which light is thrown upon a small plane mirror placed in the posterior part of the cavity of the mouth. By its means the vocal chords of the interior of the larynx, &c., are exhibited, and have been photographed. It was invented by M. Manuel Garcia, and reported to the Royal Society 24 May, 1855. One constructed by Dr. Turk was greatly modified, in 1857, by Dr. Czerniak, who exhibited its successful action in London in 1862. A similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846. The British Laryngological and Rhinological Association was founded in 1883.

LA SALETTE, see *Pilgrimages*.

LATERAN, a church at Rome, dedicated to St. John, "the mother of all the churches," was originally a palace of the Laterani, a Roman family, and was given to the bishops of Rome by Constantine, and inhabited by them till their removal to the Vatican in 1377. Eleven councils have been held there.

LATHR. The invention is ascribed to Taliesin, a grandson of Diodorus, about 1240 A.C. Many ascribes it to Theodorus of Samos, about 600 B.C. Great improvements have been made in recent times.

LATHOM-HOUSE (Lancashire), was heroically defended for three months against the parliamentarians, by Charlotte, countess of Derby. She was relieved by prince Rupert, 27 May, 1644. The house was, however, surrendered 4 Dec. 1645, and dismantled.

LATIN KINGDOM, EMPIRE, &c, see *Latium*, *Eastern Empire* 1204, and *Jerusalem*.

LATIN LANGUAGE (founded on the Oscan, Etruscan, and Greek), one of the original languages of Europe, and from which sprang the Italian, French, and Spanish, see *Latium*. A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelinus, brother of Ina, in the 7th century. The use of Latin in law deeds in England gave way to the common tongue about 1000, was revived in the reign of Henry II, and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveyancing and in courts of law in 1731 (by 4 Geo II c. 25). A corrupt Latin is still spoken in Roumelia. The foreign pronunciation of Latin (a, ah, e, u, i, c, &c.) was adopted in English universities and many schools about 1875-6. For "Latin name," see *Latium*.

LATIN UNION (Monetary), that of France, Italy, Belgium, and Switzerland, to maintain the use of the same coinage, from 1865 to 1890, re-constituted in 1885, arranged to be continued from year to year, autumn 1889, renewed till 31 Dec. 1893, Oct. 1897.

LATITAT, an ancient writ, directing the sheriff to apprehend persons to be brought before the king's bench court, had its name from its being supposed that the person was lying hid and could not be found in the county to be taken by bill. The writ was abolished by the Uniformity of Process act, 23 May, 1832.

LATTITUDE. First determined by Hipparchus of Nice, about 162 B.C. It is the extent of the earth or the heavens, reckoned from the equator to either pole. Maupertius, in 1737, in latitude 66-30 measured a degree of latitude, and made it 69,723 miles. Swenberg, in 1803, made it 69,292. At the equator, in 1744, four astronomers made it 68,732; and Lacaille, in latitude 12, made it 68,743.

Mudge, in England, made it 69,128. Cassini, in France, in 1718 and 1740, made it 69,12; and Biot, 68,769; while a recent measurement in Spain makes it but 68,63—less than at the equator, and contradicts all others, proving the earth to be an oblate spheroid (which was the opinion of Cassini, Bernoulli, Euler, and others), instead of a prolate spheroid, see *Longitude*.

LATITUDINARIANS, a name given to certain theologians who endeavoured to reconcile the church and nonconformists in the 17th century such as Hales, Chillingworth, Tillotson, and Burnet.

LATIUM, now **CAMPANIA** (Italy), the country of the Latins and their mythical king, Latinus, popular date, 1240 B.C. Laurentum was the capital of the country in the reign of Latinus, Latium in that of Anagnin, and Alba in that of Ascanius, see *Italy*, and *Rome*.

See Mississippi. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French minister accepted it, and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France, and the deluded rich subscribed for shares both in the bank and the companies. In 1721 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value, so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729. — *The South Sea Bubble in England occurred in 1720, see South Sea.*

LEAP-YEAR or **BISSEXTILE**, originated with the astronomer of Julius Cæsar, 45 B.C. They fixed the solar year at 365 days, 6 hours, compris-

ing, as they thought, the period from one vernal equinox to another, the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called *intercalary*, and was placed a day before the 24th of February, the sixth of the calendar, which was reckoned *twice*, hence called *bissextile* or *twice sixth*. This added day with us is Feb. 29th; see *Calendar*. This arrangement makes the year nearly three minutes longer than the astronomical year to obviate this, 1700 and 1800 were not, and 1900 will not be leap-years, but 2000 will be one; see *Calendar* and *Year*.

LEARNING AND **THE ARTS** flourished among the Greeks, under Pisistratus, 537 B.C., and especially under Pericles, 443 B.C.; and with the Romans at the commencement of the Christian era, under Augustus. The Greek refugees caused their revival in Italy, particularly after the taking of Constantinople by the Turks in 1453, and the invasion of printing shortly before, — the period of the *Renaissance*. The duty on leather imposed 1697, produced annually in England, 450,000*l*, and in Ireland about 50,000*l*. It was abolished, 29 May, 1830. Many bankruptcies were declared in the leather trade, in the autumn of 1860 in England. In the case of Lawrence, Mortimore, and Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, &c., was made known in 1860. — *Leather cloth* (invented by Messrs. J. R. & C. P. LEVELLERS, a fanatical party in Germany, headed by Muncer and Stork in the 16th century who taught that all distinctions of rank were usurpations on the rights of mankind. At the head of 40,000 men, Muncer commanded the anarchy of princes of Germany and the magistrates of cities to resign their authority, and on his march his followers ravaged the country. The landgrave of Hesse at length defeated him at Frankenhäusen 15 May, 1525. 7,000 of the enthusiasts fell in the battle, and the rest fled, their leader was taken and beheaded at Muhlhausen. The English "Levelers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburne imprisoned. At the period of the French revolution some Levelers appeared in England. A "Loyal Association" was formed against them by John Reeves, Nov. 1792.

LEVELS. The great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overthrown by the sea during an earthquake, 368. It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained—by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenets king. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A general

drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I, who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners, but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652. He also reclaimed much valuable land at Axholme, in Lincolnshire, 1626-30, and many Dutch and French protestants settled here about 1634, and a few of their descendants still remain—these are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807) and of Telford (1810) and of other eminent engineers. The Middle Level commences (it) through certain barrier banks, and replaced them by other works 1844. These were reported upon in March and the outfall sluice at St Germain's near King's Lynn, gave way 4 May, 1868. High tides ensuing, about 6,000 acres of fertile land were inundated (causing a loss of about 25,000). After unavailing and for a while unsuccessful efforts, a new coffer dam was constructed under the superintendence of Mr Hawkeshaw which was reported sound July. Another inundation began through the bursting of a marshland sluice near Lynn was checked 4 Oct. New outfall sluice opened 26 Nov 1877.

In commemoration the university was founded, 1575. In 1669 two-thirds of the population perished by a fever, which, it was said, was aggravated by the improper treatment by professor De la Boe. The university was almost destroyed by a vessel laden with 10,000 lbs. weight of gunpowder blowing up,

LIBEL. By the Roman laws of the Twelve Tables, libels which affected the reputation of another were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion and esteem of the world, is deemed a libel. "The greater the truth the greater the libel," the well known law maxim of a high authority, is now disputed, see *Trials*, 1758, 1790, 1792, 1803, 1808 et seq, 1863, 1882, and (note) *Patents and Times*.

Lord Denham in giving judgment said he was not aware that the libelous nature of the house of commons could justify the publication of a libel—an opinion which led to some proceedings on the part of the house, and to the actions by Stockdale 1837 39.

Verdicts were given in his favour, and in Nov 1839 the sheriff, to the possession of Hansard's premises. This caused much excitement in parliament, and they were ordered to appear at the bar of the house of commons and were formally committed to the custody of the sergeant at arms at Jan. but immediately discharged, the conflict was maintained by the law officers and the commons till 20 1/2, 2640.

LICHFIELD (Staffordshire) The see of Merus (at Lichfield) was founded about 656, removed to Chester, 1073, to Coventry, 1102. In 1112 Robert Peche was consecrated bishop of Lichfield and Coventry. By an order in council, Jan 1837, the archbishopric of Coventry was added to the see of Worcester, and Dr Samuel Butler became bishop of Lichfield. This see has given three cardinals to the Roman church, and to the British nation one lord chancellor and three lord treasurers. It is valued in the king's books at 5500 l. 18 s. 2d Present income, 42000 l. Population, 1881, 5,349, 1891, 7,864.

Lichfield cathedral was first built about 656, the present structure was founded by Roger de Clinton, the

17th bishop, in 1198. Walter de Langton (bishop in 1296), built the chapel of St. Mary, now taken into the choir, and under bishop Heyworth (1420) the cathedral was perfected. The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows, were demolished). It was repaired at the restoration, 1660, in 1788, and by Gilbert G. Scott, 1850-53 and 1854. In Lichfield castle, king Richard II. kept his Christmas festival, 1357, when 300 tons of wine and 2000 oxen were consumed. After much opposition these were carried, and L. Sextus became the first plebeian consul, 366. Another law, 56 B.C. of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes, and another, about 103 A.C. (brought forward by P. Licinius Crassus), limited the expenses of the table.

LIFE-PRESSURE, the apparatus of capt. Manby (brought into use in Feb. 1863), effects a communication with the distressed vessel in a rope, thrown by a shot from a mortar, with a line attached to it. For the night, a night ball is provided with a hollow case of thick pasteboard, and a fuse and quick match, and charged with fifty balls, and a sufficiency of powder to inflame them. The fuse is so graduated that the shell shall explode at the height of 300 yards. The balls spread a brilliant light for nearly a minute, and give a clear view of every surrounding object. In 20 years, 28 vessels and 410 of their crews and passengers had been saved. Capt. Manby died 18 Nov. 1854, aged 89, see *Bodley*.

LIGHTING UP (Towns &c.), see *London*, 1634, 1694, *Gas and Electric Light*.

LIGHTNING-CONDUCTORS were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. Richmann, of St Petersburg, was killed while repeating these experiments, Aug. 1752. The first conductor in England was set up at Payne's Hill, by Dr Watson. In 1766 one was placed on the tower of St Mark at Venice, which has since escaped injury, although frequently injured by lightning previously. A powder magazine at Glasgow in 1765, was saved by a conductor in 1782, and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1766 and above 3000 persons perished. In 1762 Dr Watson recommended conductors to be used in the navy, and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr (afterwards Sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work, in 1843, detailing his experiments. In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted him 5000*l*.

LIME or LINDEN TREE, probably introduced in the 16th century. The trees in St James's park are said to have been planted at the suggestion of Evelyn who recommended multiplying orniferous trees, in his "Knumfugium" (1661). A lime-tree planted in Switzerland in 1410, existed in 1720, the trunk being thirty six feet in circumference.

It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland lighthouse in 1861. Lieut Drummond was born, 1797, died 15 April, 1840. To him is attributed the maxim that "property has its duties as well as its rights."

It was taken by Irton after six months siege in 1690. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honourable terms, 3 Oct. 1691. An awful explosion of 218 barrels of gunpowder greatly shattered the town, killing 100 persons, 1 Feb. 1694. Another explosion of gunpowder here killed many persons, 2 Jan. 1837. LINCOLN'S INN (London), derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I.,

which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn-fields were laid out by Inigo Jones, about 1620, and erroneously said to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn-square being 821 feet by 625 feet 6 inches. William lord Russell was beheaded in Lincoln's-inn-fields, 21 July, 1683. The square (formed in 1618) was enclosed with iron railings about 1737. The new hall and other buildings were opened, 30 Oct. 1845, and the square planted. A lion named Pompey died in the Tower of London in 1766 after 20 years' confinement. Mr Gordon Cumming the lion-slayer published his "Sporting Adventures in North Africa" in 1850. Van Amburgh was very successful in taming lions, but many have perished through malice. The lion-queen was killed at Christham 1890 and Massart (John Motirhy) was killed by a lion, 11 Jan. 1872.

The cathedral, built 636, was repaired by Cormac, son of Murtagh, king of Munster, about 1130. The bishopric was united to that of Waterford, about 1363, and both to Cashel in 1839.

The *Acilifantus* was surrounded and sunk in the Adriatic. The *Re di Sardinia* disabled the Austrian iron clad battleship *Kaiser* and on 10 October to run ashore. LITHOFRACATURE, or "STONE-BREAKER," an explosive material, a modification of dynamite (composed of gun-cotton, nitro-glycerine, with the constituents of gunpowder, and other substances), invented by professor Engels of Cologne, and made by Krebs, in 1860. It was occasionally used by the Germans in the war 1870-1, and was tried and well reported of for power and safety at Nant Mawr quarries, near Shrewsbury, 9, 10 May, 1871, and again on 20 Feb. 1872, before the government at explosive committee, with similar results.

LITHOGRAPHY (drawing on stone). The invention is ascribed to Alois Sennefelder, about 1796, and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801, *et seq.*, but its general introduction is referred to Mr Ackermann, of London, about 1817. Sennefelder died in 1841. Improvements have been made by Engelmann and many others; see *Printing in Colours*.

LITHOSCOPE. An instrument for distinguishing precious stones, invented by sir David Brewster; described by him Jan. 1864.

LITHOTOMY. The surgical operation of cutting for the stone, it is said, was performed by Ammonius, about 240 B.C. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The "high apparatus" was practised (on a criminal at Paris) by Colot, 1475, by Franco, on a child,

about 1566; and in England, by Dr. Douglass, about 1519. The "lateral operation," invented by Franco, much performed in Paris by Frère Jacques, in 1697, has been greatly improved. The "great apparatus" was invented by John de Roussin, and described by his pupil Mariannus Sanctus, 1524.

LITHOTRITY (or bruising the stone). The apparatus produced by M. Leroy d'Etiolles in 1822 has since been improved.

Prizes of 6000 and 10,000 francs were awarded M. Jean Civiale for his method of operation, 1827 & 1829.

LITHUANIA, formerly a grand-duchy, N. E. of Prussia. The natives (belonging to the Slavonic race) long maintained their independence against the Russians and Poles. In 1386, their grand-duke Jagellon became king of Poland and was baptized: Lithuania was not incorporated with Poland till 1501, when another duke Castuir, became king of that country. The countries were formally united in 1569. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

LITURGIES (from the Greek *leitōn*, public, and *ergon*, work). The Greek and Roman liturgies are very ancient, having been committed to writing about the 4th and 5th centuries. The Romish church recognises four: the Roman or Gregorian, the Ambrosian, the Gallican, and the Spanish or Mozarabic. The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius, 250, to St. Ambrose (died 397), and to St. Jerome (died 420).

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547 & 8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them, and published 1549 and 1552.

At the solicitation of Calvin and others, the liturgy was renewed and altered.

It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1557, and was withdrawn.

The liturgy was revised by Whitehead, formerly chaplain to Anne Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, deans May, and secretary Smith.

John Knox is said to have used a liturgy for several years. The rev Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1580; he soon after resumed it, and the discussion on the subject ceased only at his death, 24 March, 1608.

See *Common Prayer*.

LIVERIES OF THE CITY OF LONDON. The term is derived from the custom of the retainers of the lord mayor and sheriffs wearing clothes of the form and colour displayed by those functionaries. Liveries were regulated by statute in 1302, and frequently since. The nobility gave liveries to their retainers. See *Companies*.

LIVERPOOL (W. Lancashire), is supposed to be noticed in Domesday-book under the name *Esmadene*, or *Smadene*. Soon after the conquest, William granted that part of the country situated between the rivers Mersey and Ribble to Roger of Poitiers, who, according to Camden, built a castle here, about the year 1089. It afterwards was held

* Meyer Hydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, was arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1788, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since well supported. Williams was in early life a dissenting minister, and wrote on education. He was consulted by the early revolutionary party in France as to the form of a constitution for that country; i.e., Dr. Priestley, sir James Mackintosh, and other distinguished Englishmen, having been previously declared French citizens. He died 29 June, 1816.

* In other ancient records its appellations are *Litharpiul* and *Lyrpiul*, signifying probably in the ancient dialect, the lower pool, though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Laver," or from a sea-weed of that name; and others from its having belonged to a family of the name of Lever, whose antiquity is not sufficiently established to justify their conclusion.

LLOYD'S (London), at the Royal Exchange about 1692. A coffee house, kept by Edward Lloyd, Abchurch Lane, became a place of meeting of merchants. After several removals it was established finally at the Royal Exchange in 1774, and remained there till the fire in 1834, when it was removed till the present building was completed in 1844. Here were eminent merchants and shipowners and here are offered to the public all the news and intelligence. A Register of ships began about 1700, and the terms A. I. & C. were used about 1775. Two centuries (and writers and merchants) were named in our register issued, Oct. 1834. Subscriptions began 31 Oct. 1834. Lloyd's was supported by subscribers who now pay annually £50, formerly £40. The books kept here contain an account of the arrival and sailing of vessels, and the remarks of their intelligent owners, and of other maritime affairs. Many new signalling stations established 1832. First annual issue of the Universal Shipping Register published here, May, 1836. In 1840, the subscribers in London to the *Lancet* Fund (and so, the *British Lloyd's*) an association in general commercial and industrial purposes, was founded at Fleet Street, by Ben Brink in 1833. It has established a regular communication between London and the Continent, by means of a fleet of steamers carrying the mails, and publishing a journal.

LODGING-HOUSES. An act placing common lodging-houses under the watch of the police was passed in 1851. In that year a model lodging-house erected by prince Albert appeared at the Great Exhibition. Since then, blocks of lodging-houses for the poor have been erected by Baroness Burdett-Coutts and others. LOGARITHMS, the indexes of the ratio of numbers one to another, were invented by John Napier, baron of Merchiston, who published his canon, or table, in 1614. The invention was completed by Mr. Henry Briggs, at Oxford, who published tables, 1616-18. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's bones*.

It is divided into spaces of 50 feet, and the way which the ship makes is measured by a half-minute sand-glass, which bears nearly the same proportion to an hour that 50 feet bear to a mile. The line used in the royal navy is 48 feet.

LOI DES SUSPECTS, enacted by the French convention, 17 Sept. 1793, during the reign of terror, filled the prisons of Paris. The Public Safety bill, of a similar character, was passed, 18 Feb. 1858, shortly after Oussini's attempt on the life of the emperor, Napoleon III.

LOLLARDS (by some derived from the German *lollen*, to sing in a low tone, by others derived from the English verb to loll or lounge) the name given to the first reformers of the Roman catholic religion in England, the followers of Wycliffe. The sect is also said to have been founded in 1315 by Walter Lollard, who was burnt for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy. The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burnt alive. Sir John Cobham, lord Oldenstle, a follower of Wycliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burnt, 25 Dec. 1418. Lollards' tower, part of the bishop's prison, was near St. Paul's, not Lambeth palace. *Dr. Maitland*.

LOMBARDISTS, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

LOMBARD MERCHANTS, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. *Anderson*. Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tithes which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1299. They had offices in

The monks stayed after them in this day. Their numbers immediately caused their expulsion from the kingdom in the reign of Alaric.

LOMBARDY (N. Italy) derived its name from the Lombards, a German tribe from Scandinavia, said (probably) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was deposed by Charlemagne. (For a list of the Lombard kings, see Italy.) About the end of the ninth century the chief towns of Lombardy fortified themselves, and became republics. The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On 20 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another league was formed against Frederick II., which was also successful. After this, petty tyrants rose in most of the cities, and foreign influences quickly followed. The Guelph and Ghibelline factions greatly distracted Lombardy, and from the 13th century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of Italy. On the breaking up of the French empire in 1815, the **LOMBARDO-VENETIAN KINGDOM** was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848, but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1840. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossed the Ticino and entering Piedmont. The French emperor declared a war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, 20 May; Palestro, 30, 21 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the new kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867. Population 1890, 3,906,958.

LONATO (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

LONDON, the capital of the British empire. The earliest history is traditional. The Celtic name is said to have been *Lyn-din*, lake-fort; Tacitus in the first century, calls it *Londinium*; and describes it as a flourishing trading city; it was afterwards called *Augusta*, an appellation frequently given to great cities; several other forms of the name appear in documents, such as *Lundenbyrig*, *Lundenia*, and *Lunden-wit*. In 1860, London and the suburbs were estimated to cover 121 square miles (11 miles each way, being there then as large as in 1800; in 1860, 1st square mile. See *Docks, Mayors, Metropolitan Board of Works, London County Council, and Treaties*.

The town appears to have prospered under British, Roman, and Saxon rules, and to have been much indebted to Alfred and his successors, but suffered greatly by the Danes, it was not attacked by William I., by whom the citizens were conciliated, and its corporate government was reorganised by his son Henry I. The city received many favours from the Plantagenet kings, but frequently resisted their exactions. London is governed by the lord mayor, the court of aldermen, the common council, and other officers. London was not included in the municipal corporations Act, 1835. The London county council was constituted by the local government Act passed in 1888.

* This terrible pestilence broke out in India, and spreading rapidly passed through every country on the globe, reached England. Its ravages in London were so great, that the common carriages were not sufficient for the interment of the dead; and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter-house, where upwards of 50,000 bodies were then deposited. This disorder did not sub-

LONDON BRIDGE. The first bridge said to have been built 994, was much injured by the Danes 1008 and destroyed by a flood 1091. Another bridge erected by command of William II., was burnt in 1136. The late old bridge was commenced about 1176, by Peter of Colechurch, and completed in 1209, with houses on each side, connected together by large arches of timber which crossed the street.

A fire at the Southwark end brought crowds on the bridge, the houses on the north end caught fire likewise, and prevented their escape, and upwards of 3000 persons lost their lives, being either killed, burned, or drowned. July, 1212

The bridge restored in 1300, again destroyed by fire in 1472. 13 Feb. 1632 aul. Sept. 1725

LORDS. The nobility of England date their creation from 1066, when William Fitz-Osborn is said to have been made earl of Hereford by William I.; and afterwards Walter d'Erreux, earl of Salisbury; Copsi, earl of Northumberland; Henry de Ferrers, earl of Derby; and Gherbod (a Fleming) earl of Chester. Twenty-two other peers were made in this sovereign's reign. The first peer created by patent was lord Beauchamp of Holt Castle, by Richard II. in 1387. In Scotland, Gilchrist was

created earl of Angus by Malcolm III. 1037. In Ireland, sir John de Courcy was created baron of Kingsale, &c., in 1181; the first peer after the obtaining of that kingdom by Henry II.

LORDS, HOUSE OF. The peers of England were summoned *ad consensum*, to consult, in early reigns, and by writ, 6 & 7 John, 1205; but the earliest writ extant is 49 Hen. III. 1265. The commons did not form a part of the great council of the nation until some ages after the conquest; see *Parliament*. The house of lords includes the spiritual as well as temporal peers of Great Britain. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. Some of the temporal lords sit by descent, and some by creation: others by election, since the union with Scotland in 1707, and with Ireland, 1801.—Scotland elects 16 representative peers, and Ireland, 28 temporal peers for life. The house of lords in Jan. 1892, consisted of 6 princes of the blood, 2 archbishops, 20 dukes, 21 marquises, 138 earls, 31 viscounts, 313 barons, and 24 bishops; in all, 555.

MACADAMISING

MACADAMISING, a system of road-making invented by Mr John Macadam, and published by him in an essay, in 1819 having patented it in Ayrshire. He proscribed stones to be broken to six ounce weight, and the use of claustrum and granite chippings. He received 10,000*l* from parliament, was appointed surveyor-general of the metropolitan roads in 1827 and died in 1836, see *Roads*

MACAO (in Quina-ton, S China) was given to the Portuguese as a commercial station in 1586 (in return for the assistance against pirates), subject to an annual tribute which was remitted in 1886. Here Camoens composed part of the *Lusad*. The abuses of the Coolie trade by the Portuguese led to its abolition here by the British and Chinese governments in 1873

MACARONI This name given to a poem by Theophrastus Solengio 1509 continues to designate titling performances, or buffoonery, plus imitations, 'wit with a dash', and in our without sense'. His poem was so called from its nutritive preparation of wheat-flour in tubes and threads. These poems, in Italy and France, gave rise to *Macaroni academies* and in England to *Macaroni clubs* (about 1772) when everything alien to dress and manners was excluded. *Macaroni*

MACCABEES a name of the Jews who commenced their career during the persecution of Antiochus Epiphanes, 167 B.C. Maccabees, against, received the surname, and his son Judas Maccabeus defeated the Syrians in three battles, 166, 165, B.C., but fell in the third battle. His brother Jonathan made a league with the Romans and Luccadonians, and after an all administration was treacherously killed at Bethsura by Simon, 143 B.C. His brother and successor Simon was also murdered 135 B.C. John Hyrcanus, son of Simon, succeeded. His son Judas called also tritobulus, took the title of king 107 B.C. The history of the Maccabees is contained in six books of that name, two of which are included in the Apocrypha. Four are accounted canonical by the Roman Catholic church, none by Protestant communions.

The magnificent Maccabees chapel at Glastonbury is the original Jean de Bruges' chapel of the town of Glastonbury. It was founded in 1141. The building was injured in 1539 at the time of the Reformation. It was then converted into a prison and fitted up as a museum.

MACCLESFIELD CHURCH was incorporated in 1260, dissolved in 1845. The church of St Michael was founded by Queen Eleanor in 1278, the grammar school in 1502. Population, 1881, 37,514, 1891 36,009.

MACDONALD AFFAIR, see *P. 1881*, 1861

MACE, a weapon anciently used by the cavalry of most nations, was originally a spiked club, hung at the saddle-bow, and usually of metal. Maces were also early emblems of authority borne by officers of state, the top being made in the form of an open crown, and commonly of silver gilt. The lord chancellor and speaker of the house of commons have maces borne before them. Edward III granted to London the privilege of having gold or silver

maces carried before the lord mayor, sheriffs, aldermen, and corporation 1351. It was with the mace usually carried before the lord mayor on state occasions that Walworth, lord mayor of London, is said to have knocked the rebel Wat Tyler off his horse for rudely appearing, touching Richard II, a courier afterwards catching him with his dagger, 15 June, 1381. Cromwell, entering the house of commons to disperse its members and dissolve the parliament, ordered one of his aides to 'take away that bubble,' the mace, which was done, and the doors of the house closed 20 April, 1653.

MADEIRA, an island, N. W. coast of Africa, discovered, it is said, in 1344, by Mr. Machum, an English gentleman, or mariner, who fled from France for an illicit amour. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Aragon, which occasioned the report that the island was discovered by a Portuguese, 1345. It is asserted that the Portuguese did not visit this island until 1419 or 1420, or colonise it until 1431. It was taken by the British in July, 1801; and again by admiral Hood and general Beresford, 24 Dec. 1807, and retained

in trust for the royal family of Portugal, who had emigrated to the Brasils. It was restored to the Portuguese in 1814. In 1748 it was besieged by the French, who were

permitted to take possession of the city on condition of its being restored at the peace then negotiating. In Feb. 1793, Maestricht was unsuccessfully attacked by the French, but they became masters of it, Nov. 1794. In 1814 it was made part of the kingdom of the Netherlands, and now belongs to Holland. The convent of Naples was endowed by queen Sancha, 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Leo X. in 1515, and favoured by Clement VIII. in 1594. The Magdalen hospital, London, was founded in 1758, under the direction of Dr. Dodd. The asylum in Dublin was opened in June, 1760.

MAGDEBURG (Prussia). The archbishopric was founded about 967. The city suffered much during the religious wars in Germany. It was besieged and taken by the elector Maurice, Nov. 1550, and Nov. 1551; blockaded for seven months by the imperialists, under Wallenstein, in 1629; and barbarously sacked by Tilly on 10 May, 1631.

It was given to Brandenburg in 1648, was taken by the French, 8 Nov 1806, annexed to the kingdom of Westphalia, 9 July, 1807, restored to Prussia, May 1813. Valuable fine art collection burnt 4 April, 191. Population, 1890, 202,325.

The *Method by Experiment* is shown by means of a hollow sphere composed of two hemispheres fitting air tight. When the air is exhausted by the air pump, the hemispheres are held together by the pressure of the atmosphere and require great force to separate them. The apparatus was suggested by Otto von Guericke, the inventor of the air pump. He died in 1686. *Brunle*

MAGELLAN, STAIRS OF (connecting the Atlantic and Pacific oceans), was passed by Ferdinand Magellan (Magellan), Portuguese, on 2 Nov 1520. He gave the latter ocean its name on account of its calmness. Magellan completed the first voyage round the world, with a fleet of discoveries fitted out by the emperor Charles V, but was killed in 1521. The Spaniards had a fort here, called *Cape Kaumu*, because the garrison perished of cold with.

MAGENTA, a small town in Lombardy, near which the French and Austrians defeated the Austrians, 4 June 1859. The emperor Louis Napoleon commended him and the king of Sardinia were in the thickest of the battle. It is said that 5,000 French and Sardinians and 7,000 Austrians were killed. The former are asserted to have lost 10,000 killed and wounded, and the Austrians 10,000 besides 7,000 prisoners. The French generals Lamortise and Cler were killed. The arrival of General MacMahon during a deadly struggle between the Austrians and the French greatly contributed to the victory. The contest near the bridge of Buffalora was very severe. The Austrians fought well, but were badly commanded; the emperor and king entered Milan on 8 June following. MacMahon and Regnaud de Segur were created marshals of France. A monument erected here in memory of the battle was solemnly inaugurated 4 June 1882 — the red disc, resembling, obtained by chemists from galena, is termed *magenta*, see *Aniline*.

MAGI an order of priests and teachers among the ancient Medes and Persians with much political power. One of them was on the death of a king assassinated but he was succeeded as a son of Cyrus and claimed the throne of Persia was deposed by Darius. Histories, 521 B.C. and a massacre of the Magi followed. They retained their religious position till the later Roman empire. The constitution of the order is traditionally assigned to Zoroaster the Zoroastrian of the Zoroastrian, whose time and very existence are uncertain the 6th century B.C. being mentioned. He is said to have taught the knowledge of Ormuzd, the supreme god principle to the Magi whom he classified as learner masters and perfect scholars, the possession of all spiritual power and the science of the ages, see *Persians*. The name Magi has been applied to the "wise men" of *Matthew* and the *Parascees* at Bombay are descendants of the Guebres or fire worshippers.

MAGIC, see *Alchemy*, *Witchcraft*, &c. The invention of the MAGIC LANTERN is ascribed to Roger Bacon, about 1260, but more correctly to Athanasius Kircher, who died 1680. Sir David Salomon in a discourse at the Royal Institution on "Optical Projection," exhibited in arrangement of the magic lantern in which by the use of lenses magnifying up to 4,500 diameters he stated that he was enabled to magnify a postage stamp to the size of 24 acres 26 Feb 1892. See Godwin's "Lives of the Necromancers," 1834, and Kunikmoer's "History of Magic," translated by W. Howitt, 1854.

MAGISTRATES, see *Justices*. Stipendiary borough magistrates may be appointed by 5 & 6 Will IV c 76, 1835, and by 26 & 27 Vict c 97, 1863. The present arrangement of metropolitan magistrates (the chief sitting at Bow-street) was made by acts of parliament in 1792 and 1839. Eleven courts were appointed in 1840. Their salaries raised from 25 Marston, 1875. Henry Fielding, the novelist was acting magistrate for Westminster at Bow-street. He was succeeded by his half-brother, Sir John Fielding, in 1761, by

MAGNA CHARTA Its fundamental principles were derived from Saxon charters, continued by Henry I and his successors. On 20 Nov 1215 the archbishop of Canterbury and the barons met at St. Edmundsbury. On 6 Jan 1215, they presented their demands to King John, who deferred his answer. On 19 May they were answered by the pope. On 24 May they marched to London, and the king was compelled to yield. The charter was sealed by John at Runnymede, near Windsor, 15 June 1215. It was many times confirmed, by Henry III and his successors. This first king's grand charter was granted in 1225, and was assured by Edward I, see *Forrest*. The original MS. charter is lost. The first MS. copy, which is at Lincoln, was reproduced by photolith in the National MSS. published by government, 1865.

MAGNA GRECIA, the independent states founded by Greek colonists in South Italy, Sicily, &c. Cumae, in Campania, is said to have been founded in 1034 B.C., Pandosia and Metapontum in 774 B.C. The settlements were ruined through siding with Hannibal when he invaded Italy, 216 B.C.

MAGNESIUM, a metal first obtained from magnesia by Sir Humphry Davy in 1808, and since produced in larger quantities by Bunsen, Deville, and especially by Mr. E. Berthoud, in 1862-4. Its light when burnt is very brilliant, and is so rich in chemical rays that it may be used in photography. Lamps made for burning magnesium wire, were employed by the excavators of the tunnel through Mount Cenis. By its light photographs of the interior of the Pyramids were taken in 1865. Larkins

MAGNETISM The attractive power of the loadstone, or magnet, was early known, and is referred to by Homer, Aristotle, and Pliny; it was also known to the Chinese and Arabians. The Greeks are said to have obtained the loadstone from Magnesia in Asia, 1000 B.C. Roger Bacon is said to have been acquainted with its property of pointing to 'the north' (1294). The invention of the mariner's compass is ascribed to Flavio Gioia, a Neapolitan, about 1310, but it was known in Norway previous to 1266, and is mentioned in a French poem, 1150. MAHOMETANISM embodied in the Koran, includes—the unity of God, the immortality of the soul, predestination, a last judgment, and a sensual paradise. The Mohammedans are divided into several sects: the two chief being the Sunnites or the Orthodox

(who recognize as caliph Abu Bekr the father in law of Mahomet in preference to Omar and Ali) and the *Shi'ite* (Sectaries) or *Fatimites* the followers of Ali who married Fatima the prophetic daughter

The former (also called Sunnites) recognise the 'Sunnah' (tradition) sayings of Mahomet (supplementary to the Koran) which the Shites reject. Husan and other sons of Ali were murdered A.D. 680 and a miracle play and a festival in their honour are still observed.

The Ottoman empire is the chief seat of the Sunnites the sultan being considered the representative of the caliphs. Persia has been for centuries the stronghold of the Shites.

The Mahometans termed Saracens, conquered

Arabs, North Africa, and part of Asia, in the 7th century. In the 8th they invaded Europe, conquering Spain, where they founded the caliph of Cordova, which lasted from 756 to 1031, when it was broken up into smaller governments, the last of which, the kingdom of Grenada, endured till its subjugation by Ferdinand in 1492; but the Moorish Mahometans were not finally expelled from Spain till 1609.

Their progress in France was stopped by their defeat at Tours by Charles Martel, in 732.

After a long contest, the Turks under Mahomet II. took Constantinople; he made it his capital and the chief seat of his religion.

Though considered to be declining, Mahometanism is calculated as including 700 millions amongst its votaries.

MALTA (formerly Melita), an island in the Mediterranean, held successively by the Phœnicians, Carthaginians, and Romans, which last conquered it, 259 B.C. The apostle Paul was wrecked here, A.D. 62 (*Acts xxvii, xxviii*). Malta was taken by the Vandals, 534, by the Arabs, 870, and by the Normans from Sicily, 1090. With Sicily it became successively part of the possessions of the houses of Hohenstaufen, of Anjou (1266), and of Aragon (1266). In 1530 Charles V gave it to the Knights Hospitallers, who defended it most courageously and successfully, in 1551, and 1565, against the Turks, who were obliged to abandon the enterprise after the loss of 30,000 men. The island was taken by Bonaparte in the outset of his expedition to Egypt, 12 June, 1798. He found in it 1200 pieces of cannon, 200,000 lbs of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets, besides an immense treasure collected by superstition, and 4500 Turkish prisoners, whom he set at liberty. Malta surrendered to the British under Pigot, 5 Sept 1800. At the peace of Amiens it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations;

but by the treaty of Paris, in 1814, the island was guaranteed to Great Britain. A legislative constitution was established in 1849; and after various changes was replaced by a more popular one proclaimed 22 Dec. 1857. *La Valetta*, the capital, was founded in 1557 by the grand master La Valetta, and completed and occupied by the knights, 18 Aug. 1571. The Protestant college was founded in 1846. A grand new naval dry dock was opened, May, 1871. Governor of Malta and Gozo, sir Patrick Grant, March, 1867; sir C. T. Van Straubenzee, 1872; sir Arthur Borton, 1878; gen. sir John Lubbock A. Stimmone, 1884; lt.-gen. sir Henry D'Oyly Torrens, March, 1888, died 1 Dec. 1889; lieu.-gen. sir H. A. Smyth, Dec. 1889.—The visit of prince of Wales, 6 April, 1876. Great immigration of destitute Europeans from Alexandria (see *Egypt*) middle June, 1882; about 2200, 6 July, 1882. See *Cholera*. MALTA, KNIGHTS OF. A military religious order, called also Hospitalers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Malt, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, 1048. They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitalers (Latin, *hospes*, a guest). The military order was founded about 1099; confirmed by the pope, 1113. In 1199 the knights defeated the Turks at Antioch. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1290. John, king of Cyprus, gave them Limassol in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand master de Vallart, and the next year defended it under the duke of Savoy against an army of Saracens. The story that his successors have used F. B. R. T. (*Fortitudo ejus Rhodum tenuit*, or his valour kept Rhodes) for their device is much doubted. From this they were also called *Knights of Rhodes*; but Rhodes being taken by Solymann in 1522, they retired into Candia, thence into Sicily. Pope Adrian VI. granted them the city of Viterbo for their retreat; and in 1530 the emperor Charles V. gave them the isle of Malta. The order was suppressed in England in 1540; restored in 1557; and again suppressed in 1559. St. John's Gate, Clerkenwell, a relic of their possessions, still exists. The emperor Paul of Russia declared himself grand master of the order in June, 1799. After the death of the grand master, Tommasi di Contara, in 1805, the order was governed by a lieutenant and a college at Rome, till Pope Leo XIII. made count Casati a Santa Croce (lieutenant since 14 Feb. 1871) grand master, 28 March, 1879. The knights sent a hospital establishment into Bohemia during the war in 1866, which afforded great relief to the wounded and sick.

MAMELON, a hill, one of the defences of Sebastopol, was captured by the French, 7 June, 1855.

MAMELUKES, originally Turkish and Circassian slaves, established by the sultan of Egypt as a body-guard, about 1240. They advanced one of their own corps to the throne of Egypt, May, 1250,

and continued to do so until it became a Turkish province, in 1517, when the boys took them into pay, and filled up their ranks with renegades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia; but, assisted by the Arnauts, reconquered Egypt from the Turkish government. In 1804, Napoleon embodied some of them in his guard. On 1 March, 1811, they were decoyed into the power of the Turkish pacha, Mehomet Ali, and slain at Cairo.

MAMERTINI, sons of Mamers or Mars, were Campanian soldiers of Agathocles. They seized Messina in Sicily, in 281, B.C., and when closely besieged by the Carthaginians, and Hiero of Syracuse, in 264, they implored the help of the Romans, which led to the first Punic war.

MAMMOTHI, an extinct species of elephant. An entire mammoth, flesh and bones, was discovered in Siberia, in 1799. Remains of this animal have since been found at Harwich, in 1803, and at places in Europe, Asia, and America.

MAN, ANTIQUITY OF. In 1836, M. Boucher de Perthes found some rude flint implements, which he believed to be of human manufacture, mingled with bones of extinct animals, in the old alluvium near Abbeville in Picardy, France, and also in 1837, near Amiens. Similar flints have since been found in Sicily by Dr. Falconer, at Brixham by Mr. Pengelly, and lately in various parts of the world. Hence many geologists infer that man existed on the earth many ages earlier than has been hitherto believed.

Some burnt bones found in the Nile are considered to be 20,000 years old, and some bones found in lacustrine deposits in Florida, 30,000 years old. The "Engis skull" found by Schmerling in the valley of the Meuse about 1834. Fossil human remains found in extinct volcanoes of St. Denis, near Pay en Velly 1846. A human jaw said to have been found in the drift at Moulin Quignon, near Abbeville March, 1863. Sir Charles Lyell's "Antiquity of Man" was published in 1863 (4th edition, 1873), and sir John Lubbock's "Prehistoric Times," 1865 (4th ed. 1878). The skeleton of a man supposed to have been a contemporary of the mammoth and cave-beast was found with polished flint implements by M. Riviere in the Cavillon cavern, near Mentone, 26 March, 1872. Mr W. Pengelly went to examine these remains. "The Ancient Stone Implements, Weapons, and Ornaments of Great Britain," by John Evans, F.R.S., published, July, 1872; and his "Ancient Bronze Implements, Weapons, &c." published May, 1881. "In our day the quaternary man is a fact universally accepted; but the tertiary man is a problem under discussion."—F. Cook 1877.

MAN, ISLE OF, was subdued by Edwin, king of Northumberland, about 620; by Magnus of Norway, 1008; by the Scots, 1206; occupied by Edward at the wish of the inhabitants 1290; recovered by the Scots in 1313; but taken from them by Montacute, afterwards earl of Salisbury, to whom Edward III. gave the title of king of Man, in 1343. It was afterwards subjected to the earl of Northumberland, on whose attainer Henry IV. granted it in fee to sir John Stanley, 1406. It was taken from this family by Elizabeth, but was restored in 1610 to the earl of Derby, through whom it fell by inheritance to the duke of Albol, 1735. He received 70,000*l.* from parliament for all his rights in 1765; and the nation was charged with the further sum of 132,944*l.* for the purchase of his remaining interest in the revenues of the island in Jan. 1829. The countess of Derby held the isle against the parliament forces for a time in 1651. The new

queen's landing pier (cost 45,400*l*) inaugurated by the then governor, H B Loch, 1 July, 1872. Not relating to the harbours and coasts, passed June, 1872. The first railway (from Douglas to Peel) opened, 1 July, 1873. Population, 1871, 54,042, in 1881, 53,558. 1891, 55,504. Revenue, 1889-90, 63,824*l*; expenditure, 57,947*l*. Proposed reform of the house of keys, Dec 1886, partly negatived. 26 Jan. 1887. New Customs Act passed in 1887. The Bismarck is said to have been presided over by Amphibulus about 360. Some assert that St Patrick was the founder of the sea, and that Germanus was the first bishop, about 447. It was united to Sodor in 1113. The bishop has no seat in the house of lords, but Lord Auckland (bishop, 1847-54) sat by right of his barony. Present amount, 2000*l*.

The foundation stone of the Biffl tower at Douglas laid by the earl of Lathom 23 Oct. 1890. According to custom the Lills which had received the royal assent, one for the distribution of seats in the house of Keys, were promulgated to the legislature, in the open air by the then governor, Spencer Walpole 30 March, 1891.

MANASSAS JUNCTION (Virginia, United States), an important military position, where the Alexandria and Manassas Gap railways meet, near a creek named Bull Run. It was held by the confederates in 1861, when they were attacked by the federal general Irw n McDowell. He began his march from Washington on 16 July, and gained some advantage on the 18th at Centerville. On the 21st was fought the first battle of Bull Run. The federals, who began the fight, had the advantage till about three o'clock p.m. when the confederate general Johnston brought up reinforcements, which at first the federals took for their own troops. After a brief resistance, the latter were seized with sudden panic, and in spite of the utmost efforts of their officers, fled, abandoning a large quantity of arms, ammunition, and baggage. The confederate generals Johnston and Beauregard did not think it prudent to pursue the fugitives, who did not halt till they arrived at Washington. The federal army was said to have had 461 killed, 1011 wounded, 1216 missing. The loss of the confederates was stated to be about 1500. In March, 1862, when the army of the Potomac, under general McClellan, moved into Virginia, they found that the confederates had quietly retreated from the camp at Manassas. On 2 Oct. 1862, this place was the site of another great battle between the northern and southern armies. In August, general "Stonewall" Jackson, after compelling the federal general Pope to retreat, defeated him at Cedar mountain on the 9th, turned his flank on the 22nd, and arriving at Manassas repulsed his attack on the 30th. On the 30th general R E Lee (who had defeated general McClellan and the invading northern army before Richmond, 25 June to 1 July) joined Jackson with

his army, and Pope received reinforcements from Washington. A desperate conflict ensued, which ended in the confederates gaining a decisive victory, compelling the federals to a hasty retreat to Centerville, where they were once more routed. 1 Sept. The remains of their army took refuge behind the lines of Washington on 2 Sept. Pope was at once superseded, and McClellan resumed the command to march against the confederates, who had crossed the Potomac and entered Maryland, see *United States*.

MANCHESTER (Iancashire) in the time of the Druids, was one of their most principal stations, and had the privilege of sanctuary attached to its altar, in the British language *Mayno*, a stone. It was one of the seats of the Brigantes, who had a castle, or stronghold, called *Mancunon*, or the place of fairs, near the confluence of the rivers Medlock and Irwell. The site of this, still called the "Castle Field," was, about 79, selected by the Romans as the station of the *Colonia Prima Flavia*, and called by them *Mancunium*, hence its Saxon name *Mancrosta*, from which its modern appellation is derived. *Leeds*. An order in council in Oct. 1838, declared that the sees of St. Asaph and Bangor should be united on the next vacancy in either, and that the bishopric of Manchester should be immediately created within the jurisdiction of the archiepiscopal see of York; the county of Lancashire for that purpose to be detached from Chester. By act 10 Vict. (1847) the sees of St. Asaph and Bangor were to exist undisturbed, and that of Manchester was to be created.

MANDALAY, see BURMAH.

MANERU, near Puente de la Reyna Navarre. Here took place a conflict between the republicans, under Moriones, and the Carlists, under Otto; both claimed a victory; 6 Oct. 1873. The Carlists were considered to have the advantage.

MANGANESE. Black oxide of manganese, long used to decolorize glass, and called *Magnesia nigra*, was formerly included among the ores of iron. Its distinctive character was proved by the researches of Pott (1740), Kaim and Winterl (1770), and Scheele and Bergmann (1774); it was first eliminated by Gahn. Manganese combined with potassium is called mineral chameleon, from its rapid change of colour under certain circumstances. Forchhammer employed it as a test for the presence of organic matter in water; and Dr. Angus Smith, successfully applied this test to air in 1838. The oxide is the important ingredient in Condy's "disinfecting fluid." Manganese bronze, a new metal produced by Mr. P. M. Parsons, inventor of white brass, 1876. Manganese steel produced by Messrs. Pfeil & Co. 1887.

MANICA, a territory in S. Africa in Mashonaland, near Mozambique, which on account of its mines, the Portuguese vainly endeavoured to acquire in the 16th century. See *Zambesi*.

The territory was acknowledged to be under the influence of Portugal by the convention of Aug. 1890.

MANICHEANS, a sect founded by Manes, in Persia, about 261. It spread into Egypt, Arabia, and Africa. A rich widow, whose servant Manes had been, left him much wealth, after which he assumed the title of Apostle, or envoy of Jesus Christ, and announced that he was the paraclete or comforter that Christ had promised to send. He maintained two principles, the one good he called light, the other bad he called darkness. He rejected the Old Testament, and composed a system of doctrine from Christianity and the dogmas of the ancient fire-worshippers. Sapor, king of Persia, believed in him at one time; but afterwards banished him. He was burnt alive by Bahram or Varanes, king of Persia, in 277. His followers dispersed, and several sects sprang from them.

MANILLA (built about 1573), capital of the Philippine Isles, a great mart of Spanish commerce. Manilla was taken by the English, 6 Oct. 1762, when the archbishop engaged to ransom it for about a million sterling; never wholly paid. Manilla has suffered greatly by earthquakes. It is stated that nearly 3000 persons perished by one in 1645. In Sept. 1852, the city was nearly destroyed, and on 3 July, 1861, about a thousand lives were lost. The duke of Edinburgh was hospitably entertained here, 19 Nov. 1869. See *Earthquakes* 1852, 1863, 1880. Destructive typhoon, 20, 21 Oct. 1882.

MANIPUR (Manipore), a small native state, N.E. India, adjoining Assam and Burma; population, 1881, 221,070; army about 5,000.

The state has long been protected by the British from the attacks of the Burmese. In 1834, Gumbher Singh, the restored rajah, died, and was succeeded by his son, Chandra Kirti Sing, two years old. The regent, Nar Singh, a relative, usurped the government, and ruled till his death in 1850, when the young rajah was restored; a British resident being afterwards placed in the capital, with good effect. Much trouble was given by rival members of his family till 1866; he died in 1885 or 1886. He left eight sons, who formed opposing parties. The eldest, Bura Chandra Singh, became maharajah, and appointed his eldest brother, Kula Chandra Dhuya Singh, jehrai, or heir-apparent, afterwards termed regent, a weak, incapable man. In Sept. 1890, his brother, Talendrup Singh, the senapati, or commander-in-chief, threatened the maharajah and set up the jehrai in his place. The maharajah retired to Calcutta.

On 21 Feb. 1891, Mr. James W. Quilton, chief commissioner of Assam, was directed to proceed with a sufficient force to Manipur, to recognise the regent, and to remove the senapati. He entered Manipur 22 March, with 470 men and officers, civil and military, and was well received by the regent and the senapati, but could not succeed in getting the latter to attend a durbar or court. Mr. Quilton set an ultimatum required the surrender of the senapati, the letter being taken by Mr. F. St. C. Grimwood, political agent, without any result, 23 March. On the 24th, colonel Skeue proceeded with 250 men to arrest the senapati at his house within the fort enclosure, of which they obtained possession after a sharp struggle, during which Lieut. Drummerbury was mortally wounded. The senapati had escaped. About 2 A.M., the Manipuris opened fire on the residency in front, and about noon on the rear, and shelled it. About 4 P.M. the troops were withdrawn from the senapati's house, and all the force was posted in the residency, which was seriously damaged by artillery about 5 P.M., and the ammunition began to fall short. About 7 P.M. negotiations were re-opened by letter from Mr. Quilton, and the firing ceased, but the conditions offered by the regent could not be accepted. Having been invited by the senapati halfway between the residency and the palace, Mr. Quilton took with him colonel Skene, Mr. F. St. C. Grimwood, Mr. H. Cowins, an lieut. Simpson, unarmed, and without escort. After a long parley, the party entered the fort and were seen no more, and it was afterwards discovered that they were all killed (beheaded or otherwise). The firing recommenced about midnight. The ammunition having been greatly reduced, it was decided to retire from the residency, and to march across the country to meet captain Cowley's advancing party. This was done about 2 A.M. on the 25th, the party taking with them 17 wounded, and Mrs. Grimwood, who displayed much judgment, courage, and humanity. There was no serious resistance during the march, but a few skirmishes occurred. About 2 A.M. they met captain Cowley's party, who supplied them with food and other assistance. They continued their march, arriving, on 30 March, at Lakhimpur, the Cachar frontier. Lieut. C. J. W. Grant, hearing, on 27 March, of the disaster at Manipur, volunteered to attempt the relief of the British captives, and marched with 80 native soldiers from Tamu in Burma, 28 March; entrenched himself near Thobal, 31 March, held out against the attacks of the Manipuri army (about 3,000) till 7

April; and resisted negotiations judiciously; only 1 killed.

Lieut. Grant was made major and otherwise honored.

About 2,000 Manipuris, entrenched near Tamu, attacked and dispersed by general Graham's party, captain Drury being especially successful, 25 April, three columns under gen. Graham, and others from different directions converge at Manipur, which they had totally deserted, the regent, senapati, and other princes having fled, 26 April; the palace had been blown up; the heads of Mr. Quinlan and his companions were found in the enclosure.

Funeral ceremony was held over the exhumed bodies of Mr. Quinlan and his companions, 30 April, general Collett was left in command at Manipur, some of the troops left. The Manipuris returned to their homes, May, the regent and his minister were captured, 8 May, and the senapati,

about 23 May, 1892

The regent, the senapati, and prince Ango Sema, a younger brother, were tried for rebellion and abetting to murder, and sentenced to death (all apparently) 9-20 June, "

The sentences of death on the senapati and the Tongal general, as implicated in the murders, were confirmed. The sentences on the regent and his younger brother committed to transportation for life to the Andaman Islands; forfeiture of property, announced 10 Aug. The senapati and the Tongal general hanged at Manipur, 13 Aug. "

It was decided that Manipur should still be ruled by a native prince, 23 Aug., and Chura (band, aged 5, great grandson of Narbhang, was appointed maharajah, 23 Sept. dignity to be hereditary, subject to the government of India an annual tribute to be paid; declaration communicated. Oct. "

MANOMETER (Greek, *manos*, thin), an instrument for measuring the rarity of the atmosphere, gases, and vapours. One is said to have been made by Otto von Guericke about 1660, and the "statical barometer" of Robert Boyle was a simple manometer. Various forms of the apparatus were devised by Ramsden (about 1773), by Roy (1777), by Casatiel (1789), and by Bourdon and others. A manometer was constructed for the investigation respecting the elasticity of steam conducted by Prony, Arago, Dulong, and Gardard, 1830

MANORS are as ancient as the Saxon times, and imply a territorial district with its jurisdiction, rights, and perquisites. They were formerly called baronies, and still are lordships. Each lord was empowered to hold a court called the court-baron

for redressing misdemeanors, and settling disputes between the tenants. *Cabinet Lawyer*.

(2) And here Epaminondas and the Thebans defeated the combined forces of Lacedaemon, Achaea, Elis, Athens, and Arcadia, 362 B.C. The town was also called Antigonia. Other battles were fought near it.

MANTUA (N Italy), an Etruscan city, near which Virgil was born 70 B.C. Mantua was ruled by the Gonzagas, lords of Mantua, from 1328 to 1708, when it was seized by the emperor Joseph I. It surrendered to the French, 2 Feb 1797, after a siege of eight months, retaken by the Austrians and Russians 30 July, 1799 after a short siege. After the battle of Marengo (14 June, 1800), the French again obtained possession of it. It was included in the kingdom of Italy till 1814, when it was re-torred to the Austrians, who surrendered it to the Italians, 11 Oct 1866, after the peace.

MARATHON (in Attica) Here, on 28 or 29 Sept 490 B.C., the Greeks, only 11,000 strong, defeated the Persian army amounting to about 110,000. The former were commanded by Miltiades, Aristides, and Themistocles. Among the slain (about 6,400) was said to have been Hippia, who had been expelled from Athens, and was the instigator of the war. The Persian army was forced to retreat to Asia, see *Græce*.

Investigations in 1890 on the presumed site of this battle led to the discovery of vases and the probable grave of the 104 Athenians who fell.

MARBLE Diponius and Scyllis, statues of Crete, were the first artists who sculptured marble, and polished their works, all statues previously being of wood, about 500 B.C. *Phry* The edifices or monuments of Rome were constructed of, or ornamented with, hne marble. The ruins of Palmyra are chiefly of white marble. The marble arch, London, erected at Buckingham palace, 1830, was removed to Hyde-park, March, 1851.

It is said that Romulus gave to this month the name of his supposed father, Mars; but Ovid observes, that the people of Italy had the month of March before the time of Romulus, but placed it differently in the calendar. The year commenced on the 25th of this month till 1753; see *Year*. The March of 1845 and 1886 had much frost and skating.

MARCHES. The old boundaries between England and Wales, and England and Scotland. The Lords Marchers of the Welsh borders had viceregal authority; the wardens of the Scotch marches were subordinate officers. These powers were abolished, 1536, and 1689.

MARENGO (N. Italy). Here the French army, commanded by Bonaparte, after crossing the Alps into Piedmont, attacked the Austrians, 14 June, 1800; his army was retreating, when the arrival of general Desaix turned the fortunes of the day. The slaughter on both sides was dreadful. By a treaty between the Austrian general Melas and Bonaparte, signed 15 June, the latter obtained twelve strong fortresses, and became master of Italy.

MARESCHAUX or **MARSHALS**, in France, were the equires of the king, and originally had the command of the vanguard to observe the enemy and to choose proper places for its encampment. Till the time of Francis I., in 1515, there were but two marshals, who had 500 livres per annum in war, but no stipend in time of peace. The number was afterwards greatly increased. The Austrians are said to have lost 1400 killed and wounded, and 900 prisoners, out of 18,000 engaged.

MARINER'S COMPASS, see *Compass*, and *Magnetism*.

MARINES, soldiers serving on ship-board, were first established with the object of forming a nursery to man the fleet. An order in council, dated 16 Oct. 1664, authorized 1200 soldiers to be raised and formed into one regiment. In 1684, the third regiment of the line was called the Marine Regiment; but the system of having soldiers exclusively for sea service was not carried into effect until 1698, when two marine regiments were formed. More regiments were embodied in subsequent years; and in 1741 the corps consisted of ten regiments, each 1000 strong. In 1759 they numbered 18,000 men. In the latter years of the French war, ending in 1815, they amounted to 31,400, but there were frequently more than 3000 supernumeraries. The *folies*, as they are called, frequently distinguished themselves. The "Royal Marine Forces" (so named 1 May, 1802), now comprehend artillery and light infantry. The vote for 1857 was for 16,000 marines, inclusive of 1500 artillery. *P. H. Nicolas*. Marine Engineers' Institution, founded in 1872. About 1180 they numbered 40,000, living in the neighbourhood of mount Libanus, and were of service to the Christian kings of Jerusalem. They were reconciled to the church of Rome soon after. For an account of the massacres of the Maronites in 1860, see *Dhuss*.

MAROONS, a name given in Jamaica to run-away negroes. When the island was conquered from the Spaniards, a number of their negroes fled to the hills and became very troublesome to the colonists. A war of eight years' duration ensued, when the Maroons capitulated on being permitted to retain their free settlements, about 1730. In 1795 they again took arms, but were speedily put down and many were transported. *Brands*.

MARPINGER, village, near Saarbrück. The Virgin and Satan said to have been seen by children; and miracles wrought, 3 July, 1876. The priest, Neureuter, acquitted of the charge of imposture, April, 1879.

MAR-PRELATE TRACTS, virulently attacking episcopacy, were mostly written, it is believed, by Henry Pory, who was cruelly executed, 29 May, 1593, for writing scurrilous words against the queen (found about his person when seized). The tracts appeared about 1586. Some had very singular titles: such as "An Alman for a Larra," "Hay any Works for Cooper?" &c. They were collected and reprinted in 1843.

MARQUE, LETTERS OF, see *Privateer*.

MARQUESAS ISLANDS (Polynesia) were discovered in 1595 by Meudana, who named them after the viceroy of Peru, Marques de Mendoza. They were visited by Cook in 1774, and were taken possession of by the French admiral Dupetit Thouars, 1 May, 1842.

MARQUIS, a dignity, called by the Saxons *markin-reve*, by the Germans *markgrave*, took its

original from mark or March, a limit or bound (see *Marches*); the office being to guard or govern the frontiers of a province. Marquis is next in honour to a duke. The first Englishman on whom the title was conferred was the favourite of king Richard II., Robert de Vere, earl of Oxford, created marquis of Dublin, and placed in parliament between the dukes and earls, 1385. James Stewart, second son of James III. of Scotland, was made marquis of Ormond, in 1476, without territories, afterwards earl of Ross.

MARRIAGE was instituted by God (*Gen. ii.*), and confirmed by Christ (*Mark x.*), who performed a miracle at the celebration of one (*John ii.*). Matrimonial ceremonies among the Greeks are ascribed to Cecrops, king of Athens, 1554 B.C. See *Age, Affinity*.

HALF MARRIAGES. *See* MATRIMONY. Among the Romans concubinage was a legitimate union not much tolerated but authorized. The concubine had the name of *sexta conjux*. Men might have either a wife or a concubine provided they had not both together. Constantine the Great declared concubinage, but did not abolish it. This ancient custom of the Romans was preserved not only among the Lombards but by the French when they held dominion in that country. Cyprian assumes that the Gascons and other people bringing on the Pyrenean mountains had not relinquished this custom in his time 1590. The women bore the name of *sexta* wives of the second order. *See* MORGANATIC MARRIAGES

DOLBY MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was introduced by the state. The first Lacedemonian who had two wives was Anaxandrides the son of Leon about 520 B.C. Demetrius of Syria married two wives 117. Dione the daughter of Leontius and Antiochus the sister of Dion 398 B.C. It is said that the countess of a German nobleman was permitted under peculiar circumstances by George IV. in A.D. 1837-1) to marry and live with two wives. The Maccanites practiced and encourage polygamy

FORCED MARRIAGES. The story of Henry VIII. (1487) made the principal incident in marriage with a hureless, &c. contrary to their will equally unjust as filius. By 30 Eliz. (1566) such felons were deemed the heaviest of criminals. It is otherwise in punishment. In the partition of 1604 (1600). The remarkable case of Miss Wharton married at the house of Wharton when captain Campbell was used by force occurred in William III. reign. Sir John Johnston was hanged for seducing the young lady and the marriage was annulled by parliament 1800. Edward Gibbon on Wakefield was tried at Lancaster in 1801 found guilty of the felonious abduction of Miss Turner 24 March 1827 and his marriage with her was immediately dissolved by act of parliament

MARRIAGES BY SALE. Among the Bahayunans at a certain time every day the marriageable females were assembled at a dispersed of to the best bidder. This custom is said to have originated with Atossa daughter of Behistok about 443 B.C.

MARSEILLAISE HYMN The words and music are ascribed to Rouget de Lisle, or L Isle, a French engineer officer, who, it is said, composed it by request, 1792, to cheer the conscripts at Strasbourg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. This account is doubted by some (1879). The author was pensioned by Louis Philippe, 1830, and died in 1836

MARSHALSEA COURT, having jurisdiction in the royal palace, was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the *Marshalsea* (see *lord Coke's 10 Rep 68*) no business has been done in this court, but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. Both sides drew up on Marston-moor, on 2 July, 1644, and the combat was long undivided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious, he drove his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's artillery was taken, and the royalists never recovered the blow

They were again taken, 16 March, 1794, restored at the peace of Amiens in 1802, again

MASQUERADES were in fashion in the court of Edward III., 1340, and in the reign of Charles II. 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo. I. 1724. They were revived and carried to a shameful excess in violation of the laws, and tickets of admission to a masquerade at Banbury were on some occasions subscribed for at twenty-five guineas each, 1776. *Montimer*. At the close of a bal masqué, given by Anderson the Wizard, 5 March, 1856, Covent-garden theatre was destroyed by fire.

MASS, in the Roman church, is the office or prayers used at the celebration of the Eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low; the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon, low masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394; it was

introduced into England in the 7th century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," and compiled for that cathedral, by St. Osmund and others, during the 12th century. The English communion service was adopted in 1549, see *Masses*, and *Ritualism*.

By the Irish Church act, passed 26 July, 1869, the annual parliamentary grant was to cease after 1 Jan. 1871, a compensation being made. A synod held here, Sept. 1875, condemned mixed education. MAZRA (or Baba Wahi), near Candahar, Afghanistan. His son Sir Frederick Slough Roberts totally defeated Sirdar Mahomed Ayob Khan, and captured his camp and all his cannon, 1 Sept 1880. Amongst the killed was colonel F. Brownlow, capt. St John F. Brown, and capt. L. Stratton. Lieut. Hector MacLaine (made prisoner 27 July) was found recently murdered. Ayob Khan with some followers fled towards Herat.

MEAL TUB PLOT, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Munnell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a meal-tub at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, who were against the duke of York's succession, of treason—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, 1 June, 1685, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assaulter was hanged.

Mecca, after being vainly besieged by Haseen for the caliph Yezid, 682, was

taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. They were expelled by the pacha of Egypt in 1818, who returned in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859. The grand shereef was assassinated by a fanatic, 21 March, 1880. Pilgrimage to Mecca still continues, annual average 93,350 (1887).

MEDALS, see *Numismatics*. The ancient medals resembled medallions. Modern medals began about 1453 in the 15th century with the works of Vittore Pisano, of Verona, who died 1456, and his followers. Charles I. authorized the presentation of a badge or medal for "forlorn hopes" soldiers, May, 1643. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty, William IV., for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to Lord Howe's victory, 1 June, 1794, it was thought expedient to institute a naval medal. Medals were struck for the victory of Waterloo; a general war medal (for the war 1793-1814) was ordered in 1847; and special medals were given after the Caffre and Chinese wars. Medals were presented by the queen to persons distinguished in the war in the Crimea, 18 May, 1855. Medals were given to Arctic voyagers of 1875-6, in 1877, after Egyptian war, 1882, distributed by the queen at Windsor, 21 Nov. 1882; medals for the Boudan war, ordered, 2 Sept. 1885; a Burmah medal was given for the war, 1885-7. MEMPHIS, an ancient city of Egypt ("of which the very ruins are stupendous"), is said to have been built by Menes. It included several grand temples with the tombs of the kings. The invasion of Cambyses, 525 B.C., began the ruin of Memphis, and the founding of Alexandria, 332, completed it. It was restored by Septimius Severus, A.D. 202. In the 7th century, under the dominion of the Saracens, it fell into decay.—MEXICUS, TEENASCHE, U.S., on the Mississippi, was taken from the confederates by the federals after a severe conflict, 6 June, 1862.

persons, chiefly Irish, 4 Dec. 1785. The road from London to Holyhead has long been regarded as the highway from the British metropolis to Dublin; Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting beautiful suspension bridges over the river Conway and the Menai Strait, commenced in July, 1818, finished in July, 1825, opened 30 Jan. 1826. The Britannia tubular bridge over the Menai was constructed by Stephenson and Fairbairn in 1849-50; see *Tubular Bridges*.

MENDICANT FRIARS. Several religious orders commenced alms-begging in the 13th century, in the pontificate of Innocent III. They spread over Europe, and formed many communities; but at length by a general council, held by Gregory X. at Lyons, in 1272, were reduced to four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and others branched off; see *Franciscans*, &c.

MENDICITY SOCIETY (Red Lion-square, London), was established in 1818 for the suppression of public begging, and other impositions. Tickets received from the society are given by subscribers to beggars, who obtain relief at the society's house, if deserving. Up to 1872 the society had caused above 23,000 vagrants to be convicted as impostors. In 1857, 54,073 meals; in 1860, 42,912; in 1865, 42,137; in 1872, 26,330; in 1878, 55,180 were distributed. In 1857, 3785; in 1865, 3809; in 1872, 2192; and in 1878, 1700 beggars letters were investigated; in 1891, 1358; 1384 cases were relieved in 1887. See *Poor*. The society has been much aided by the action of the Charity Organization society; established in 1870.

MENIPPÉE, see *Satire*.

MENNONITES, four sects of Dutch, Flemish and German baptists, derive their name from Menno Symonis (1505-61), formerly a catholic priest, who became a teacher and leader of the anabaptist, about 1537, and published his "True Christian Belief" in 1556; subsequently divisions and changes ensued. The Mennonites, objecting to war, emigrated from Prussia to Odessa, to escape military service, and went thence to America, 1878.

MENSURATION. The properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, &c., about 218 B.C.; see *Archimedes*. The *Mensurator*, a new machine for the solution of triangles, was explained by Mr. W. Marham Adams, at the British Association Meeting at Brighton, Aug. 1872.

MENTANA, (near Monte Rotondo, in the old papal states). Here Garibaldi and his volunteers, after having intrenched his positions at Monte Rotondo and Mentana on their march towards Tyrol, on Sunday, 3 Nov. 1867, were totally defeated by the pontifical and French troops under generals Kanisior and Polhès, after a severe conflict, in which general Fiala said "the Chassacot rifles did wonders." There were about 5000 men on each side, but the Garibaldians were very badly armed. The loss of the papal and French troops was about 200 killed and wounded, that of Garibaldi about 800. Garibaldi crossed the Italian frontier,

and was arrested at Correes, and eventually sent to Caprea (about 25 Nov.). See *Rome*. A monument to the Garibaldians who fell here was inaugurated 25 Nov. 1877.

See *Russia and Turkestan*.

MESMERISM. Frederiek Anton Mesmer, a German physician, of Meserburg, published his doctrines in 1766, contending, in a theory on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous converts and much money by experiments with and without metal plates, producing effects termed then, "animal magnetism" now "hypnotism".

A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Mrs Harriet Martineau and others announced their belief in it. In 1850, the Mesmeric Infirmary issued its tenth annual report, Archbishop Whately being president, and the earl of Carlisle and Mr Monckton Milnes (now Lord Houghton) among the vice presidents. See *Animal Magnetism and Hypnotism*.

It was at first governed by kings after its restoration to power in the Peloponnese it formed an inferior republic, under the protection first of the Thebans, and afterwards of the Macedonians.

The first Messenian war was begun 743 B.C. was occasioned by a violent effort to annex Spartan territory in a league of distribution common to both cities. The king of Sparta being killed in the third year, defeated the Messenians, and finally they were taken and the Messenians in nine slaves to the Spartans. B.C. 704. The second war it is now of the Spartans was commenced about 685 ending in the defeat of the Messenians who fled to Sicily. 668. The third war (the Messenian war, rate) 464-452.

Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added caesium, rubidium, thallium, indium, gallium, and others to the known metals. See *Elements*, *Metals*, Iron and the other metals "Metallurgy," published by Dr John Percy, 1801-30, he died 19 June, 1889.

METAMORPHISTS in the 15th century affirmed that Christ's natural body, with which he succeeded into heaven, was wholly denied.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Metaphysics*. Modern metaphysics arose in the 15th century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stewart, and sir W. Hamilton, were eminent British metaphysicians; and Descartes, Pascal, Kant, Schelling, and Fichte, foreign ones. See *Philosophy*.

The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hannibal to be thrown into his brother's camp. The victory saved Rome.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate, and therefore embalmed the dead. See *Baldwin*.

Meteorological observatories have been erected in all parts of the globe.

The meteorological department of the Board of Trade, established in 1855, under Admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather-Book" in 1865. His exertions are said to have overtaxed his brain, and on 30 April, 1865, he died by his own hand. The meteorological office was soon after placed under the direction of Mr. Robert H. Scott. It has issued apparatus and instruction books to captains of ships, and established observatories in many places in the empire. It was handed over to the Royal Society in 1871, and endowed by Mr. J. P. Gassiot.

METEORS, LUMINOUS, include shooting stars, fire-balls, and falling stones or aerolites. They were described by Halley, Wallis, and others early in the 17th century. The periodicity of the star showers about the 10th of August (named in the middle ages St. Lawrence's tears) was discovered separately by Quercet, 1830, and by Herschel in 1837. The following are remarkable epochs for their annual return:—2 Jan.; 29 July; 3 and 4-12 Aug.; 8-14 Nov.; 11 Dec. R. P. Grey. See *August*.

The magnificent continuous star-shower of 24 Nov. 1866, had been predicted by professor Newton some time previously. A fine display occurred on the night of 13 Nov. 1868, in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S. A.), 12 Nov. 1790; and by Dr. D. Omond, at Nahav (U. S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1874; and in Southern and Western Europe, 27 Nov. 1885.

Aerolites, falling stones, accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days, see Calippic Period, Golden Number

METRIC SYSTEM Before the revolution there was no uniformity in French weights and measures. On 8 Apr, 1790, the constituent assembly charged the Académie de Sciences with the organization of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Mechain, and Prony. Delambre and Mechain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona and from their calculations the metre, which is equal to a ten-millionth part of the distance between the poles and the equator (3280 English feet) was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only kilogram on 2 Nov 1801. A decree on 12 Feb unaccommodated the old measures to the new system, but on 4 July, 1837, it was decreed that after 1 Jan 1840, the metric and decimal system in its prime true simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, and will probably in time be adopted in the British empire
